

Python Turtle — Draw the Indian Flag!

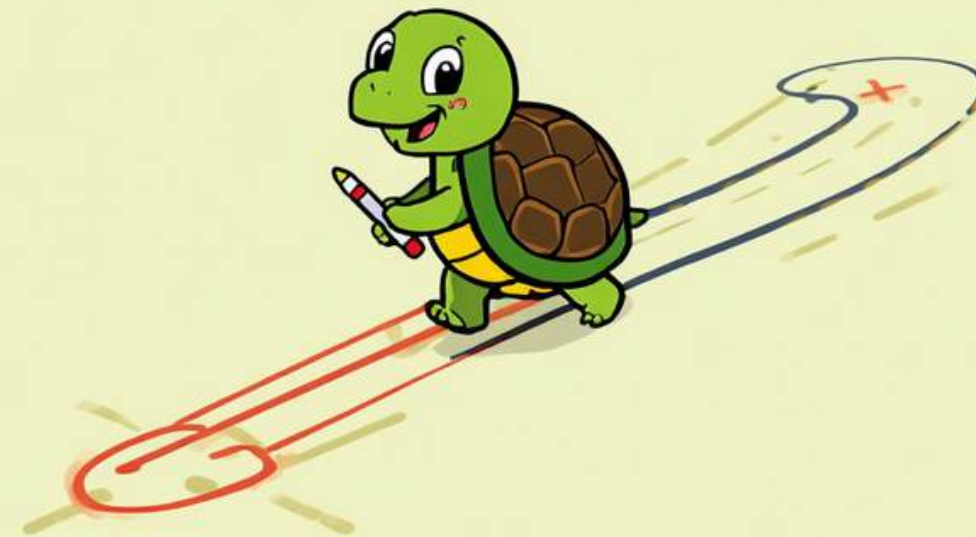

Watch the Indian Flag Come Alive with Python Turtle!

Three colourful bands appear one by one... then the Ashoka Chakra spins! Let's create this magic with code!

Meet Your Coding Friend: The Turtle!

Move Like a Game!

The turtle walks step by step — just like moving on a game board!

Turn & Change Direction!

Use `right()` and `left()` to turn — just like turning corners in Kabaddi!

Commands Control the Path!

`forward()`, `backward()`, `right()`, `left()` — you're the boss of the turtle!

Painting the Three Bands!

Draw each band with code!

Use `color()`, `begin_fill()` & `end_fill()` for each band.
Move between bands using `penup()` and `pendown()`!

Get the colours just right!

Saffron (#FF9933), White, and Green — equal widths, 3:2 flag ratio. Every band matters!

