

Fractions

Half & Quarter

Grade 2 Maths

What is a Fraction?

A fraction is a part of a whole.

When we divide something into equal parts, each part is called a fraction.

Equal Parts Matter!

For a fraction to work, all parts must be the SAME size.

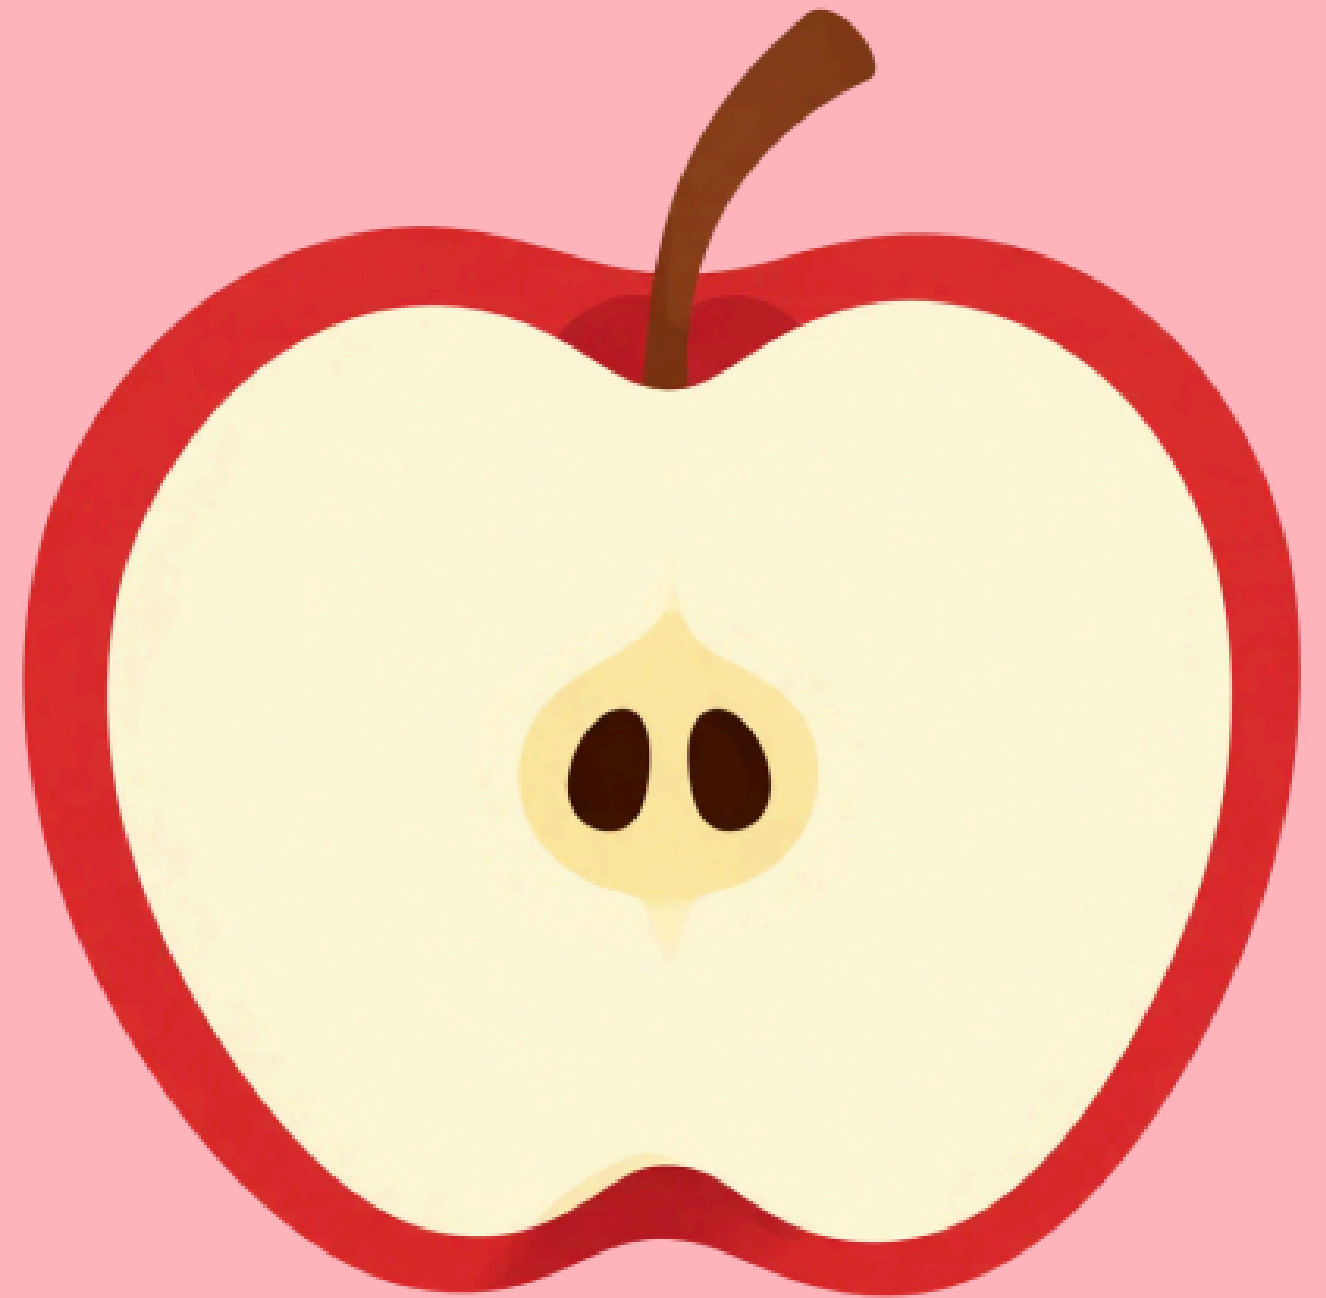

Unequal parts are NOT fractions.

What is a Half?

When we divide something into 2 equal parts, each part is called ONE HALF.

