

SUBTRACTION PUZZLES — LET'S SOLVE THE MYSTERY!

THE MYSTERY OF MISSING GULAB JAMUNS

A Sweet Puzzle to Solve!

Ramu made 20 delicious gulab jamuns for his family. But wait — some disappeared mysteriously! Can you help find out how many are left?

Put on your detective hat and help Ramu solve this mystery!

WHAT IS SUBTRACTION?

Subtraction means taking away or finding how many are left. Example: Priya had 15 laddoos. Gave 6 to Raju. How many left? $15 - 6 = 9$

Minus — The symbol that shows we take away

Take Away & Less — Words that mean subtract

Difference & Remaining — What is left after subtracting

PARTS OF A SUBTRACTION SENTENCE

Every subtraction problem has special parts!
Let's learn their names so we can solve any puzzle.

Minuend: The BIG number
you start with!

Difference: What is left
— the answer!

Subtrahend: The number
taken away.

Example: $18 - 5 = 13$. Arjun
had 20 marbles. Lost 7.
How many remain?

PUZZLE TYPE A — MISSING DIFFERENCE

$$18 - 5 = ____$$

Meena had 18 rotis. She served 5 rotis to her family. How many rotis are left? Find the missing difference!

You can find the missing difference!

PUZZLE TYPE B — MISSING SUBTRAHEND

Medium Challenge!

Example: $20 - \underline{\quad} = 13$

Rahul had 20 rupee coins. He spent some at the shop. Now he has only 13 coins left. How many rupees did he spend?

Think backwards to find the missing number!

PUZZLE TYPE C — MISSING MINUEND

$$____ - 6 = 10$$

Sunita had some mangoes. Gave 6 away.
Now has 10. How many did she have at first?
This is the trickiest puzzle type!

**Use your puzzle skills to find
the start!**

REVERSE THINKING — ADDITION HELPS!

Think Backwards!

If subtraction takes away, addition can help find the missing piece. Use this trick to solve tricky puzzles!

Story: Amma bought bananas. Gave 8 to guests. 12 left.
How many did she buy? $12 + 8 = 20$ bananas!

USING THE NUMBER LINE TO SOLVE PUZZLES

Hop Backward to Subtract!

Hop backward on the number line to subtract! Imagine jumping back step by step.

Start at 15, hop back 4,
land on 11 $\rightarrow 15 - 4 = 11$

GUIDED PRACTICE — LET'S SOLVE TOGETHER!

Can you find the missing numbers? Let's solve these three puzzles together!

Type A: $25 - 8 = \underline{\quad}$

Type B: $35 - \underline{\quad} = 18$

Type C: $\underline{\quad} - 9 = 15$

STORY PROBLEM CHALLENGE

Chotu had 30 pens in his dukaan. He sold some pens to customers. Now he has only 14 pens left. How many pens did Chotu sell?

Equation: $30 - \underline{\quad} = 14$

Can you figure it out?

QUICK QUIZ — YOU ARE A MATHS DETECTIVE!

Wow, you're doing great! Let's check your answers together and see how many mysteries you solved!

1. What is the difference? $42 - 15 = \underline{\quad}$

2. Fill the blank: $40 - \underline{\quad} = 25$

3. Find the missing minuend: $\underline{\quad} - 12 = 20$

YOU CRACKED THE MYSTERY!

Fantastic puzzle solvers! You found all the missing numbers! You used your detective skills to solve every type of subtraction puzzle — missing differences, missing subtrahends, and even missing minuends!

**Great thinking! You're
maths detectives!**

SEE YOU NEXT TIME!

Next session: More fun with subtraction puzzles and games! We will explore exciting new challenges together!

**KEEP PRACTICING
AND SEE YOU SOON!**
