

TELLING TIME AND CLOCK READING

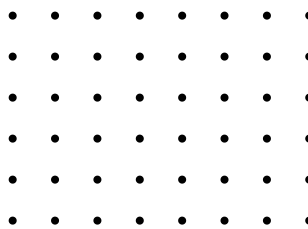

WHAT IS TIME?

UNDERSTANDING HOW TIME HELPS US

Time helps us know when to do things. It tells us when to wake up, when to eat breakfast, when to go to school, and when to play with friends. Clocks help us read and understand time every day!

LEARN THE CLOCK

PARTS OF THE CLOCK

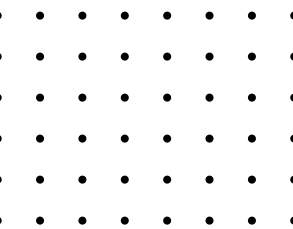

Hour Hand: The short hand that tells us the hour

Minute Hand: The long hand that tells us the minutes

**1-12
NUMBERS**

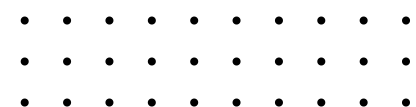

READING THE HOUR

LEARNING TO TELL TIME

Look at the short hand on the clock. It points to the hour! If the short hand points to 3, it is 3 o'clock.