We write it as: $\frac{1}{2}$

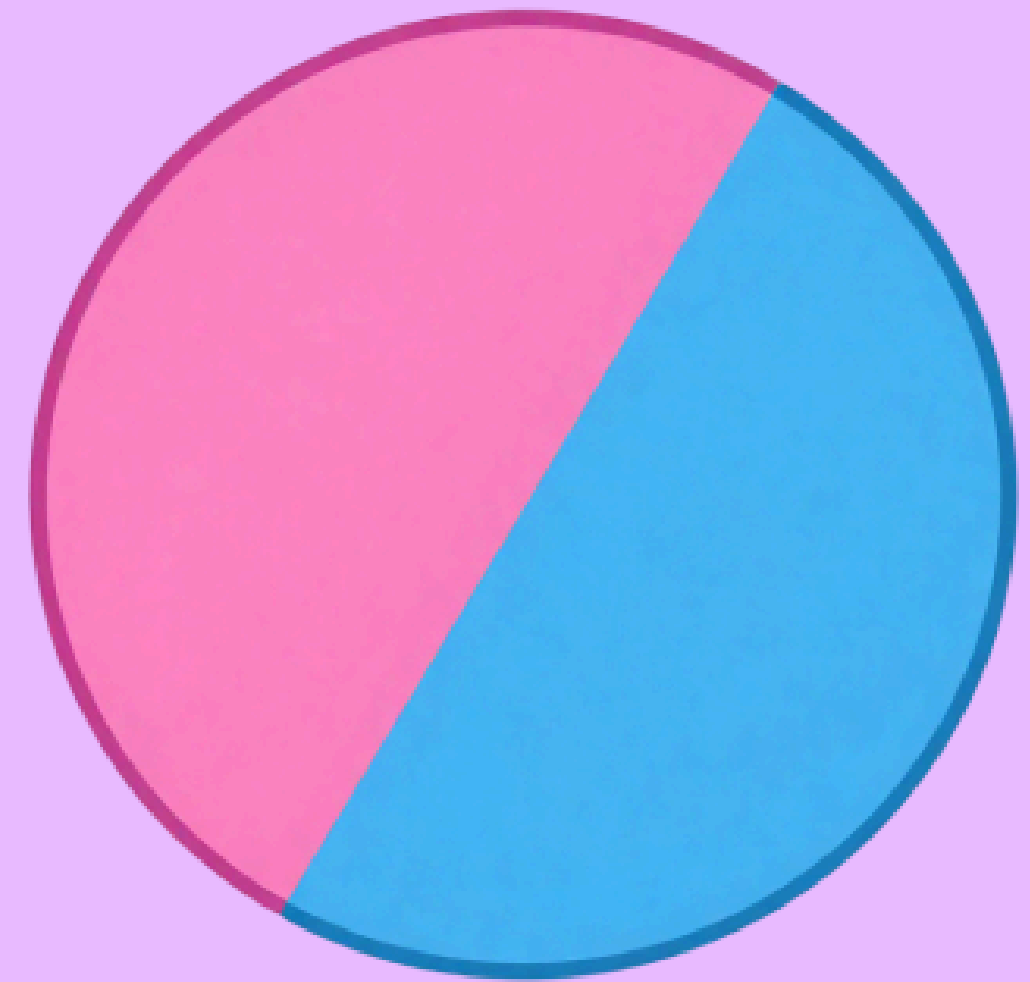

Half of a Shape

Imagine a circle cut into 2 equal pieces.

Each piece = $\frac{1}{2}$

1 out of 2 equal parts is shaded.

