

TAXES — WHAT ARE THEY AND WHY DO WE PAY THEM?

Let's Think About Money!

Have you ever bought something?
Where does the money go?
Think about the last time you went shopping
with your family!

What Is Money For?

- Buying things we need and want
- Helping families and friends
- Paying for things that help everyone

What Are Taxes?

Taxes are money that people pay to the government. When adults earn money from their jobs or buy things at shops, they give a small part of that money to the government. This is called paying taxes!

This money helps everyone in the community! The government collects taxes from many people and uses it to do good things for all of us — like building schools, making roads, and keeping everyone safe and healthy.

Why Do We Pay Taxes?

To build schools where children like you can learn, play, and grow with your friends every day!

To fix roads so buses, cars, and bikes can travel safely and take people where they need to go!

To keep parks clean for playing and to help hospitals take care of people when they are sick!

Who Pays Taxes?

- Adults who work and earn money pay taxes from what they earn. This is called income tax.
- People who buy things in shops also pay a small tax. This is called sales tax and is added to the price!

How Do Taxes Help Us?

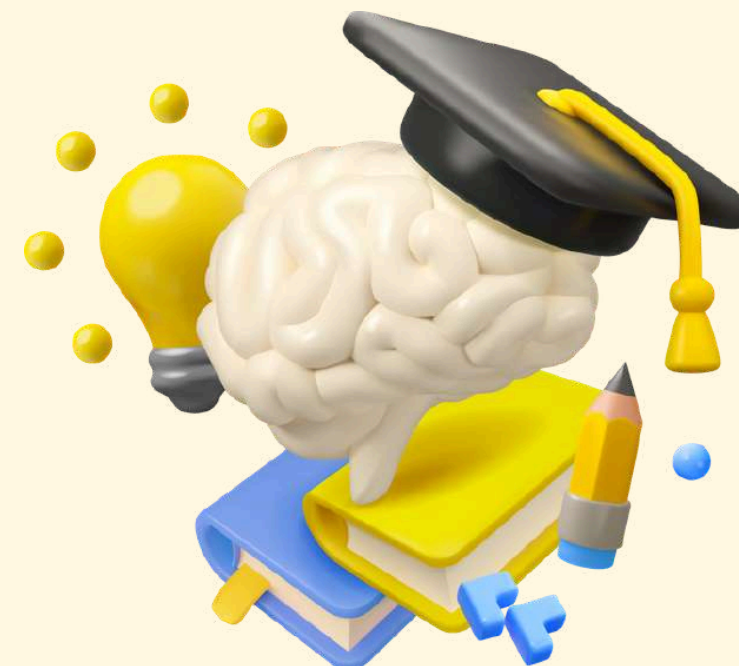

Clean water for drinking — Taxes help bring safe, clean water to our homes and schools so we can stay healthy and strong!

Street lights for safety — Taxes pay for bright lights on our streets so everyone can walk safely at night!