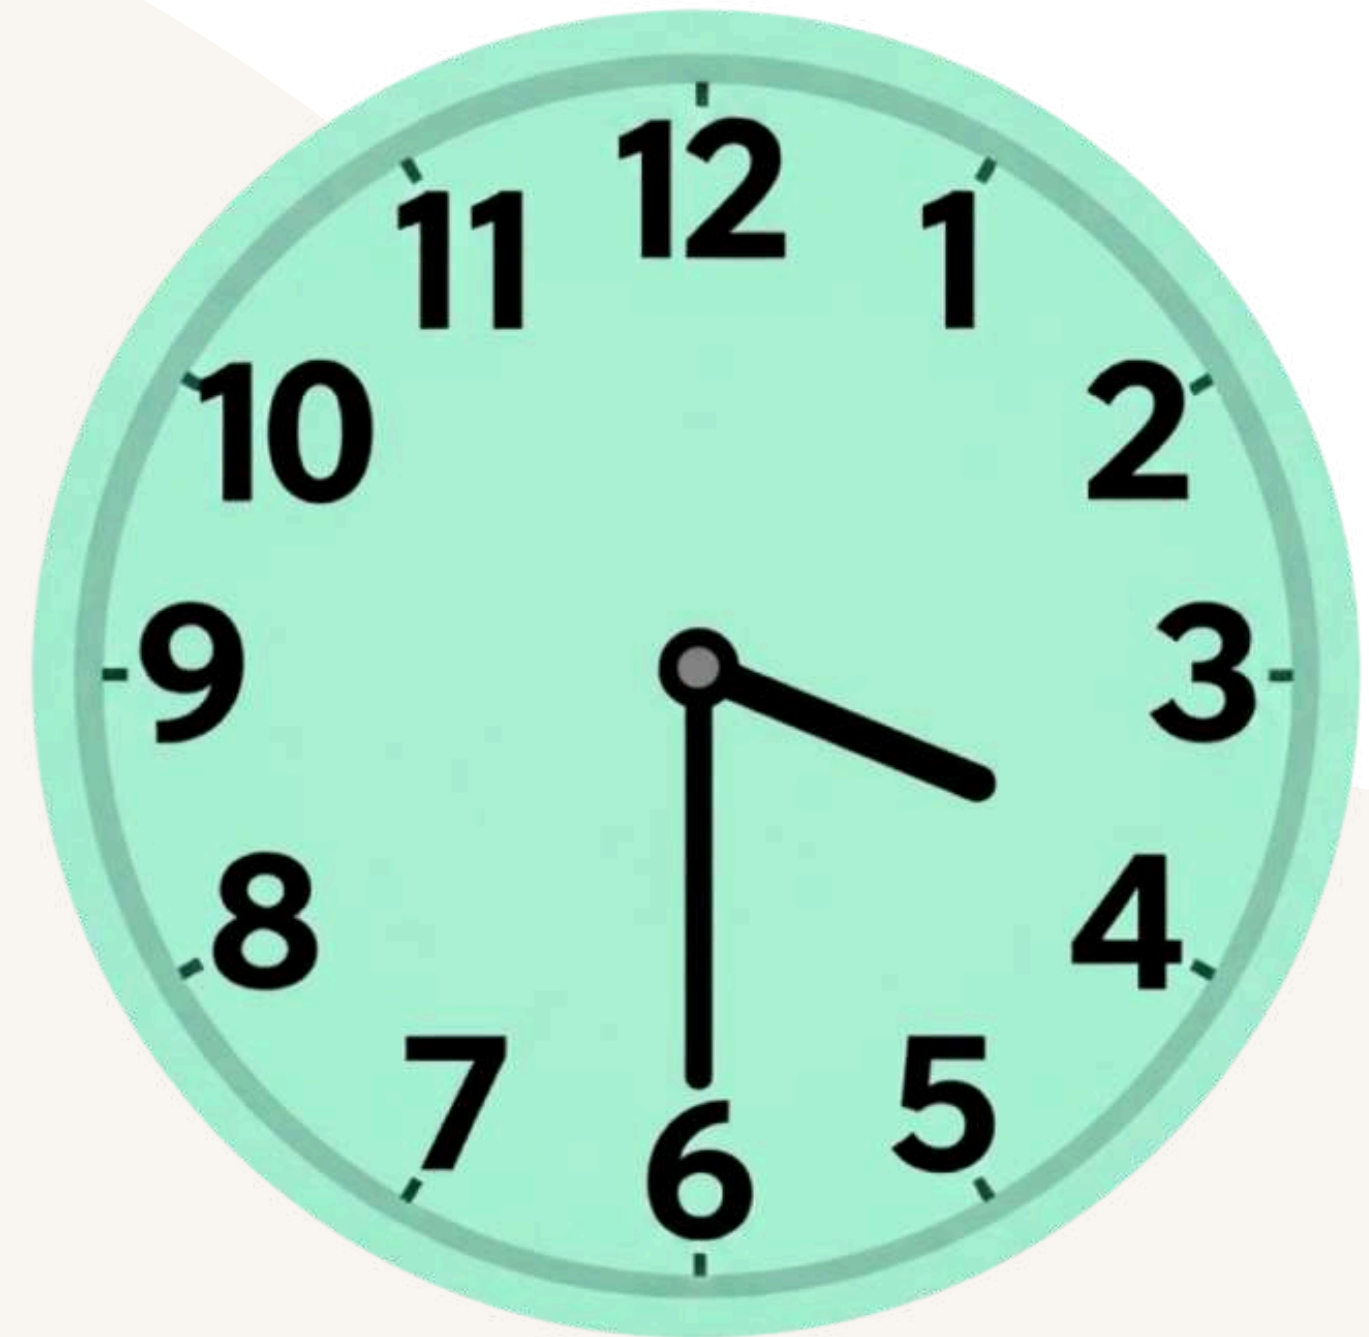

The short hand moves slowly around the clock. When it points exactly to a number, we say that number "o'clock"!

READING HALF PAST

HALF PAST

When the long hand points to 6, it is half past the hour. Look at the clock - the short hand is between 3 and 4, and the long hand points to 6. This means it is half past 3, or 3:30!

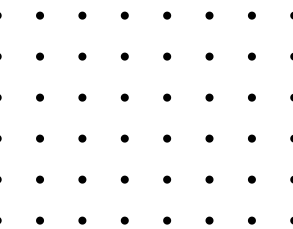

3:30

QUARTER PAST & QUARTER TO

UNDERSTANDING QUARTER TIME

Quarter past means 15 minutes after the hour. Quarter to means 15 minutes before the hour. Look at the long hand - when it points to 3, it's quarter past. When it points to 9, it's quarter to!

