

MY FIRST WEATHER JOURNAL

Becoming a Junior Meteorologist 🌞☁️💨

Explore the Wonders of Mausam Around Us! 🌍

Look Out of the Window! 🪟

Let's look outside together right now! What do you see up in the sky? 👁️

Is the big bright sun smiling down at you? Are fluffy clouds playing hide-and-seek? Or can you spy the green leaves dancing around on the trees? All of this magic is called **Weather** (Mausam), and it surrounds us every single day!

What is Weather?

Weather is simply how the **sky and the air** feel around your house right this minute!

Weather Can Change!

In a big city like Delhi, the early morning can feel super chilly, crisp, and foggy. But by afternoon, the sun wakes up completely and turns the whole day warm, cozy, and bright! Weather changes its mood all the time!

 Cold Mornings +  Warm Afternoons = The Changing Weather!

Meet Suraj Chacha! ☀️

When the sky is completely clear and the air gets super hot, you are hanging out with **Sunny Weather!**

Hot, Bright Days! 🔥

During the month of May in Chennai, Suraj Chacha shines down with giant energy. The weather gets very hot! To stay cool and happy, people wear light cotton t-shirts and love drinking sweet, refreshing **tender coconut water!**

Meet Megha Cloud!

Have you ever looked up and noticed the bright sun is completely hiding?
That is **Cloudy Weather**!

The Great Sun Blocker!

Cloudy weather means the sky is packed full of soft grey or white cloud shapes. On beautiful October afternoons in Bengaluru, these cool cloud blankets block out the hot sunrays, making the whole outdoor playground nice, mild, and comfy!

Meet Bijli & Boond!

When heavy dark clouds roll in and wet water droplets splash onto your nose, you are experiencing **Rainy Weather!**

Splish, Splash, Splosh!

During monsoon season in Mumbai, the clouds open up with heavy rains! It's time to splash in puddles, zip up your protective raincoats, and pop open your giant, colorful umbrellas to stay dry!

Meet Pavan the Wind! 🌬️

Can you hear a soft "*Whoosh*" sound? When the air all around us starts running super fast, you are meeting **Windy Weather!**

Dancing Trees & Flying Kites! 🪁

In a breezy city like Pune, cool winds arrive to make whole tree branches sway, bend, and dance! These friendly winds are perfect for helping young children launch colorful paper kites high up into the open sky.

Game: Move Like the Weather!

Let's get out of our chairs and play a fun active game! Can you use your body to copy the weather patterns? Let's try!

 **Shiver & Shake:** Pretend you are standing in a chilly, cold rain shower!

 **Fan Yourself:** Wipe your forehead like you're under a blazing hot summer sun!

 **Sway Back & Forth:** Raise your arms and wave like a tree in a windy storm!

Meet the Weather Scientists!

Did you know there are real science heroes who study the sky every morning? They have a wonderful title: **Meteorologists!**

Sky Detectives!

A meteorologist uses special tools like giant radars, outdoor wind meters, and computer charts to predict if it will rain, blow, or shine. Today, you are going to put on your science hat and become a **Junior Meteorologist** by starting your own journal!

Create Your Weather Journal!

To track the sky like a true scientist, take a blank notebook page and draw a clean **4-Quadrant Grid** split into four neat squares:

 SUNNY BOX Draw a happy yellow sun here!	 CLOUDY BOX Draw thick, puffy cloud cushions!
 RAINY BOX Draw clouds with splashing drops!	 WINDY BOX Draw swooping lines and a swaying tree!

What to Wear & Eat? 🌽

Our daily outfits and snacks always match the weather mood outside! Let's explore what choices you should make:

☀️ **On Sunny Days:** Slip into a light cotton t-shirt and crunch on sweet, cold watermelon slices!

🌧️ **On Rainy Days:** Put on your slick raincoat and enjoy warm, roasted corn-on-the-cob (Bhutta)!

☁️💨 **On Cloudy/Windy Days:** Wrap up in a light sweater and sip on a comforting mug of warm milk!

Pop Quiz Time!

What is the scientific name for a clever sky detective who studies and tracks the weather?

(A) A Train Conductor 

Hint: Train conductors manage train stations, they don't study clouds or weather!

(B) A Meteorologist! 

Incredible! Meteorologists are the sky scientists who read the air and weather patterns!

(C) An Ocean Diver 

Hint: Ocean divers swim deep down under the sea water, not high up with the wind!

Your Weekly Weather Mission!

Here is your grand science mission! Look out your window every morning before heading off to school for the next few days. Track the weather pattern below:

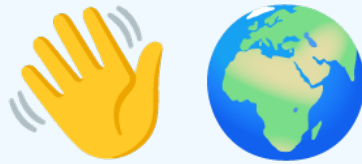

DAY 1 [Draw weather here]	DAY 2 [Draw weather here]	DAY 3 [Draw weather here]	DAY 4 [Draw weather here]
DAY 5 [Draw weather here]	DAY 6 [Draw weather here]	DAY 7 [Draw weather here]	DONE! 🎉 Mission Complete!

Junior Sky Scientist!

Hip, hip, hooray! You have officially unlocked your very own
Junior Meteorologist Badge!

☀️ You can read the clouds, match your snack clothes, and map the
daily sky! ☀️

Keep Looking Up!

Thank you for exploring the windy paths and bright sun rays with us today! Keep your eyes on the clouds and stay curious about the changing seasons around you.

Happy Sky Watching, Young Explorer! ✨
