

3D Shape Build Challenge

Planrs Academy

Learn, Build, and Have Fun with 3D Shapes!
Let's explore spheres, cubes, cuboids, cones and cylinders!

Round Orange

A perfectly round orange sitting on the table - no corners anywhere!

Steel Tumbler

A shiny steel tumbler for Tea - round at top and bottom!

Biscuit Box

A rectangular biscuit box with flat sides and corners!

The Shape Hunt in Ramesh's Kitchen

Let's go on a shape hunt today!

Ramesh from Chennai is helping set the breakfast table. He sees so many interesting shapes around him! Can you spot them too?

Objective 1

Recognise and name 5 common 3D shapes

Objective 2

Describe what each shape looks and feels like

Objective 3

Match shapes to real Indian objects around us

Learning Objectives

What We Will Learn Today!

Get ready to become a 3D Shape Champion! By the end of this session, you will be able to identify, describe, and build with amazing 3D shapes all around you.

Properties

Curved surface only, rolls everywhere, no edges, no corners

Indian Examples

Laddoo, Cricket ball, Orange

More Examples

Marble, Coconut

Meet Shape 1: Sphere

Perfectly Round with No Flat Parts!

A sphere is perfectly round like a ball! It has only a curved surface, no edges, and no corners. It can roll in any direction!

Properties

6 flat square faces, 12 edges,
8 corners – all faces are
equal!

Indian Examples

Dice , sugar cubes , ice cube

More Examples

Rubik's Cube, small gift boxes
– find cubes around you!

Meet Shape 2:

Cube

A Box Shape with All Sides as Perfect Squares!

A cube has 6 flat square faces, all the same size!
It has 12 edges and 8 corners.
Let's count the faces together: 1, 2, 3, 4, 5, 6!

Example 01

Tiffin box & Biscuit packet

Example 02

Brick & Mobile phone

Example 03

Diwali Box of sweets

Meet Shape 3:

Cuboid

A Box Shape Like Cube But Stretched!

A cuboid is a box shape with faces that are rectangles or squares. It has 6 flat faces, 12 edges, and 8 corners. Think of your tiffin box!

Properties

1 flat circular face (base), 1 curved surface, 1 pointed vertex (apex)

Indian Examples

Ice-cream cone, Party hat (topi), Traffic cone

More Examples

Shankha (conch shell tip), Cone-shaped leaf cups

Meet Shape 4: Cone

Round flat bottom with a pointed tip at the top!

A cone has 1 flat circular face at the base, 1 curved surface wrapping around, and 1 pointed vertex called the apex at the top.

Example 01

Dholak or Tabla Drum – makes music!

Example 02

Steel Tumbler & Pressure Cooker

Example 03

Bournvita Tin & Bangle Tube Box

Meet Shape 5: Cylinder

Two round flat ends and curved surface in the middle!

Properties: 2 flat circular faces (top and bottom), 1 curved surface that wraps around, and no corners at all! It can roll and stack!