TELLING TIME

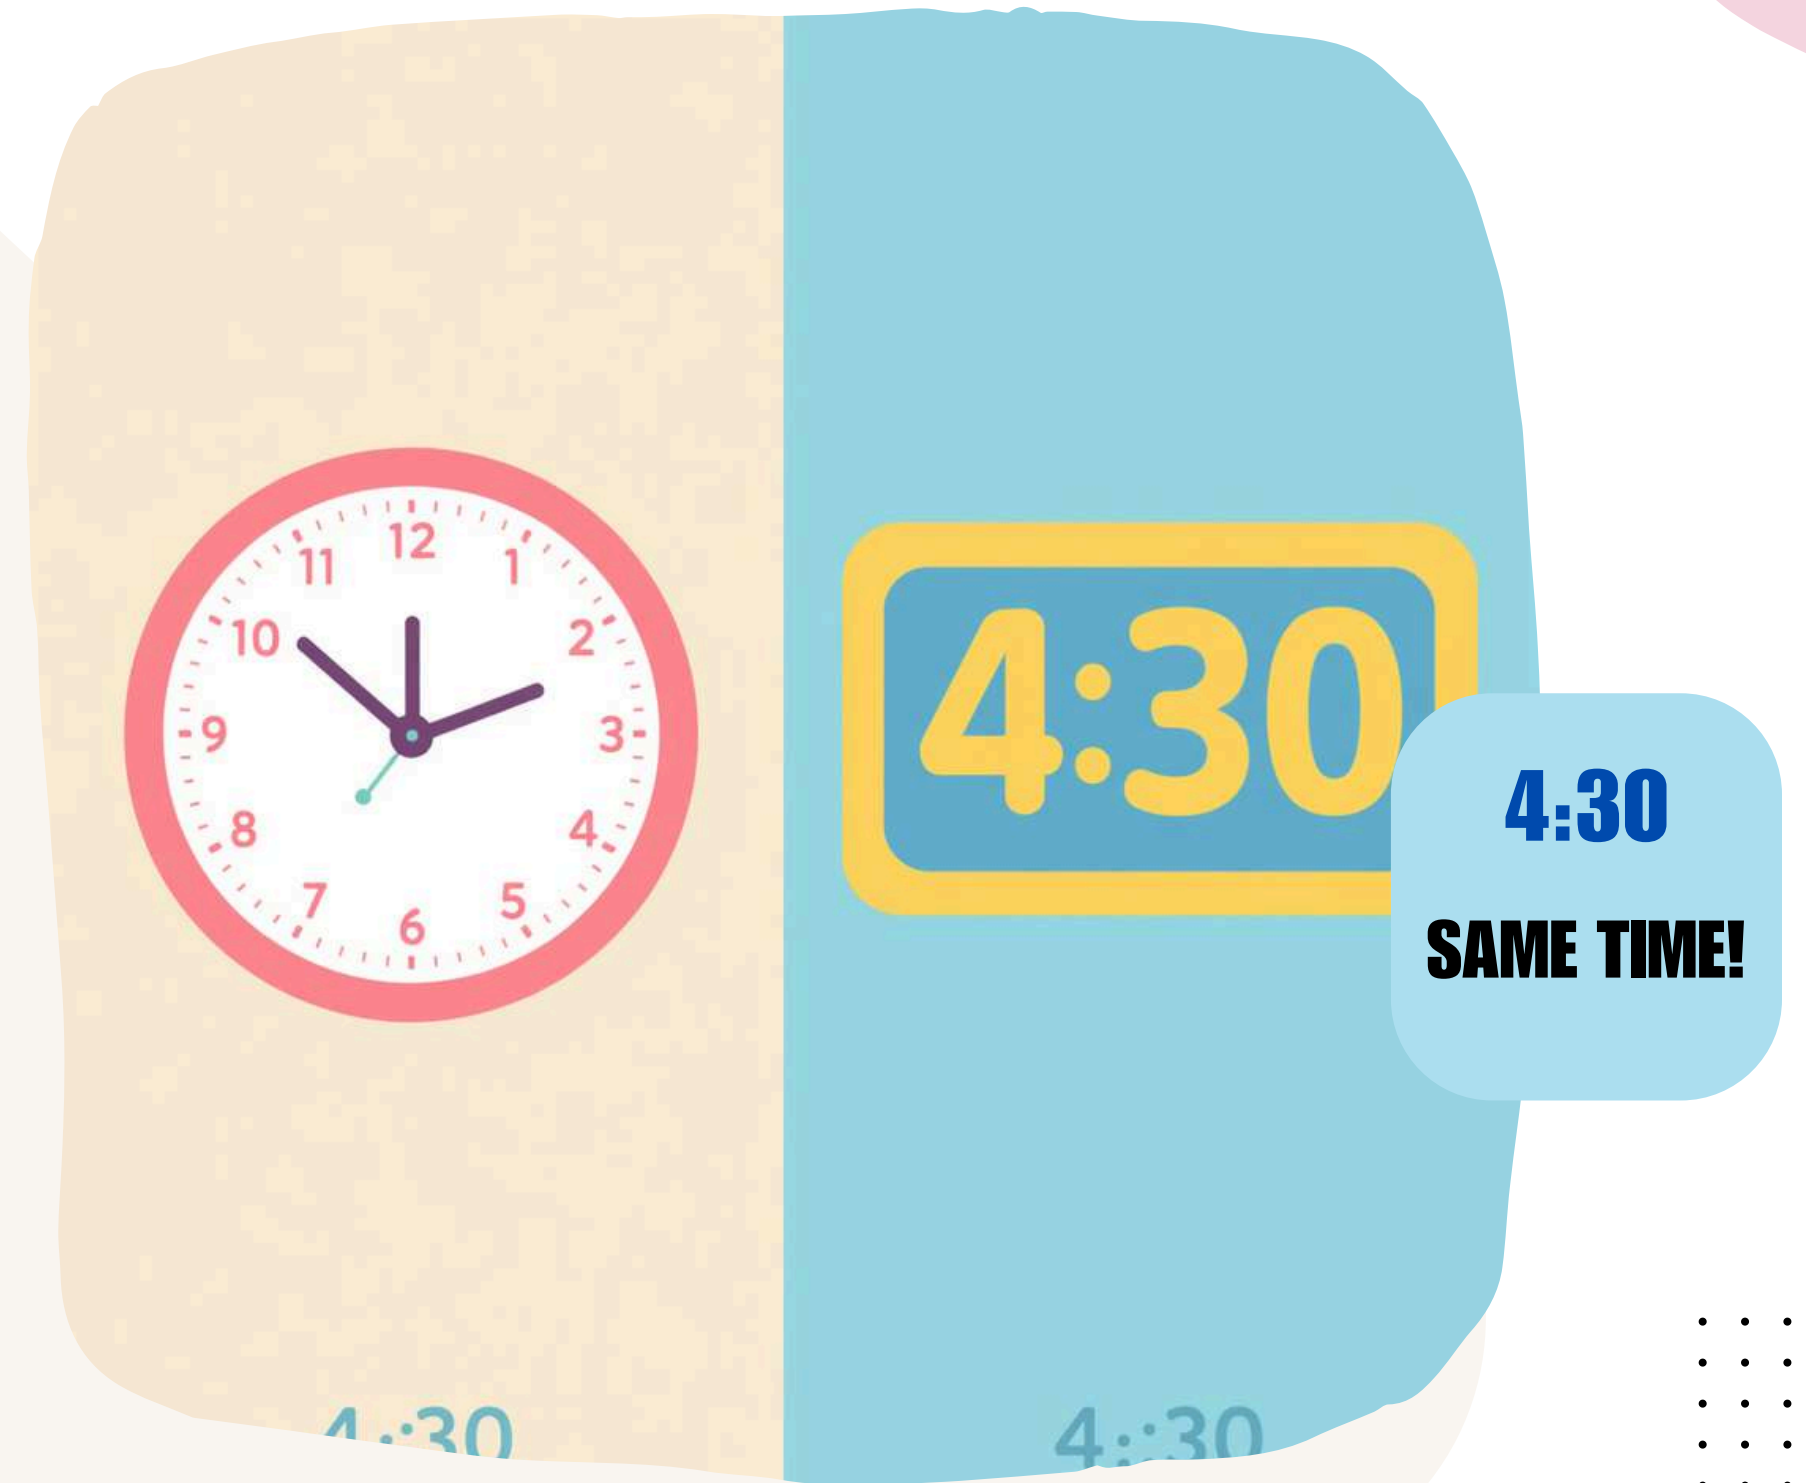

DIGITAL VS ANALOG CLOCKS

Analog Clock: Has a round face with numbers 1-12, hour hand (short), and minute hand (long). You read time by looking at where the hands point.

Digital Clock: Shows time with numbers on a screen. Easy to read! Just look at the numbers shown, like 4:30.

