

INSURANCE — WHY
WE
PAY FOR 'NOTHING'?

WHAT IS MONEY FOR?

Buying things we need and want

Saving for fun activities

Staying safe and protected

WHAT IF SOMETHING BAD HAPPENS?

Sometimes, things go wrong – like a bike gets a flat tire or a phone breaks. These surprises can be frustrating and cost money to fix!

SO, WHAT IS INSURANCE?

Like a superhero cape that protects you

Like an umbrella in the rain

Like a helmet keeping you safe

WHY DO WE PAY EVEN IF NOTHING HAPPENS?

Problem

We pay money for insurance, but sometimes nothing bad happens at all!
It can feel strange to spend money and not get anything back.

Solution

That's okay! The money helps protect everyone just in case. Your payment joins others to help anyone who needs it!

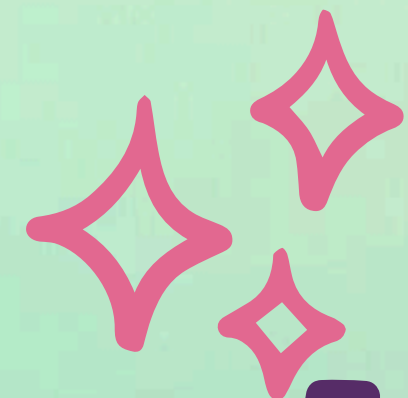

HOW DOES INSURANCE WORK?

Lots of people put money together in a big pot

If someone needs help, money from the pot is used

Everyone shares so no one worries alone!

EXAMPLE: BICYCLE INSURANCE

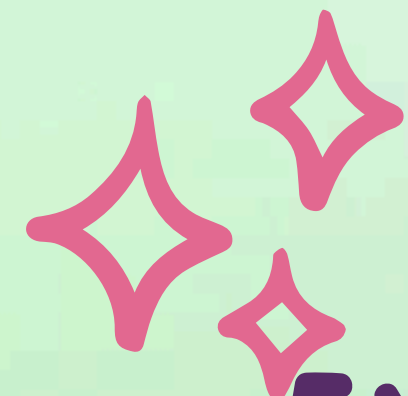

If your bike gets broken or stolen, insurance helps pay to fix or replace it! You don't have to worry about the big cost.

Pay a little money now to avoid big costs later. It's like having a safety net for your favourite bicycle!

EXAMPLE: HEALTH INSURANCE FOR KIDS

Insurance helps pay for doctor visits and medicine if you get sick. Your family pays a small amount regularly, and when you need to see a doctor, insurance helps cover the costs!

Helps families save money when someone is unwell. You can get care quickly without worrying about big bills. It's like having a health safety net for your whole family!

WHAT HAPPENS IF NO ONE GETS HURT?

No Accidents!

When no one gets hurt or breaks anything, no one needs to ask for money from the insurance pot. That's great news! It means everyone stayed safe.

The Pot Stays Full!

But the money doesn't disappear! It stays in the pot, ready to help others who might need it later. The safety net is always there for everyone.

WHY IS INSURANCE IMPORTANT?

Keeps Families Safe

Insurance protects families from big surprises! If something unexpected happens, you don't have to worry about paying a lot of money all at once.

Fixes Things Quickly

When things break or go wrong, insurance helps pay to fix them fast. No waiting or saving up — help comes right away!

Shares the Worry

Everyone puts money together, so no one person has to worry alone. It's like having lots of friends helping out!

Everyone Is Cared For

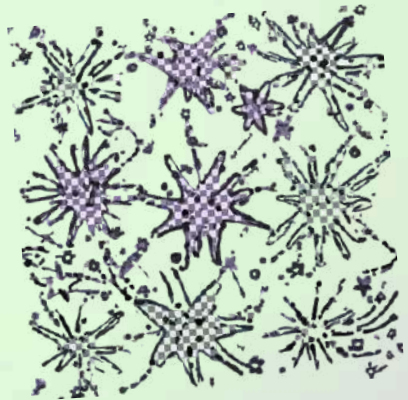

Insurance makes sure everyone in the community is looked after. When we help each other, everyone feels safe and cared for!

WHO USES INSURANCE?

People all around us use insurance every day! From your neighbors to your teachers, families everywhere protect what matters most to them.

COMMON QUESTIONS KIDS ASK

Do I need insurance if I'm careful?

Even careful people can have accidents! A ball might fly through a window, or rain might damage your bag. Insurance helps when surprises happen, even to the most careful kids.

What if I never use it?

That's actually great news! It means nothing bad happened to you. But your money helped others who needed it. It's like being part of a helpful team!

Who looks after the money?

Special companies called insurance companies keep the money safe. They make sure it's there when someone needs help. Adults can check on it anytime!

HOW CAN YOU BE SMART ABOUT MONEY?

Save a little money regularly

Learn about protecting your things

Ask questions about money and insurance

LET'S PRETEND!

Imagine you have a magic shield that protects all your toys. Would you want it? Think about it: Why does protection matter to you?

SUMMARY: INSURANCE IS....

A way to share money with friends and family

A safety net for when things go wrong

Paying a little now to avoid big problems later

Notes

THANK YOU!

Thanks for learning about insurance with us!
Keep being curious about money and
staying safe.