Shape Comparison Table

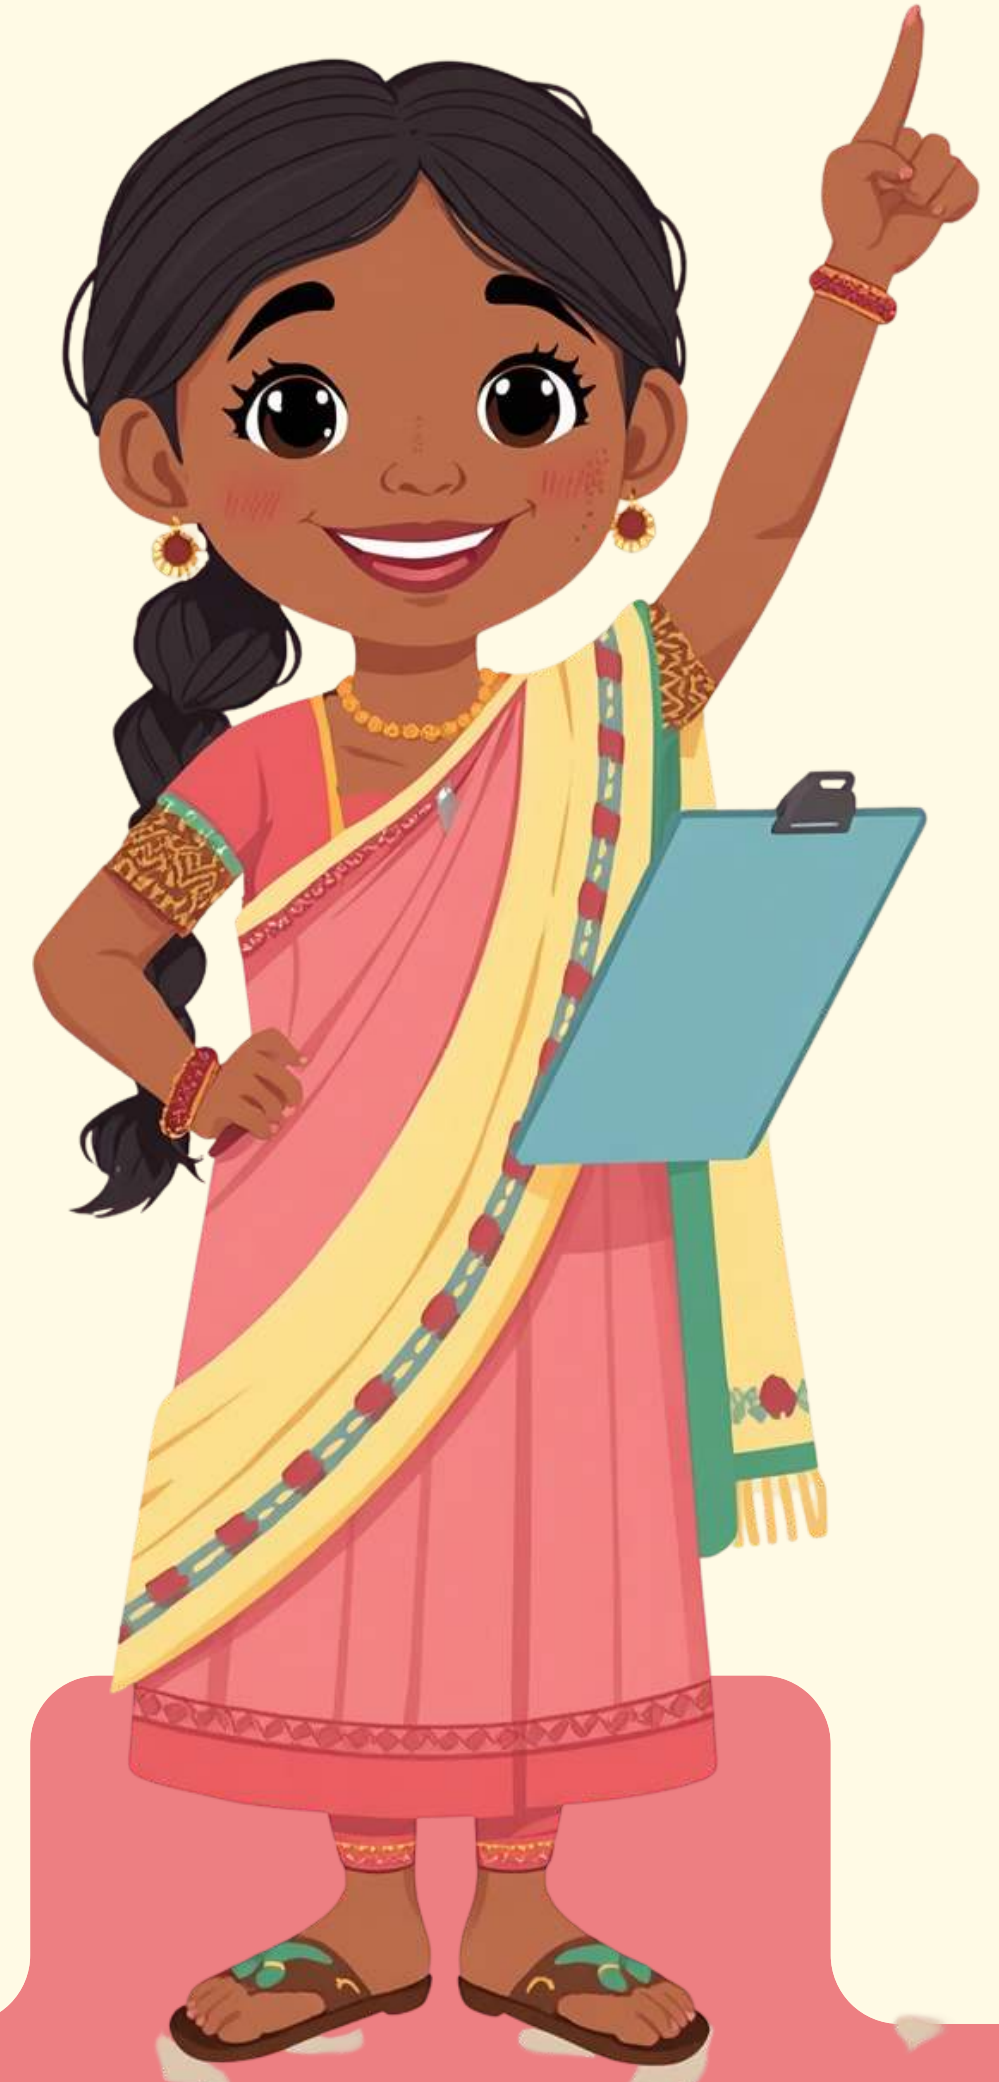

Let's Compare All 5 Shapes!

Rolling Shapes

Look at the table to see how each shape is special and different!

Stacking Shapes

Which shapes roll? Which ones stack? Let's find out together!

Round Objects

1. Cricket ball → ?
2. Orange → ?

Box Shapes

1. Parle-G biscuit packet → ?
2. Ludo dice (pasa) → ?
3. Tiffin box (dabba) → ?

Other Shapes

1. Steel water bottle → ?
2. Birthday party hat (topi) → ?
3. Dholak drum → ?

Shape Detective Game

Can You Guess the Shape? Say It Aloud!

Look at each object below and tell us what 3D shape it is! Is it a Sphere, Cube, Cuboid, Cone, or Cylinder? Let's find out together!

Step 1

Stack cuboid and cube boxes to make shelves for your shop

Step 2

Place sphere laddoos on top and arrange cone cups in a row

Step 3

Put the cylinder dholak drum at the side to complete your display

Build Your Sweet Shop!

Create Your Own 3D Shape Display

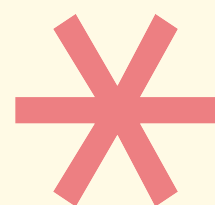

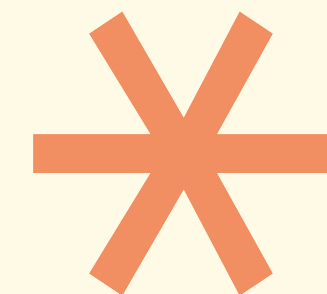

Use your shapes to build a beautiful mithai shop display! Stack boxes, arrange sweets, and make it colorful. Share your creation with the class!

Shape Song

Sing Along and Learn!

