

# AI — IS IT FAIR?

# MEET CHHOTU ROBOT

**YOUR FRIENDLY AI FRIEND!**

Good day Everyone I am Chhotu. I am an AI — a smart computer! I learn from examples. But sometimes... I make mistakes.

# WHAT IS AI?

## > LET'S LEARN!

AI is like a very smart computer friend! It learns by looking at lots and lots of examples. Just like you learn by doing things over and over — reading, writing, counting — AI learns the same way!

AI — IS IT FAIR?

# WHAT DOES FAIR MEAN?

Fair means everyone gets a turn!  
Everyone is treated the same.  
No one is left out.  
When we share and include everyone, that is  
being FAIR!

AI — IS IT FAIR?

# THE LADDOO STORY

## THAT IS FAIR!

It is Diwali time! Nani has made yummy laddoos for everyone. She counts all her grandchildren and gives each cousin the same number of laddoos.

Everyone gets two laddoos each — no more, no less. All the cousins smile and say "Thank you, Nani!" Everyone is happy because it is FAIR!

AI — IS IT FAIR?

# THE BALL GAME — NOT FAIR

Teacher always picks the same three students to play with the ball. Others get nothing at all. Everyone feels sad and left out — That is NOT FAIR!

AI — IS IT FAIR?

# THE KHO-KHO GAME

Teacher always picks the same three students to play. Other children are never picked. That feels bad — NOT FAIR! Everyone deserves a turn to play and have fun!

**NOT FAIR!**

# HOW DOES AI LEARN?

## CHHOTU EXPLAINS LEARNING

"I learn by looking at examples!"

The more examples I see, the smarter I get. Just like you practicing your ABCs every day — practice makes perfect!

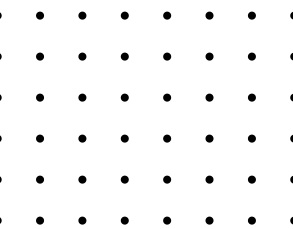

# THE STORY APP PROBLEM

- ☑ KahaniBot only learned stories from big cities. A village child asks for a Panchatantra story.
- ☑ App says "Sorry, I don't know that!" Not fair — app wasn't taught ALL stories.

**NOT  
FAIR!**

# THE GRADING MISTAKE

- ☑ A robot grades everyone's maths test, but it was only trained on neat handwriting from one type of student.
- ☑ Gives wrong marks to some children — Robot made a mistake because it didn't learn from ALL handwriting styles!

**WRONG  
MARKS!**

AI — IS IT FAIR?

# IMPORTANT MESSAGE

AI learns from people.  
If people forget someone, AI forgets them too.  
That's why we must include EVERYONE!

**INCLUDE ALL**

**WHAT CAN YOU  
DO?**

# NOTICE!

If a computer app does something strange, NOTICE it! Look carefully at what the app is doing. If something seems wrong or different, pay attention. Your eyes and brain are very smart too!

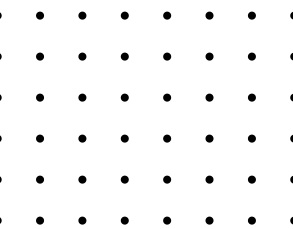

AI — IS IT FAIR?

# WHAT CAN YOU DO? — QUESTION

It is okay to say:  
"That does not seem right!"  
When something feels unfair or strange, speak  
up! Your voice matters.

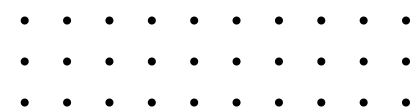

**AI — IS IT FAIR?**

# TELL SOMEONE!

## WHAT CAN YOU DO?

Tell a trusted grown-up when something seems wrong. They can help!

Talk to your parent, teacher, or didi. They will listen and help you understand.

## AI ETHICS FOR GRADE 1

# REMEMBER THESE 3 THINGS

1. AI is a smart computer that LEARNS from examples
2. If AI doesn't learn from EVERYONE, it's not fair
3. YOU can notice, question, and tell a grown-up

 **LEARNING FROM EXAMPLES**

 **FAIRNESS FOR EVERYONE**

# FINAL MESSAGE

## UNITY IN DIVERSITY

"AI should be fair to EVERY child"

"In every state, every language, every home"

"Across all of India!"

# THANK YOU!

THANK YOU FOR LEARNING ABOUT AI AND  
FAIRNESS!