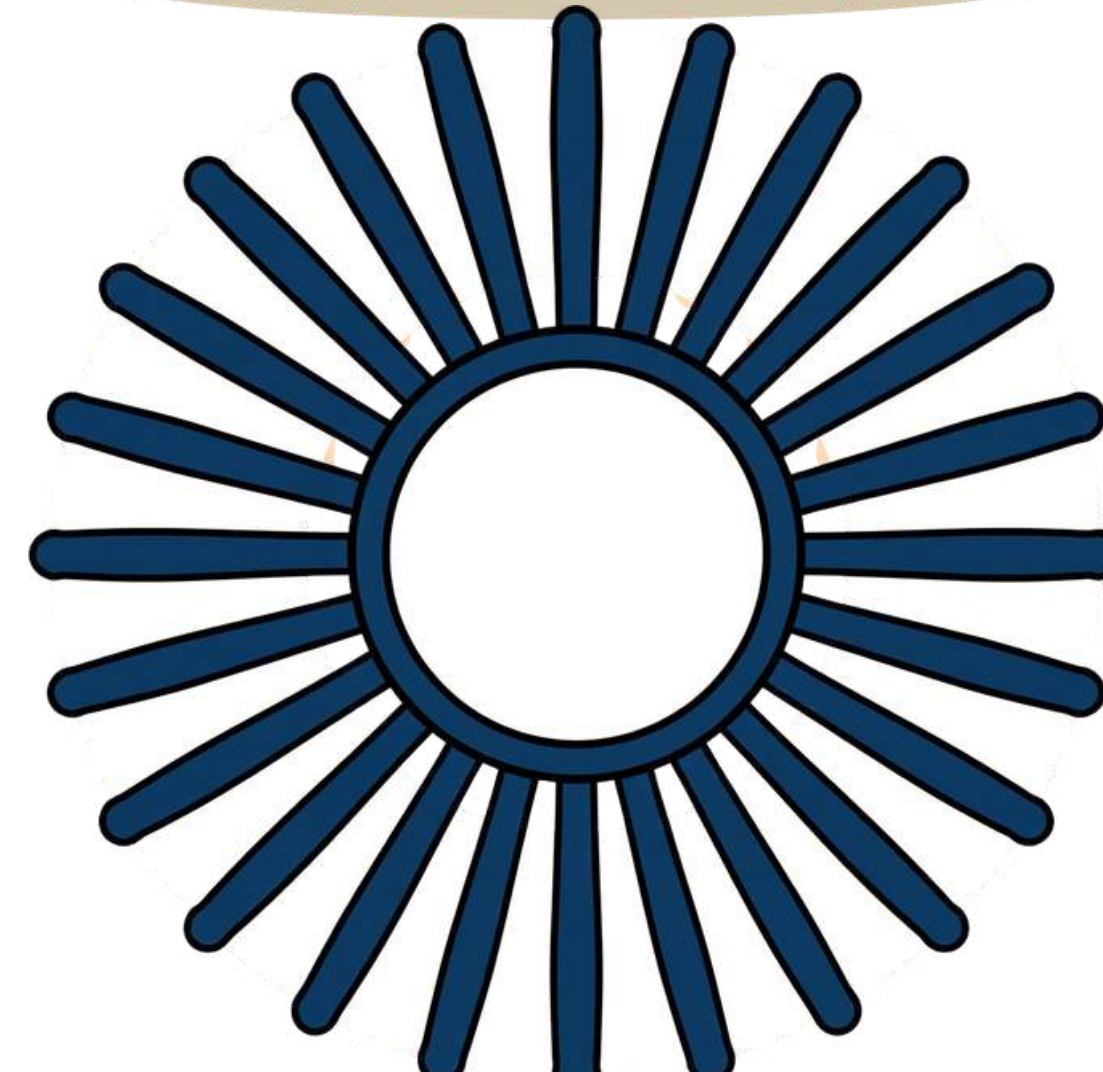

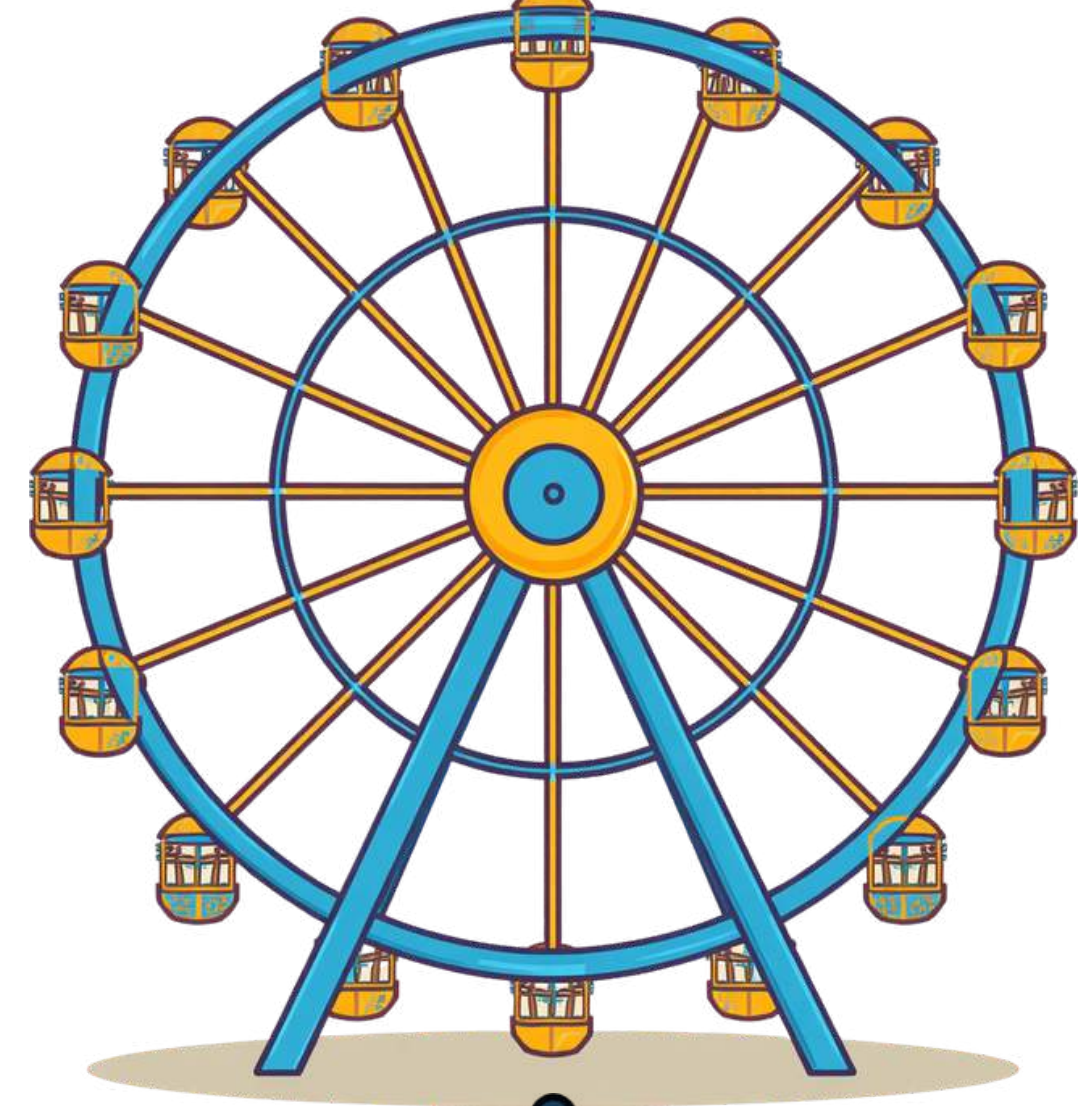

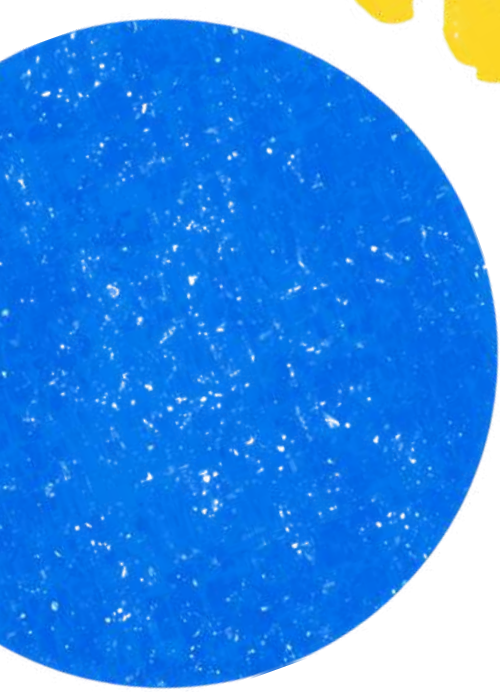

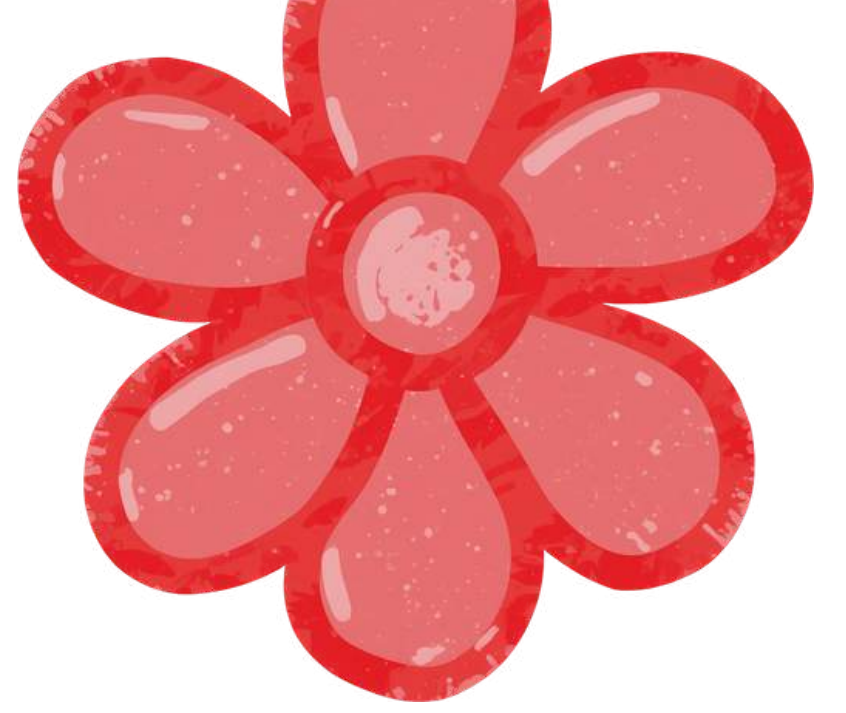

The Ashoka Chakra — A Giant Ferris Wheel!

- 24 Spokes = Hard Work? Not with Loops!
- Drawing 24 lines one by one is really hard. But a for loop does it for us — easy and fast!

The Magic of the for Loop ●

A for loop repeats a command again and again.
We use it to draw all 24 spokes of the Chakra!

Drawing the Chakra with a Loop

The For Loop Code

