WHAT'S IN RIYA'S BAG?

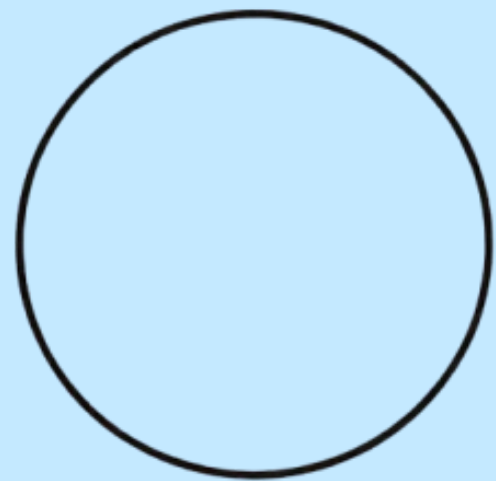

Look inside Riya's bag! Can YOU find the shapes?

Riya has a magical bag full of surprises. There's something round like a ball, something square like a dice, a pointy party hat, and her favourite lunch box!

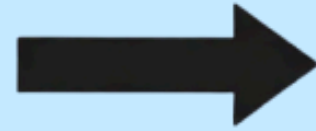

Can you guess what shapes are hiding inside?

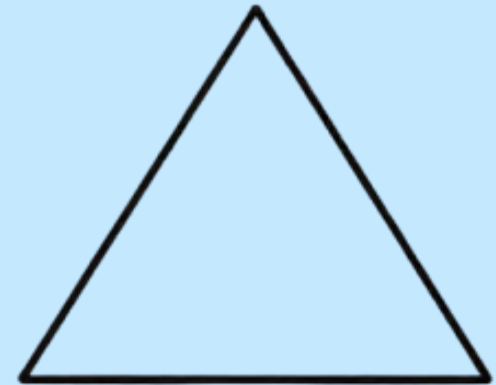

FLAT OR FAT? 2D VS 3D SHAPES

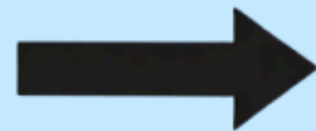

2D

3D

2D

3D

Can you hold it? Then it's 3D!

Circle is flat — you can draw it on paper.
Orange is round and fat — you can hold it!

Square is flat — it stays on the page.

Dice is chunky — you can roll it and play!
If you can pick it up and feel it all around,
that's a 3D shape!

MEET THE CUBE - THE DICE SHAPE!

1

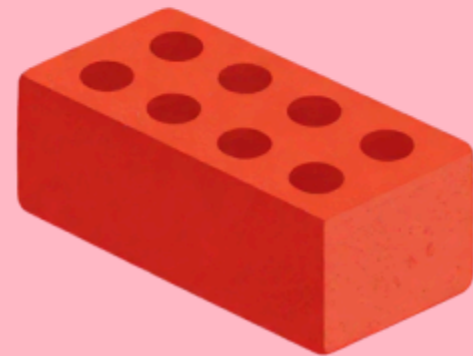

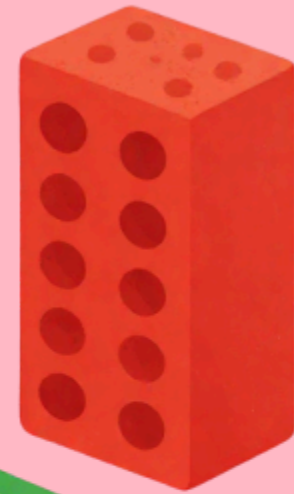

6 flat faces — count them all! Each side is a perfect square.

2

8 corners — like tiny points where the edges meet!

3

All sides are the same size — just like your Ludo dice!

MEET THE CUBOID – THE LUNCHBOX SHAPE!

1

6 flat faces — count them all! Each side is smooth and flat like a wall.

2

8 corners — poke them gently! Every corner is a little pointy spot.

3

Different lengths — not all sides are the same! Like your tiffin, brick, book, eraser box, or Parle-G packet!

MEET THE SPHERE - THE ROLLING BALL!

1

No flat face — it's smooth all around like a ball!