Half in Real Life

Half a roti

Half a glass of water

Half an apple

Half a pizza

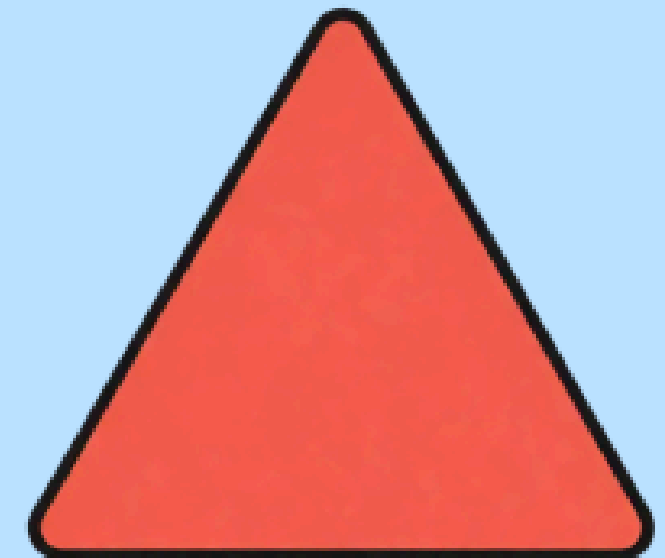

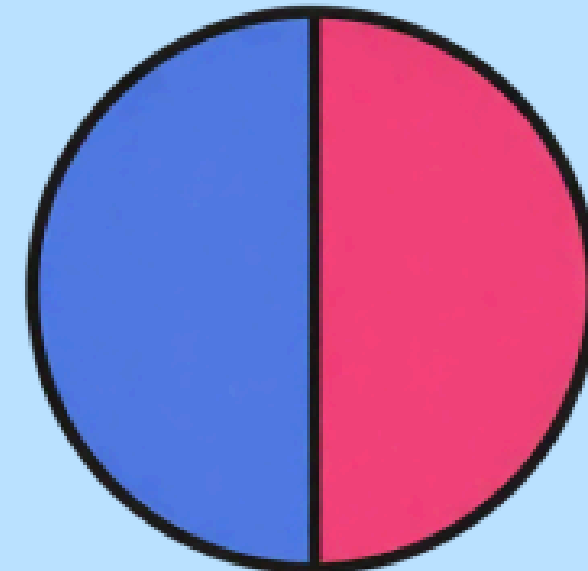

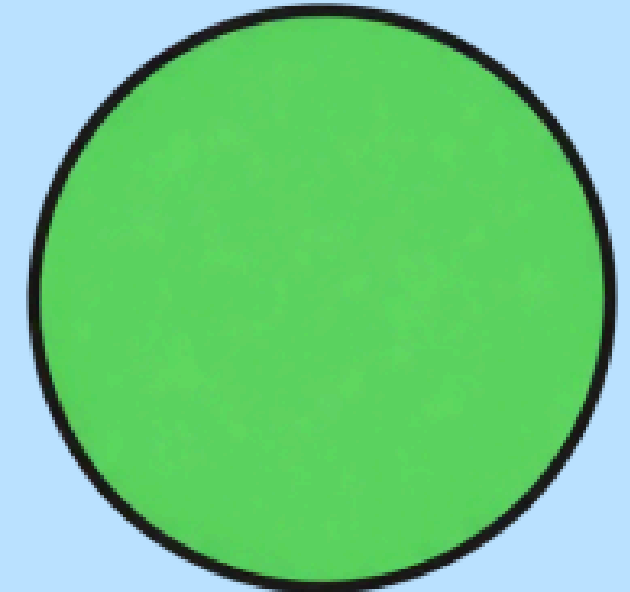

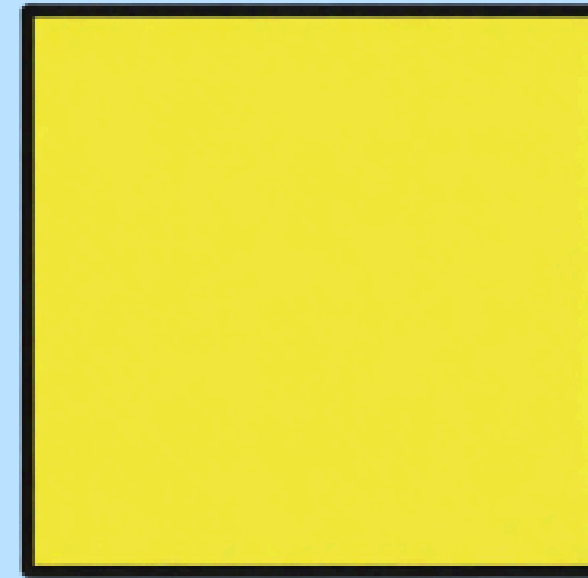

We see halves everywhere!

Let's Practice Half!

Which shapes below are divided into exact halves?

