

MY DYNAMIC DIGITAL FESTIVAL CARD

LOOK WHAT WE'LL MAKE TODAY!

Get ready to build something truly magical! We are going to create a glowing Digital Diwali Card using HTML, CSS, and JavaScript. Your card will light up, show a special message, and sparkle with festive colours — just like real Diwali fireworks!

By the end of today, you will have your very own interactive card to share with your family and friends.

"Let's create a card that glows and celebrates Diwali! ✨🪔"

THE MAGIC OF WEB CRAFTING

HTML, CSS, and JavaScript each play a special role — just like things you know and love at festivals!

🪁 HTML = Kite (Patang) — the frame and structure of your card

🎨 CSS = Rangoli colors — painting your card bright and beautiful

✨ JS = Fairy lights switch — making your card come alive with magic!

LET'S START WITH THE KITE FRAME (HTML)

Build Your Card Structure!

-  Find the `<h1>` tag.
-  Replace the sample name with your own.
-  Keep both the opening and closing `<h1>` tags.
-  Save the file to see your heading appear.

Remember: Always close your HTML tags correctly!

PAINTING OUR CARD (CSS)

Pick Your Favourite Color!

- 🎨 Find the body selector.
- 🖌️ Change the background-color value.
- 💾 Save the file to see the change.
- ✨ Try different colors to create your own festival theme!

- `body { background-color: gold; }`
- `body { background-color: crimson; }`
- `body { background-color: orange; }`

BLOCK 1 WRAP-UP: OUR BEAUTIFUL CARD SO FAR

- ✓ Added a title using HTML
- 🎨 Styled the card with CSS
- 🌈 Chose a colorful background
- 👁️ Previewed the card after saving

**Great job! Your festival card is taking shape.
Next, we'll bring it to life with JavaScript!**

BREAK TIME & BUG HUNT!

🔍 Spot the bug in the HTML code!

💡 Hint: Something is missing in the closing tag.

🔧 Fix the missing > symbol.

💾 Save the file and check the preview.

✅ Even a tiny typo can affect your code!

Debugging helps you find and fix coding mistakes.

FLICK THE FAIRY LIGHTS SWITCH!

JavaScript Magic ✨

- ⚡ Create the showMessage() function.
- 📝 Add your festive greeting inside alert().
- 🔗 Connect the button using onclick.
- 💾 Save the file and click the button!
- 🎉 Watch your greeting pop up!

JavaScript brings your webpage to life with interactivity!

CUSTOMIZE YOUR CARD!

Now it's your turn to make your Diwali card truly unique! Use your creativity to make it shine bright and special. ✨

Change the greeting text to your own words!

Pick your favorite background and text colors.