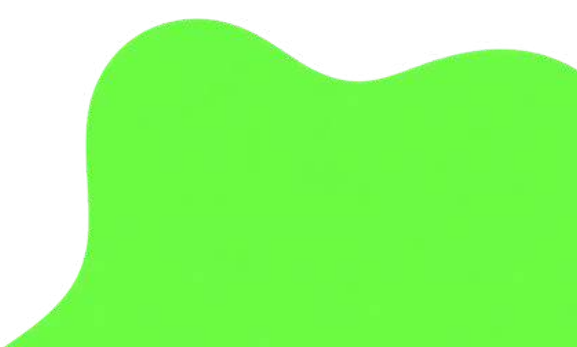

```
for i in range(24):  
    forward(30)  
    backward(30)  
    right(15)
```

What Each Line Does

forward(30) draws a spoke outward.
backward(30) returns to the center point.

Why right(15)?

$360 \div 24 = 15$ degrees!
The loop repeats 24 times for smooth, neat spokes all around!

Bug Hunting & Independence Graduation!

Missing pendown()

Your turtle draws nothing?
Check pendown()!

Wrong Colors or Turns

Double-check your color
codes and right()/left()
angles!

You're a Coding Hero! 🎉

Fixing bugs is part of
the fun — keep going,
coder!

What We Learned Today! 🎉

🐢 Drawing with Turtle

Used Python Turtle to draw amazing shapes and fill in beautiful colors!

🎨 Filling Flag Colors

Painted Saffron, White & Green bands using `color()` and `begin_fill()`!

🎮 Moving the Turtle

Controlled the turtle using `forward()`, `backward()`, `right()` and `left()`!

🔄 Loops for Chakra

Used a for loop to draw all 24 spokes of the Ashoka Chakra easily!

**Great job today!
Keep practicing and
unleash your
creativity with code!**
