

Robots vs Humans

What's the Difference?

Welcome to the World of Robots and Humans!

Let's explore how robots and humans are different
and how they are alike!

Who Are Humans?

Humans are people like you and me!

We can think, feel, and do many things.

We have feelings, creativity, and learn new things every day.

What Are Robots?

Robots are machines made by humans.
They can do special jobs and follow instructions.
Robots don't have feelings, but they can help us!

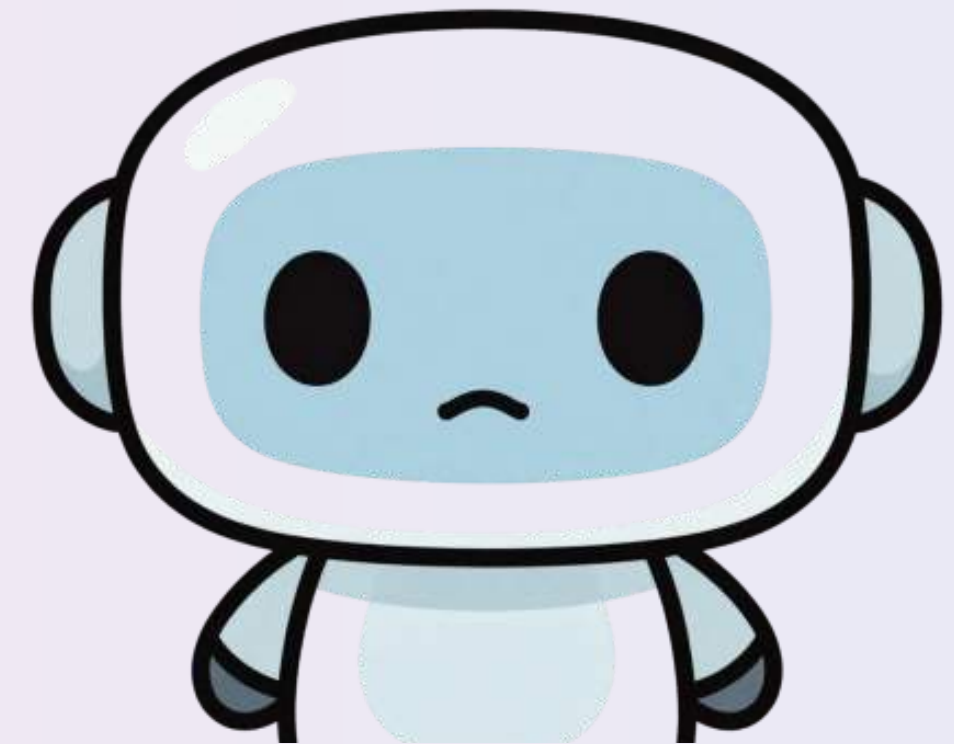

Difference #1 — Feelings

Humans have feelings like happiness, sadness, and love.
Robots do not have feelings — they just follow instructions!

Humans FEEL

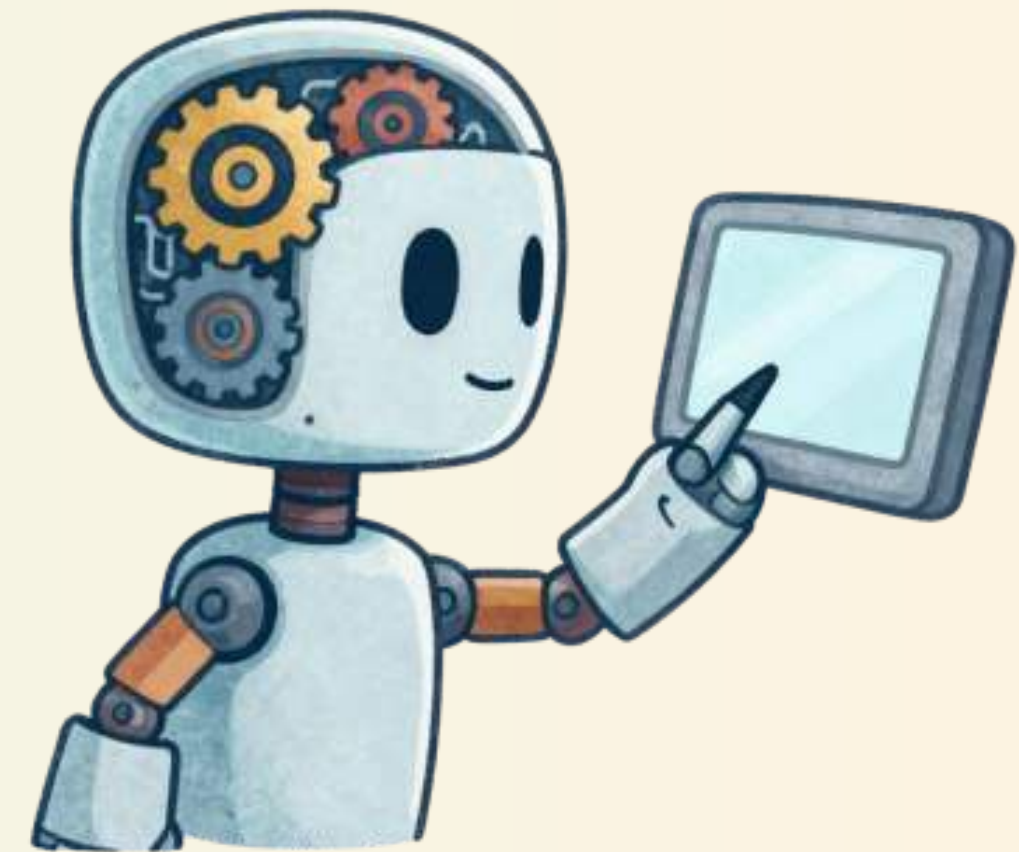

Robots DON'T feel

Difference #2 — Thinking

Humans think with their brain and imagination.