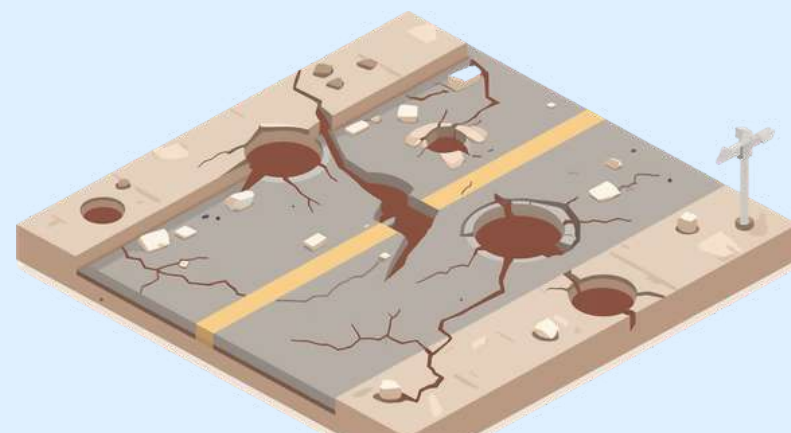

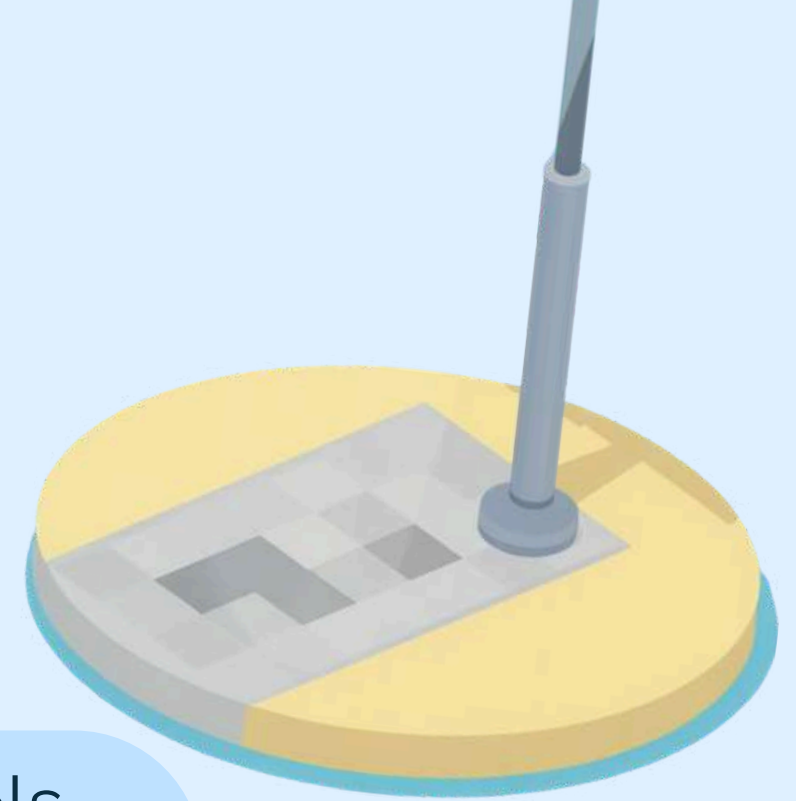

Buses and trains to travel — Taxes help run buses and trains so families can go to school, work, and visit loved ones!

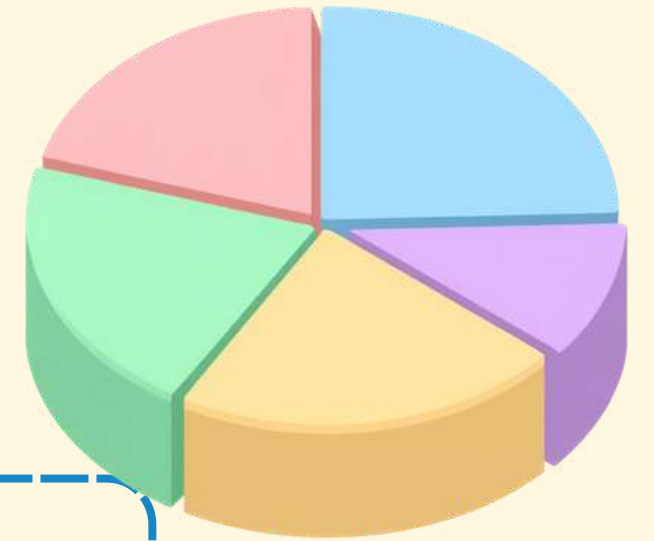

What Happens Without Taxes?

Before Taxes: Broken roads with potholes, no street lights at night, empty schools with no teachers or books.

After Taxes: Smooth repaired roads for safe travel, bright street lights keeping us safe, happy schools full of children learning!

Where Does Tax Money Go?

The government uses tax money to pay for many things that help everyone!

- Schools — where you learn and grow
- Roads — so cars and buses can travel safely
- Hospitals — to keep people healthy
- Parks — for playing and having fun
- Police — to keep our community safe

Taxes in Our Daily Life

Look around you! Many things we use every day are paid for by taxes. Markets have safe spaces, school buses take children to learn, hospitals help sick people get better, and playgrounds give us places to have fun!

How Do We Pay Taxes?

Income Tax: When adults work and earn money, they pay some of it as tax to the government. This helps pay for schools and hospitals!

Sales Tax: When we buy something from a shop, a small part of the price goes to the government as tax. That's why prices include tax!

Service Tax: When we use electricity, water, or phone services at home, some of that bill is tax money that helps keep these services running!

Taxes Help Build Our Future

Taxes help build schools where you learn new things every day. They pay for your classrooms, books, and the teachers who guide you. Education makes our future bright!

Taxes keep our streets safe and clean for everyone. They also help people who need care and support. When we all share, everyone can live better together!

Fun Quiz Time!

Can you guess what taxes help pay for? Look at the choices below and think about which ones the government pays for with tax money!

Choose the correct answers:

- School 🏫
- Ice cream truck 🍦
- Road 🛣️
- Toy store 🧸

What Can You Do?

Learn About Money and Taxes
Ask your parents how they pay for things. Watch how shops give receipts. Notice the prices of items you buy. Learning about money helps you understand the world!

Respect Community Helpers
Say thank you to teachers, police, and doctors. Keep your school and neighbourhood clean. Ask questions about how your town works. You can help make your community better!

Let's Help Our Community!

We can all help make our community better!
Even small actions matter:

- Keeping our neighbourhood clean
- Planting trees and flowers
- Helping our friends and neighbours
- Taking care of shared spaces

When we work together, our community becomes a happier place for everyone!

Thank You!

Thank you for learning about taxes!
Keep asking questions and sharing what you learn.
