

SCRATCH — SOUNDS & MUSIC

Let's create fun sounds and music with Scratch!

What is Scratch?

A Fun Way to Learn Coding!

Scratch is a fun way to learn coding by making stories, games, and animations.

- Drag and drop blocks
- Make characters move
- Add sounds and music

Why Use Sounds & Music?

Discover why sounds and music make your Scratch projects amazing!

Sounds Make It Exciting!

Sounds make your Scratch project come alive! A pop, a clap, or a cheer makes everything more fun and exciting to play with.

Music Tells a Story

Music helps your project share feelings! A happy tune means celebration. A slow beat means something mysterious is happening.

Add Funny Noises & Songs!

You can add animal sounds, silly voices, or catchy songs! Make your friends laugh or dance with your very own sound effects.

Meet the Scratch Sounds Tab

Explore the Sounds Tab in Scratch!

This is where you can add, record, and edit sounds. Click the Sounds tab to find fun sound effects, music, and even record your own voice!

Adding Sounds to Your Project

Follow These Simple Steps!

Adding sounds to your Scratch project is easy and fun! Just follow these steps and your project will come alive with amazing sounds. Let's get started! 🎵

Step 1: Click the Sounds Tab

Step 2: Choose a Sound from the Library

Step 3: Click to Preview the Sound

Step 4: Add it to Your Sprite or Stage

Playing Sounds with Code Blocks

Use special blocks to control sounds in your Scratch project!

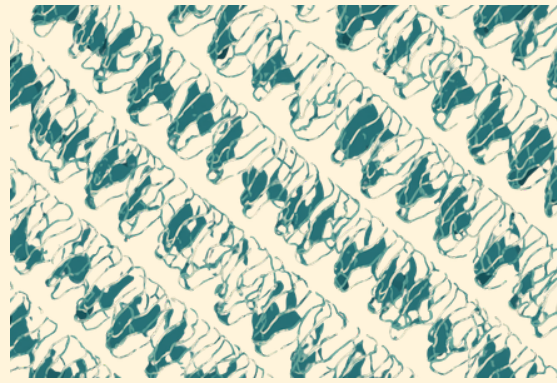

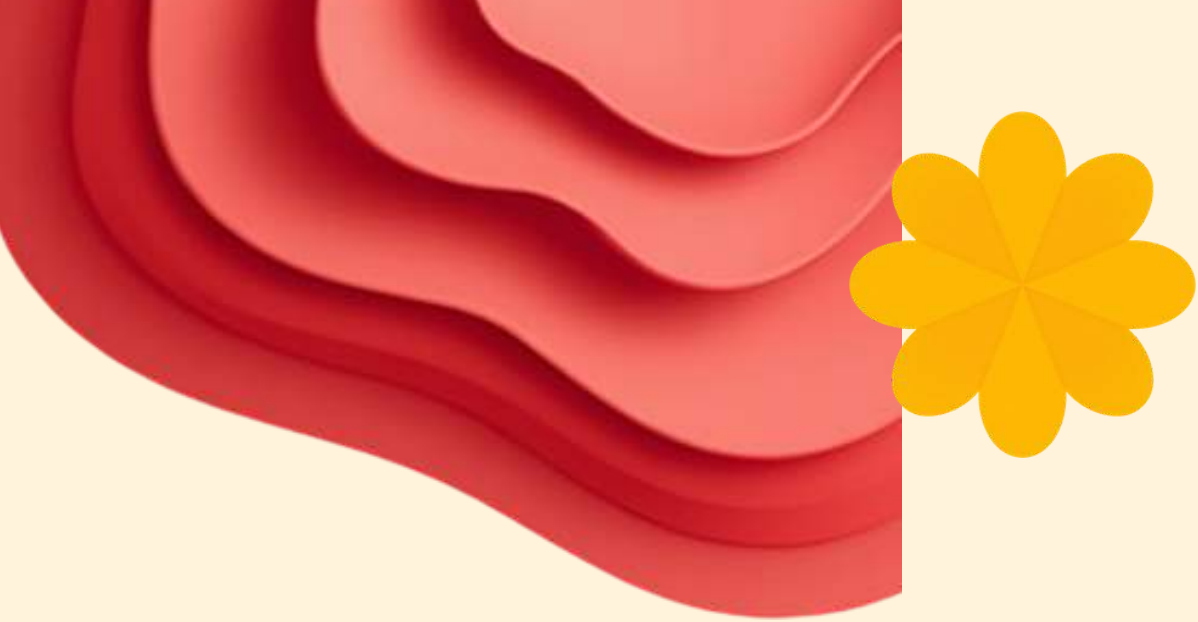

Scratch has special sound blocks that let you play, stop, and control sounds in your project. Drag these colourful blocks into your code and watch your sprite come to life with amazing sounds and music!