Sphere is round like my laddoo sweet,
Cube has six square faces neat,
Cuboid is like my tiffin box,
Cone points up like party hat top,
Cylinder rolls like my dholak drum —
Five 3D shapes, we know every one!

Face

Flat surface of a shape
Edge – Line where two faces meet

Corner

Point where edges meet
Flat – Smooth, level surface

Curved & More

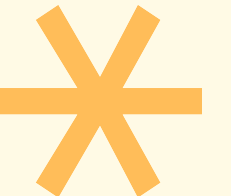

Curved – Rounded surface
Rolls – Moves by turning
Stacks – Placed on top

Key Vocabulary

Learn Important Shape Words in English

Understanding these words will help you describe and compare 3D shapes like a true Shape Champion!

Sphere & Cube

Find something ROUND with no flat face and a box where ALL faces are the same

Cuboid & Cone

Find a box with different sized faces and something with a POINT at the top

Cylinder

Find something with TWO round flat ends like a tin or tumbler!

Take-Home Activity

Find Shapes at Home!

Draw them in your notebook and share tomorrow!
Happy shape hunting, little explorers!

You Are a Shape Champion!

Today you learned 5 amazing 3D shapes, how to find them in your world, how to describe and compare them, and how to build with them! Keep looking for shapes everywhere you go!
