

SCRATCH STORY ANIMATION!

Animating a Panchatantra tale

Let's Begin!

MEET OUR STORY FRIENDS!

"Helloo!" says Chiku 🐒 | "Vanakkam!" says Gajju 🐘

SETTING THE JUNGLE STAGE:

Our story begins in the Indian jungle!

WHAT IS DIGITAL ANIMATION?

1

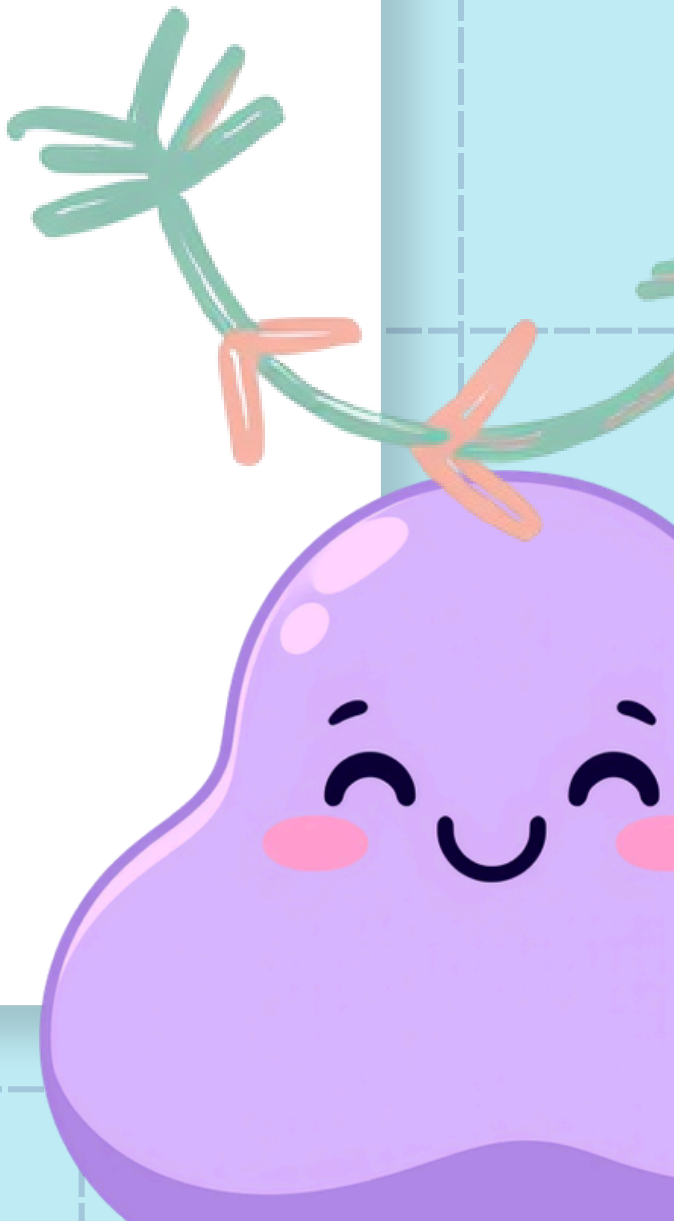

Animation makes pictures move, just like a flip-book!

2

Like a cricket bat swinging – each picture is one step!

3

Connected movements tell a story!

COSTUME SWITCHING!

- 
- 1 Costumes = different looks of a sprite
 - 2 Switching costumes makes movement happen!
 - 3 Example: Cricket bat swinging for a sixer!
- 

GLIDE VS MOVE:

How does your sprite travel across the stage?

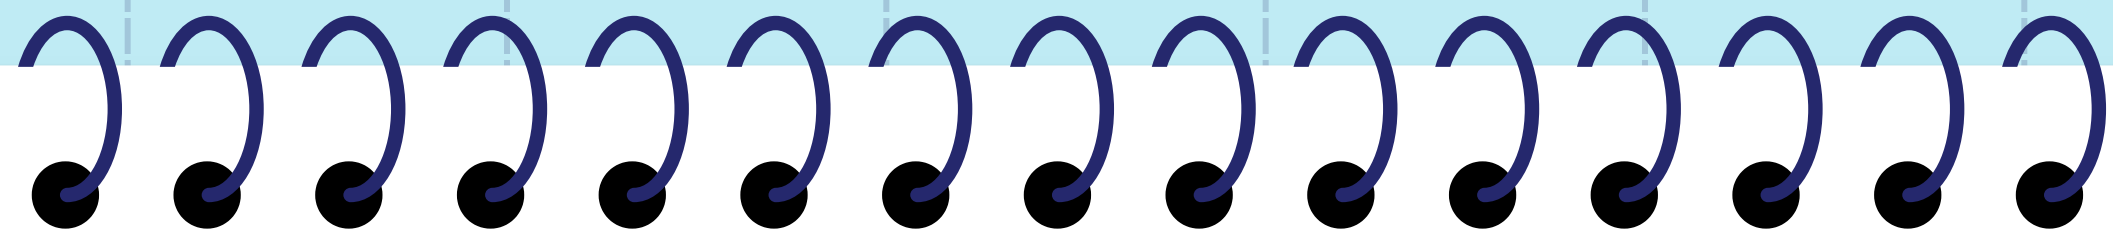

GLIDE

Sprite moves your character sprite smoothly, sailing across the screen like a bird riding the wind.