Key Sound Blocks to Know

-  play sound — plays a chosen sound
-  stop all sounds — stops every sound
-  change volume — make it louder or quieter

Try It! Click the Green Flag 

Click the green flag to play a meow sound from your sprite — hear it come alive!

Recording Your Own Sounds!

Use Your Voice & Make It Fun!

🎵 Click the Sounds tab and press Record

🎤 Speak, sing, or make a funny noise!

😊 Try recording your name or a silly sound

✅ Click Save to add it to your project

Play Drum 

Use the "play drum" block to add a beat! Try different drum sounds like bass drum, snare, or bongo to make your music exciting.

Play Note 

Use the "play note" block to play musical notes. Pick a note number and how long to hold it. Use a "repeat" block to create a catchy melody!

Set Instrument 

Use "set instrument" to choose piano, guitar, flute, and more! Mix instruments with notes and drums to build your own song.

Making Music in Scratch!

Use music blocks to create beats, notes, and fun tunes!

Let's Make a Song!

Create a beat with drums and notes in Scratch!

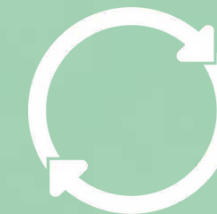

Step 1: Add a Drum Beat

Use the "play drum" block. Try a bass drum on beat 1 and a snare on beat 3. Make a 4-beat drum loop!

Step 2: Add a Melody

Use "play note" blocks to add a tune. Pick notes like C, E, and G to make a happy melody!

Step 3: Loop It!

Wrap your blocks in a "repeat" block. Try repeat 4 to play your song over and over!

Volume and Sound Effects

Louder vs Quieter – Let's Compare! 

Whisper (Quiet)

Set volume to 10 or lower. The sound is very soft — like a gentle breeze or a mouse tiptoeing!

Change the Volume

Use the "set volume to" block or "change volume by" block in Scratch to make sounds louder or quieter.

Shout (Loud)

Set volume to 90 or higher. The sound is BIG and bold — like a lion roaring or a drum banging!

Try It Yourself!

Pick a sound and change its volume. Can you make it whisper, then shout?

Volume controls how loud or quiet your sounds are — experiment and find the perfect level for your project!

Fun Sound Ideas to Try!

Creative Projects to Explore with Scratch Sounds

Scratch lets you do so much with sounds! Try these fun ideas to make your projects more exciting. Mix and match sounds to create something totally unique and share it with your friends and family!

Add animal noises to your game

Record your own funny voice

Make background music for your story

Use sound effects for buttons

Check the Volume

Make sure the volume is turned up on your computer and in Scratch. Look for the volume block and check it is not set to zero!

Fix Your Sound Blocks

Check that your sound blocks are connected correctly in your code. The "play sound" block must be inside the right script to work.

Test Before Sharing

Always click the green flag and listen to your sounds before sharing your project with friends or your teacher.

Troubleshooting Sounds

Sound & Music Showcase

Look what you can create!

These amazing projects were made using Scratch sounds and music! From animal noises to drum beats, every project is unique. You can create something incredible too — just start coding and let your imagination play!

Recap: What Did We Learn?

Let's Remember What We Explored Today!

Great work today! You learned so many amazing things about sounds and music in Scratch. Let's look back at everything we discovered together!

"You are now a Scratch Sound Star!"

Scratch lets you add and play sounds

You can record your own sounds

Use music blocks to make songs

Sounds make your projects fun and exciting!

Time to Play with Sounds!

Your Turn to Create!

Open Scratch and explore sounds and music. Make something amazing today!

Share with Friends & Family

Show your sound projects to friends and family. They will love what you made!

Keep Exploring!

Keep coding, keep creating, and have lots of fun with sounds and music!