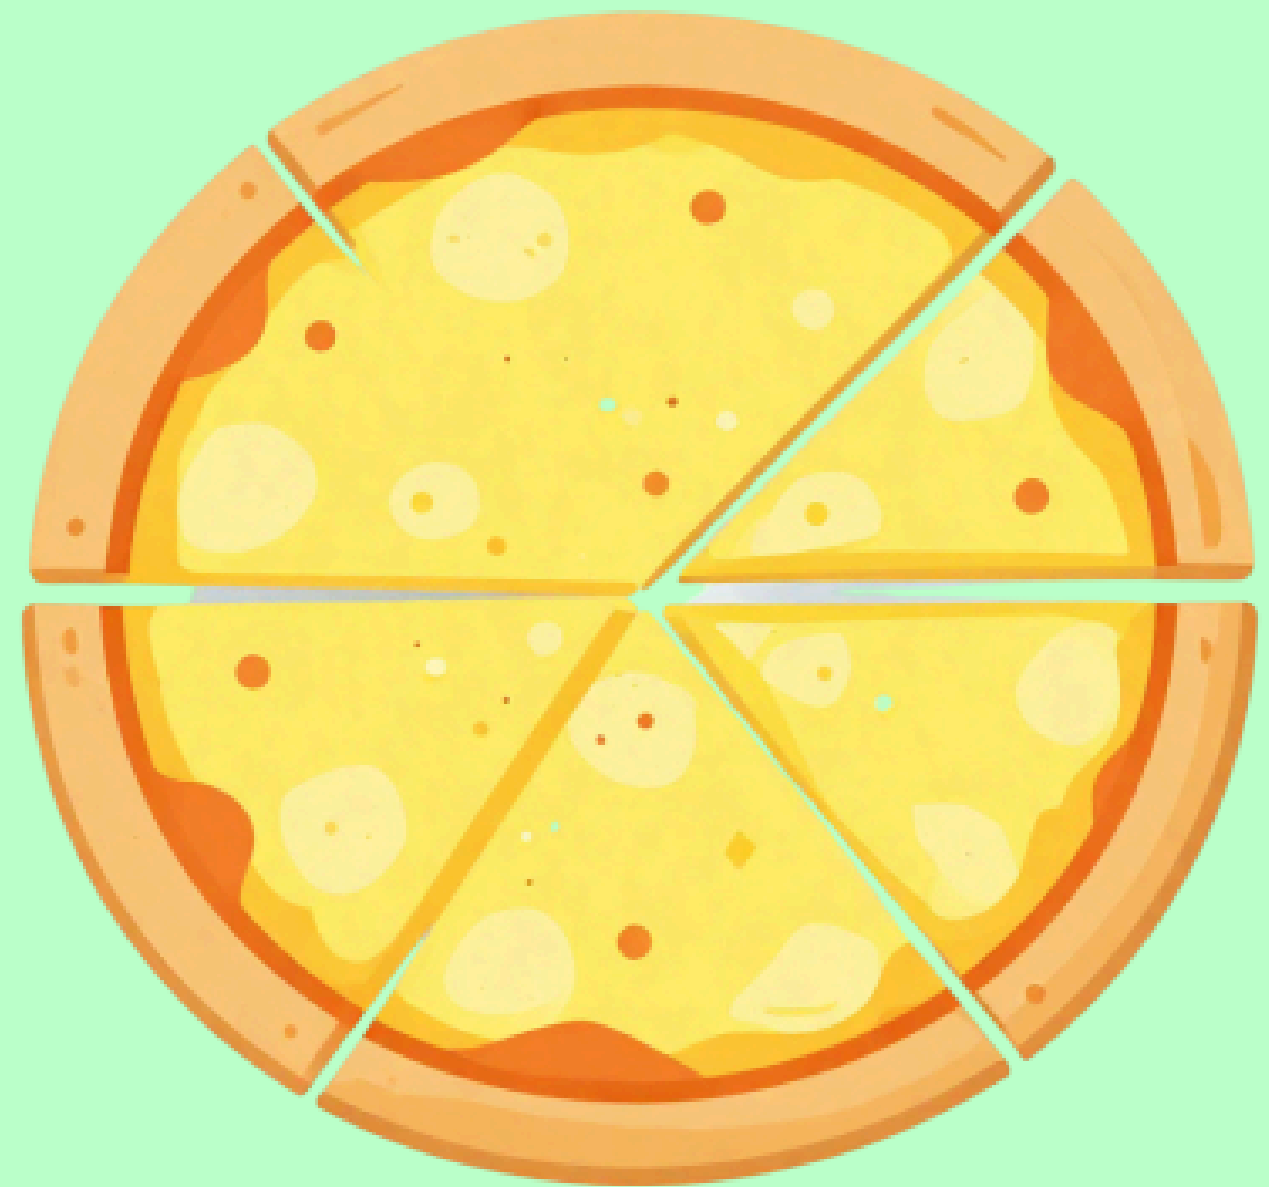

Remember: both parts must be the SAME size!

What is a Quarter?

When we divide something into 4 equal parts, each part is called ONE QUARTER.