2

No corners — nothing pointy to poke you!

3

Rolls everywhere — like a cricket ball or marble!

MEET THE CONE - THE ICE- CREAM HAT!

1

One flat face at the bottom — it's a circle!

2

One pointy top that goes up, up, up!

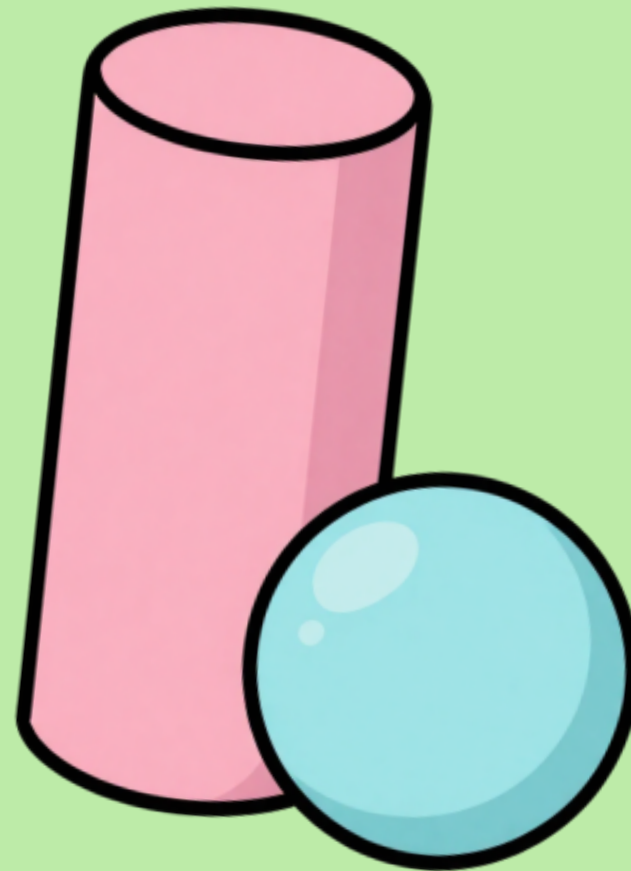

3

Find it everywhere: Ice-cream cone, birthday
topi, traffic cone!

HOW CAN YOU TELL 3D SHAPES?

Face & Corner

Edge & Round

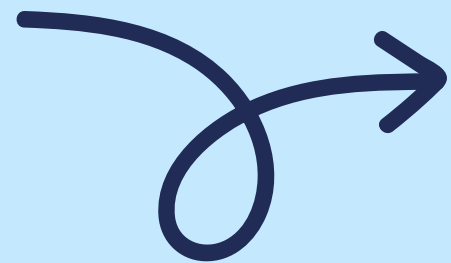

Pointy Top

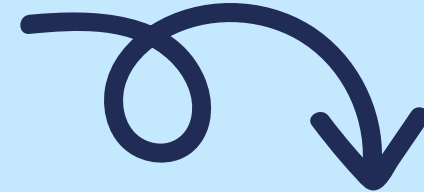

SORT THE SHAPES!

1

2

3

Look at the objects: orange,
book, cone hat, dice, ball,
biscuit box, marble, sugar
cube

Drag and drop each object
into the right basket!

4 baskets: Cube, Cuboid,
Sphere, Cone — match them
all!

SHAPES AROUND US – RECAP SONG

Sing with me! Shapes Around Us!

Let's dance and move with our shape friends!

Roll like a sphere, stack like cubes, point like a cone, and hold a cuboid!

Sing and move to remember shapes!

YOU ARE A SHAPE STAR!

Shabash! You earned the 3D Shape Explorer badge!

Waah! You are amazing!

You learned all about cubes, cuboids, spheres, and cones. Now you can spot 3D shapes everywhere you go!

TELL ME ONE SPHERE AT HOME

Can you tell me one sphere you see at home?
Think about round things that roll! Maybe a
cricket ball, a marble, or an orange?
Tell your teacher or draw it in your notebook.
You are a shape explorer now!

**THANK YOU!
KEEP EXPLORING
SHAPES EVERY DAY!**