MOVE STEPS

It makes your sprite hop forward in short, jerky jumps.

PARALLEL ACTIONS – TALKING TOGETHER!

- 1 Parallel means doing two things at once!
- 2 Wait block helps sprites take turns to talk politely!
- 3 "Hello, teacher!"
"Hello, dear!"

STEP 1:

use the Glide block to make Chiku enter the stage smoothly!

glide (1) secs to x: (0) y: (0)

GLIDE BLOCK!

STEP 2:

Use Next Costume block in a Repeat loop to animate Chiku!

repeat (10)

TRY IT!

STEP 3: ADDING DIALOGUE

Use the Say block to make Chiku speak a short line!

say [Hello, Gajju!] for 2 secs

"HELLO, GAJJU!"

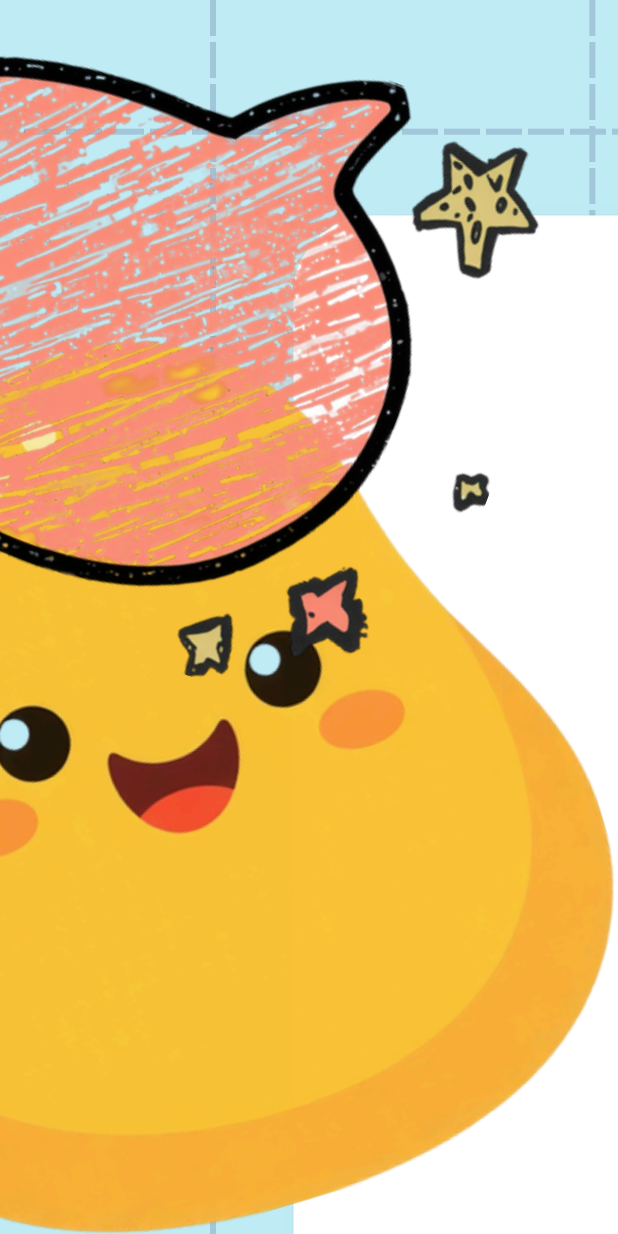

STEP 4:

use the wait block to time when each sprite speaks in the conversation!

wait (0.2) secs

SYNC!

CREATIVE FREEDOM TIME!

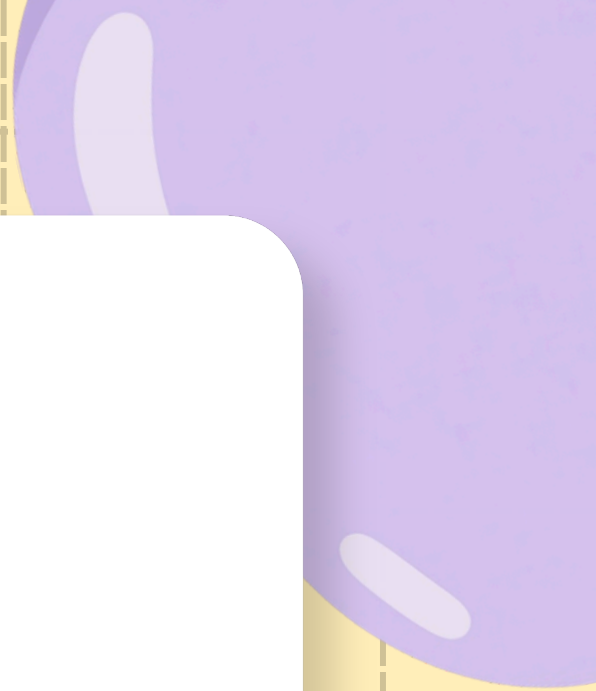

- 1 Change backgrounds: jungle, village farm, or palace
- 2 Add sounds and music
- 3 Write your own dialogues!

DEBUGGING & REFLECTION:

Does your story move and talk smoothly?

OUR GRAND PREMIERE!

Let's bring our Panchatantra story to life!