Add emojis or Diwali symbols like 🪔 🎆 ✨

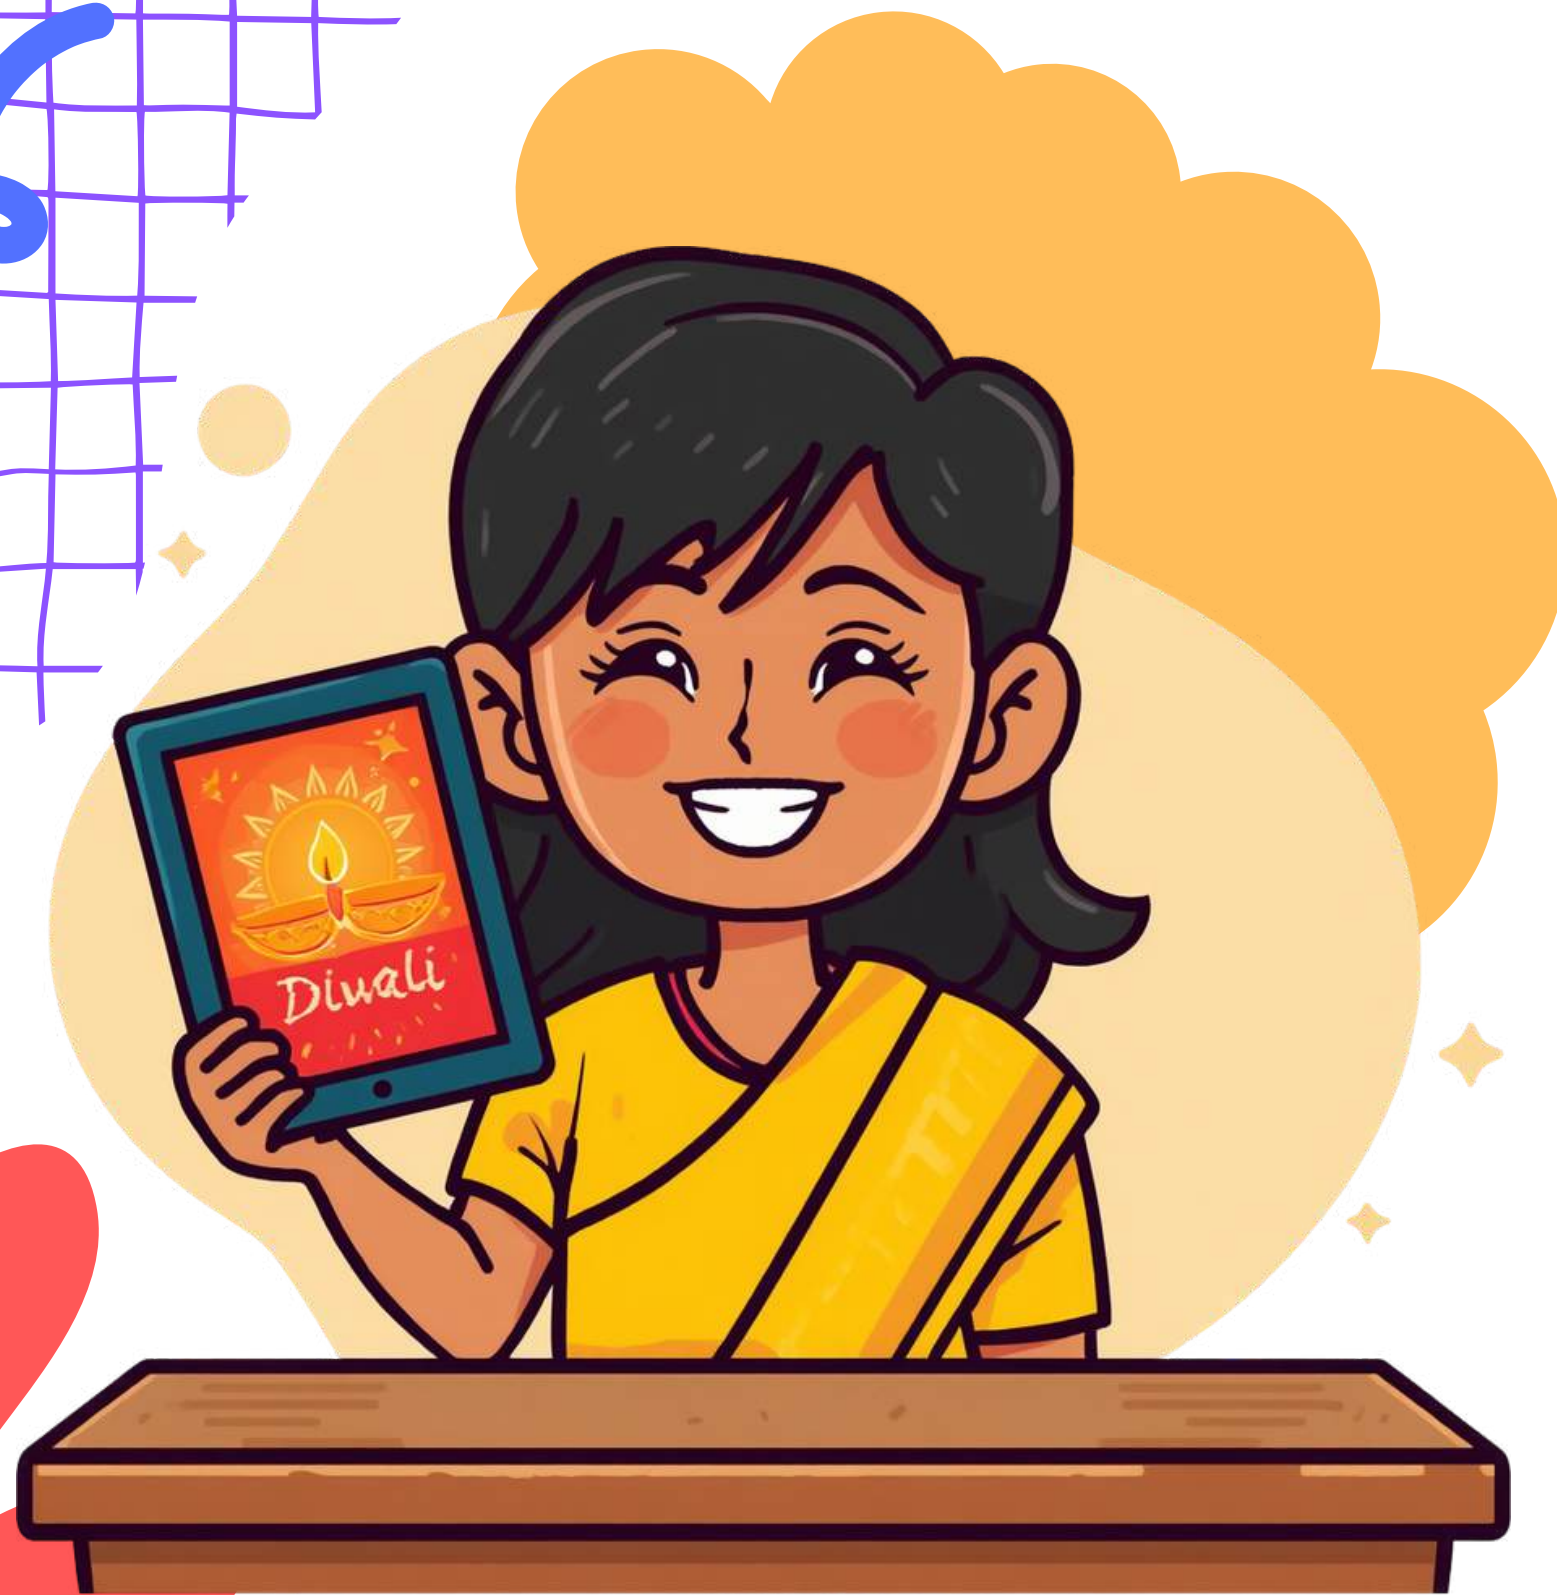

SHOW & TELL TIME!

You did it! You built your very own Dynamic Digital Festival Card using HTML, CSS, and JavaScript. Now it's time to share your amazing creation with the people you love. Show your glowing Diwali card to your family and friends. Tell them how you made it shine!

"Show your dynamic card to your family – you are a web creator now!"

WHAT WE LEARNED TODAY!

Amazing work, coders! Today you explored the magic of web crafting and built your very own Dynamic Digital Festival Card. Look at everything you can do now!

Identify the roles of HTML, CSS, and JavaScript in a webpage.

Edit text and background colors to make your card bright and beautiful.

Create your own unique Diwali festival greeting card!

Use a magic JavaScript switch to make your card interactive!

YOUR DIGITAL CRAFTING TOOLBOX

Key Words to Remember!

Every web crafter needs to know these magical words. Use them when you code your Diwali card and impress everyone!

- 🪁 Kite (Patang) = HTML – the frame and structure of your card.
- 🎨 Rangoli Colors = CSS – painting your card bright and beautiful.
- ✨ Fairy Lights = JavaScript – the magic switch that makes it alive.
- 🕷️ Tiny Typo Spider = small code mistakes to watch out for!

NEXT STEPS: KEEP CREATING!

You are now a web crafter! Keep exploring and building more amazing things with HTML, CSS, and JavaScript.

Try building cards for Holi, Eid, or your birthday!

Share your card link with friends and family.

Keep exploring new colors and magic switches!

THANK YOU & HAPPY DIWALI!

Shine Bright This Diwali!

Thank you for crafting with us today! You built an HTML frame, painted it with CSS, and lit it up with JavaScript magic. Keep creating and keep shining!