Robots follow programs and instructions.

Humans can dream — robots do what they are told!

Difference #3 — Moving & Tasks

Humans can move in many ways — run, jump, dance!

Robots move in certain ways and do specific jobs.

Difference #4 — Learning

Humans learn from experiences and feelings.

Robots learn from data and instructions.

You learn by reading books — robots learn from computers!

Types of Robots You May Know

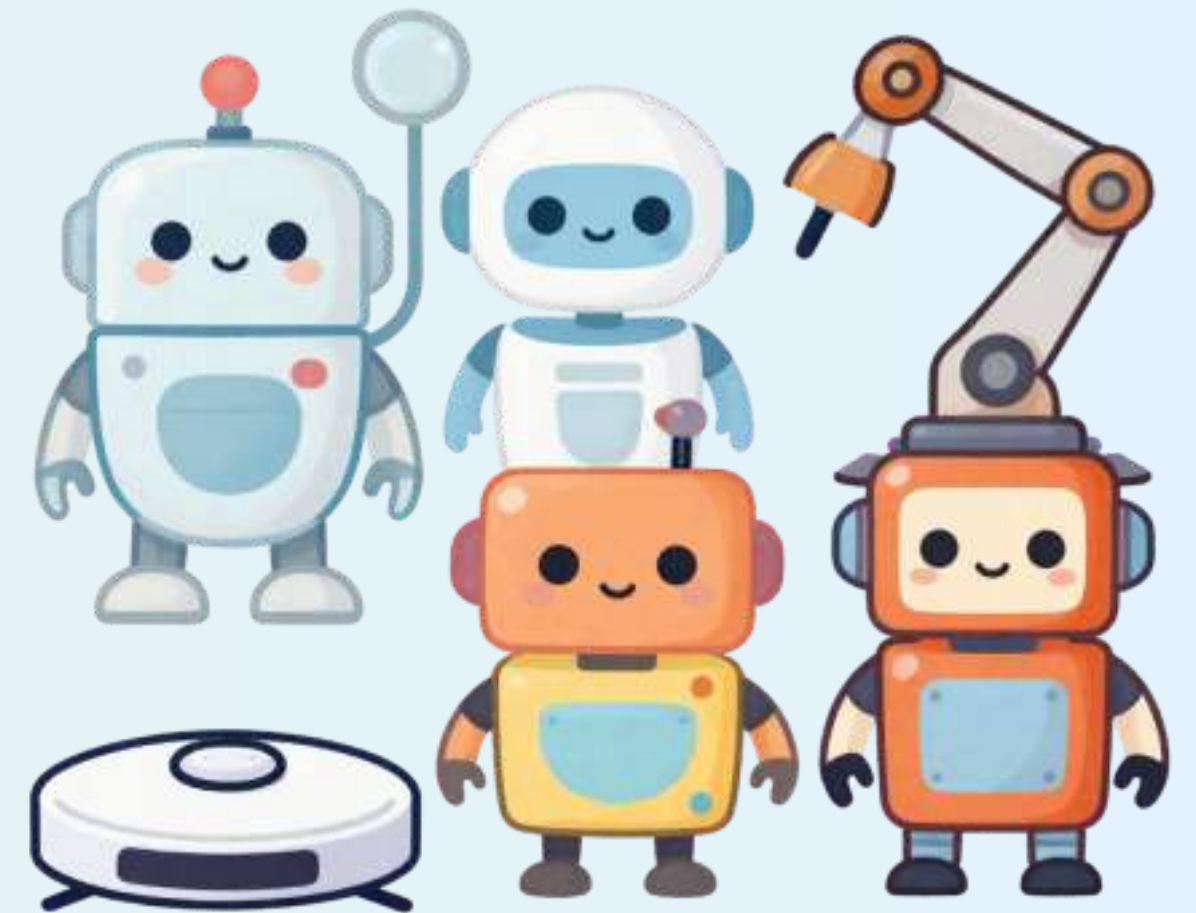

Robots come in many shapes and sizes!
Here are some you might have seen:

Home Robot
(Vacuum cleaner)

Hospital Robot
(Helps doctors)

Toy Robot
(Plays with you)

Factory Robot
(Builds things)

How Humans and Robots Work Together

Humans are creative
and make plans.

Robots help by doing
hard or repetitive jobs.

Together, humans and robots make a great team!

What Robots Do Well

- ✓ Work without getting tired
- ✓ Do jobs quickly and precisely
- ✓ Help humans stay safe
- ✓ Remember lots of information

What Humans Do Better

- ✓ Feel emotions and care for others
- ✓ Create new ideas and art
- ✓ Understand and solve problems
- ✓ Show kindness and love

Quiz Time! What Did You Learn?

1. Can robots feel happy?
a) Yes b) No ✓
2. Who can imagine new things?
a) Robots b) Humans ✓
3. Do robots help humans?
a) Yes ✓ b) No

Recap — Robots and Humans Are Different but Work Together!

- ★ Humans have feelings, robots do not
- ★ Humans think creatively, robots follow instructions
- ★ Robots help humans do hard jobs
- ★ Together, we make the world better!

Keep Exploring AI and Robots!

Robots and humans are friends who
learn from each other.

What will you discover next?

Ask questions and have fun learning!

Thank You!