We write it as: $\frac{1}{4}$

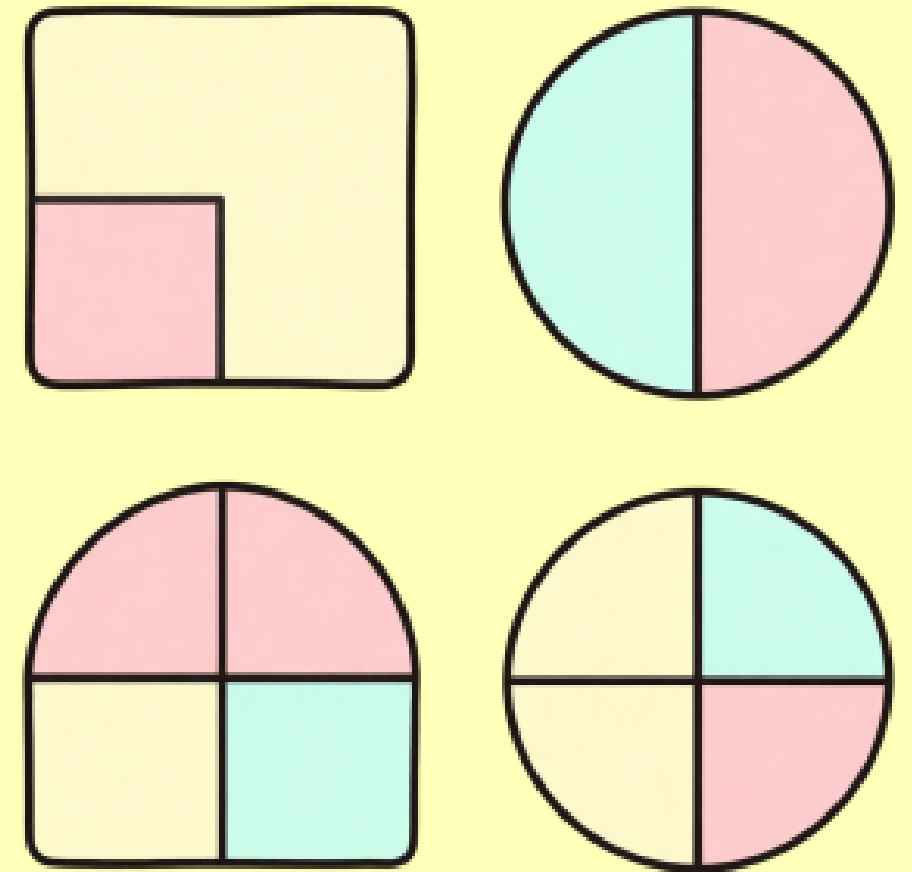

Quarter of a Shape

Imagine a square cut into 4 equal pieces.

Each piece = $\frac{1}{4}$

1 out of 4 equal parts is shaded.

