

Scratch — Pen Tool Intro

**LET'S LEARN
TO DRAW
WITH CODE!**

What is Scratch?

Scratch is a fun coding platform where you can create stories, games, and amazing art! 🎨

- Make your own animations and games
- Draw pictures using code
- Share your creations with friends

Scratch uses colourful blocks — no typing needed!

Meet the Pen Tool

The Pen tool lets you draw lines and shapes by coding!

 Draw lines as your sprite moves

 Change pen color and size

 Lift the pen to move without drawing

How Does the Pen Tool Work?

When your sprite moves, the Pen tool draws a line behind it — like a pencil on paper!

✎ Pen Down — the sprite starts drawing as it moves

🖐️ Pen Up — the sprite stops drawing (lifts the pen!)

🎨 Set Pen Color — pick any color you like

Try it: use "Pen Down," then move your sprite and watch the magic happen!

Pen Tool Blocks in Scratch

Pen Down — start drawing

Pen Up — stop drawing

Set Pen Color — choose your color

Change Pen Size — thick or thin lines

Clear — erase all drawings

Stamp — copy sprite image

Set Pen Shade — adjust brightness

Change Pen Shade — shift brightness

Set Pen Hue — change color tone

Change Pen Hue — shift color tone

Getting Started: Step 1

Open Scratch and add the Pen Extension!

- Go to scratch.mit.edu and open a new project
- Click the blue Extensions button at the bottom left
- Find the Pen extension and click to add it
- Pen blocks will now appear in your block palette!

Getting Started: Step 2

Step 2: Drag the "Pen Down" block to your script!

- Find the Pen Down block in the Pen extension
- Drag it into your script area
- Place it under your start block
- Now your sprite is ready to draw!

Getting Started: Step 3

Move your sprite and watch it draw!

🎨 Add a "Move" block to your script.

✏️ The sprite will glide and leave a colourful trail.

✨ Try moving in different directions to see your drawing grow!

Fun Drawing Ideas!

Look at these fun drawings you can make!

- Squares and rectangles
- ▲ Triangles and stars
- Circles and spirals
- 🌈 Colorful patterns and lines

Use the Pen tool in Scratch to create your own amazing art with code!

Create Your Own Shape

■ Square: Move and turn to draw four sides

▲ Triangle: Move and turn three times

○ Circle: Use repeat blocks with small moves and turns

★ Star: Combine moves and pen down commands

Square

Triangle

Circle

Star

Mini Project: Draw a House

Step 1: Pen down — draw a square for the house base

Step 2: Draw a triangle on top for the roof

Step 3: Add lines for windows and a door

Step 4: Change pen color for fun details

Step 5: Add grass or a sky background

Step 6: Experiment with different pen sizes

Step 7: Add a sun or fluffy clouds

Step 8: Try using your favourite colors

Step 9: Save your amazing creation

Step 10: Share your house with friends!

Tips & Tricks

- ✎ Lift your pen when moving without drawing (pen up)
- 🎨 Change colors and sizes for creative effects
- ↻ Use loops to make drawing easier
- ★ Have fun experimenting!

Let's Try a Quick Quiz!

Q1: What block makes your sprite START drawing?

A) Pen Up B) Pen Down ✓ C) Move

Q2: Which block STOPS the sprite from drawing?

A) Pen Down B) Set Pen Color C) Pen Up ✓

Q3: Which block changes the line color?

A) Set Pen Color ✓ B) Pen Down C) Move

Summary: What We Learned Today

Scratch is a fun coding tool

Pen tool helps you draw with code

You can create shapes and pictures

Practice makes perfect!

Use pen down and pen up commands

Change colors and sizes creatively

Use loop blocks for easier drawing

Try mini projects like a house or star

Keep experimenting and exploring

Share your amazing creations!

Keep Coding and Creating!

Keep exploring Scratch and make your own amazing drawings! Every line of code you write is a step toward something incredible. You are a creative coder — keep going and have fun! 🎨💻

Thank You & Questions!

Thank you for learning with us today!
We hope you had fun discovering the Pen tool in Scratch. 🎨
Do you have any questions?
Share your amazing drawings with the class!