TIME VOCABULARY

Learning these time words will help you read clocks easily! Each word tells us something special about where the clock hands are pointing.

☑ **O'CLOCK, HALF PAST, QUARTER PAST**

☑ **QUARTER TO, MINUTES, HOUR**

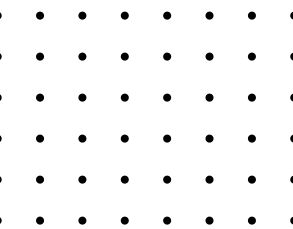

**PRACTICE
ACTIVITY**

MATCH THE TIME

Look at each clock carefully. Can you match these clocks to the correct time words?

- O'clock
- Half past
- Quarter past
- Quarter to

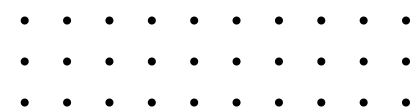

TELLING TIME IN DAILY LIFE

CLOCKS ARE EVERYWHERE!

We use clocks every day to help us stay on time! From the moment we wake up to when we go to sleep, clocks guide our day.

Look around you - school bells, kitchen timers, wristwatches, and alarm clocks all help us know what time it is!

TELLING TIME

KEY TIPS FOR TELLING TIME

Here are some helpful hints to remember when reading a clock. Practice these tips every day and you will become a time-telling expert!

- ☒ **LOOK AT THE SHORT HAND FIRST (HOUR)**
- ☒ **CHECK THE LONG HAND FOR MINUTES**

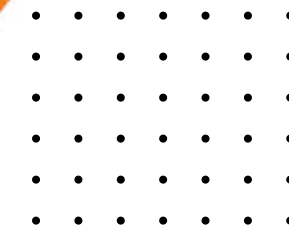

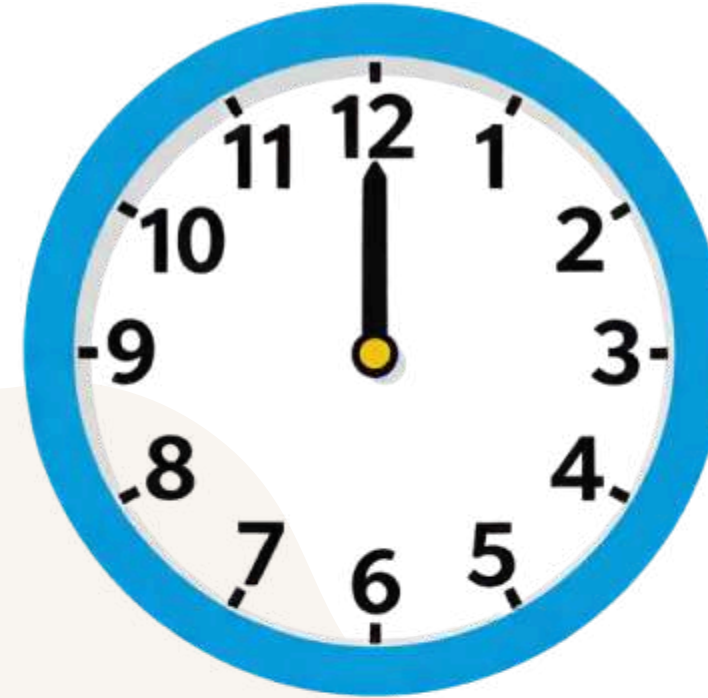

QUICK QUIZ

WHAT TIME IS IT?

Look at each clock carefully. What time do you see on each clock? Write your answers or share with your teacher!

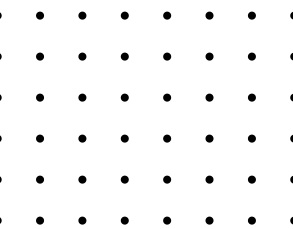

TIME TO LEARN

RECAP: WHAT WE LEARNED

- ☑ Parts of the clock: hour hand, minute hand, and clock face with numbers 1-12
- ☑ How to read hour, half past, quarter past, and quarter to times

100%
READY!

TELLING TIME

LET'S PRACTICE MORE!

Keep practicing telling time every day! The more you practice reading clocks, the better you will get. Try looking at clocks at home, at school, and everywhere you go. Soon you will be a time-telling expert!