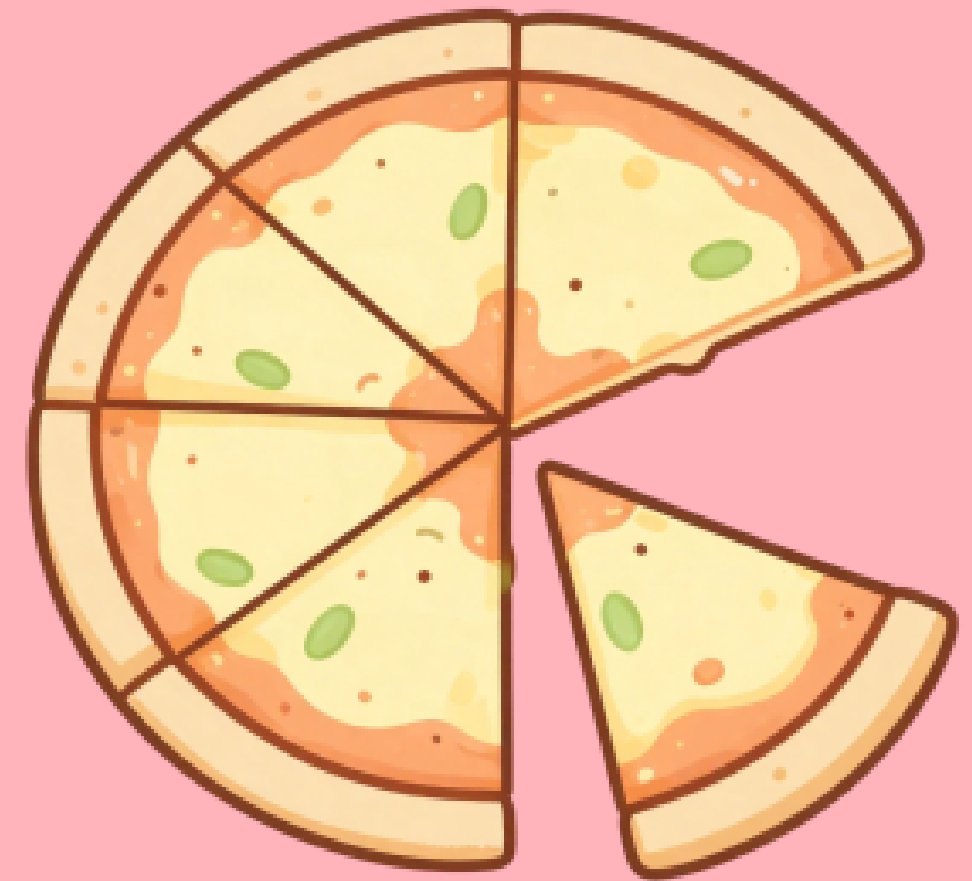

Quarter in Real Life

A quarter of a chapati

A quarter of an orange

A quarter of a chocolate bar

Four friends sharing equally!

Let's Practice Quarter!

Which shapes are divided
into exact quarters?

Remember: all 4 parts must be
the SAME size!

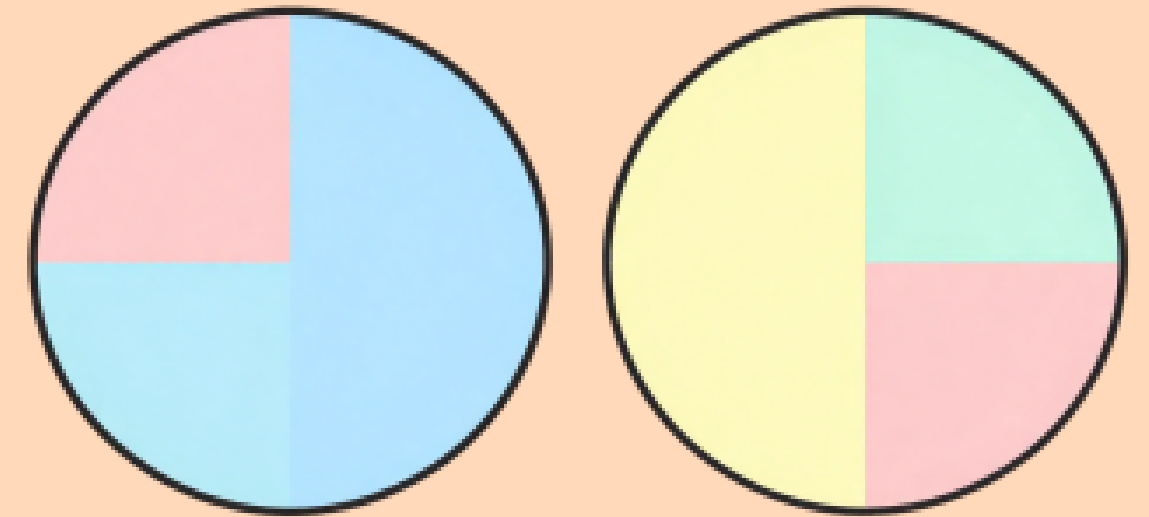

Half vs Quarter

Half = 2 equal parts ($\frac{1}{2}$)

Quarter = 4 equal parts ($\frac{1}{4}$)

Which is bigger: $\frac{1}{2}$ or $\frac{1}{4}$?

$\frac{1}{2}$ is BIGGER than $\frac{1}{4}$!

Sharing Equally

Riya has 1 roti. She shares equally
with her brother.

Each gets = $\frac{1}{2}$

Aman has 1 roti. He shares equally
with 3 friends.

Each gets = $\frac{1}{4}$

Fun Activity!

Take a piece of paper.

1. Fold it into 2 equal parts — colour one half.
2. Take another paper.
3. Fold it into 4 equal parts — colour one quarter.

Which coloured part is bigger?

Quick Quiz!

1. How many equal parts make a half?
2. How many equal parts make a quarter?
3. Is $\frac{1}{2}$ bigger or smaller than $\frac{1}{4}$?
4. Write the fraction for one quarter.
5. If you cut a pizza into 4 equal slices, what fraction is one slice?

Great Job!

You learned about fractions today!

$\frac{1}{2}$ = one half (2 equal parts)

$\frac{1}{4}$ = one quarter (4 equal parts)

Keep practising with real objects!
