

Patterns & Sequences — Discovering the World of Patterns

Look! A Pattern Repeats!

Look! Yeh pattern It comes again and again!
(Look! This pattern comes again and again!)

What is a Pattern?

A pattern is something that repeats in the same order — again and again!

Examples:

- Amma's saree border
- Traffic lights
- Colorful bangles

Repeating Patterns & Pattern Core

- Repeating patterns have a part that keeps coming back — again and again!
- The part that repeats is called the pattern core.

Types of Pattern Cores

AB: $\triangle \bigcirc \triangle \bigcirc$

AAB: $\star \star \heartsuit \star \star \heartsuit$

ABB:

ABC:

AABB: $\square \square \bigcirc \bigcirc \square \square \bigcirc \bigcirc$

Indian examples: Kolam designs, Phulkari embroidery

Repeating Patterns in Everyday Life

Look around! Patterns are everywhere!

- Beaded jewellery from Rajasthan
- Blouse border embroidery
- flatbread on a plate (big-small-big-small)
- Traffic lights (red-yellow-green)

Extending Patterns — What Comes Next?

1. Find the pattern core.
 2. Count how many times it repeats.
 3. Add the next pieces in the right order.
- Example: Diya sequence during Diwali
Small, Big, Small, Big, —, —

Extending Patterns — What Comes Next?

Pattern: — —

Can you add the next two?
Well done! Absolutely correct!

Missing Elements in a Pattern

Find the hidden piece by looking before and after the blank.

Example: Bead necklace

—

What is missing?

Pattern Detective Priya

Priya looks carefully at the necklace.
"Hmm, let me see... red, green, blue, red,
green... Aha! The missing bead is blue!"
Look ! Priya ne pattern Got it!
