

THE TREASURE MAP GRID: OVER- AND-UP FOOTSTEPS

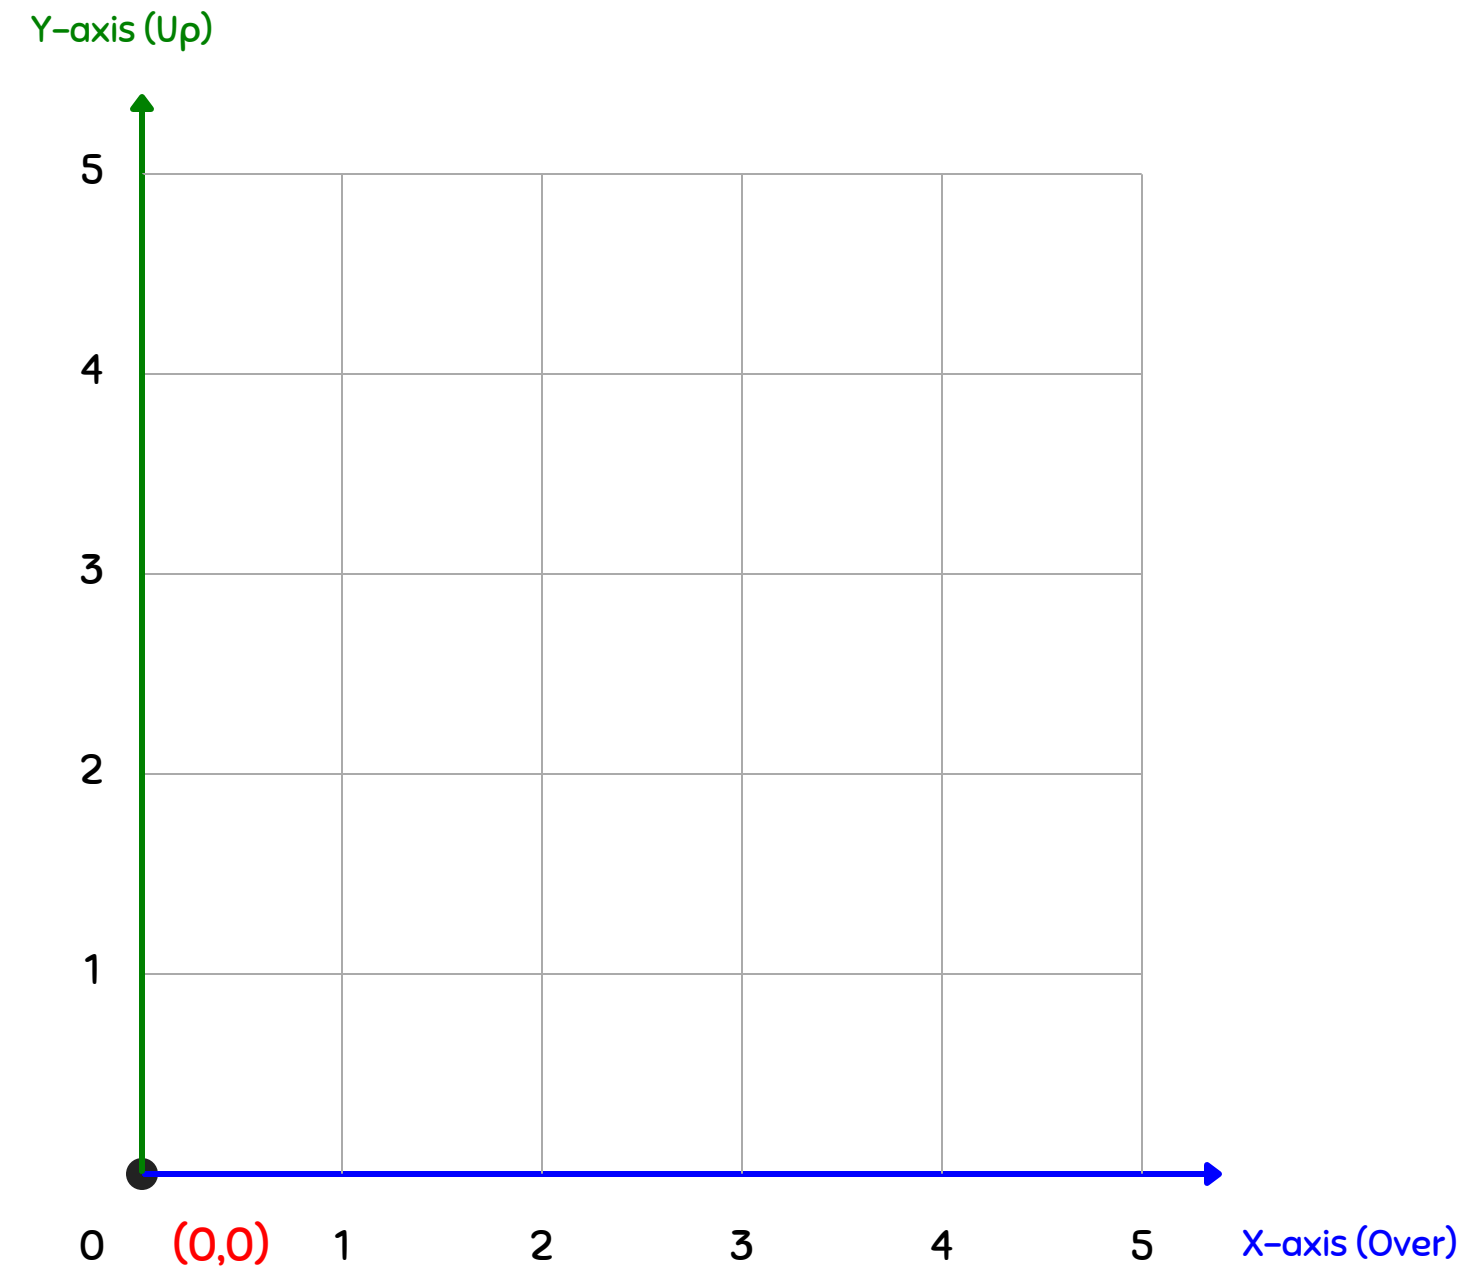

THE ANCIENT FORT SECRET MAP

Vihaan and Meher found an old parchment map near Amber Fort in Jaipur! The map shows a 5x5 grid with a shiny gold star at position (3, 4). Can you help them find the treasure?

MEET THE GRID LINES

The flat floor line is called the X-axis (Over line). The standing wall line is called the Y-axis (Up line). Where they meet is (0,0) – like the central flag in Kho-Kho!

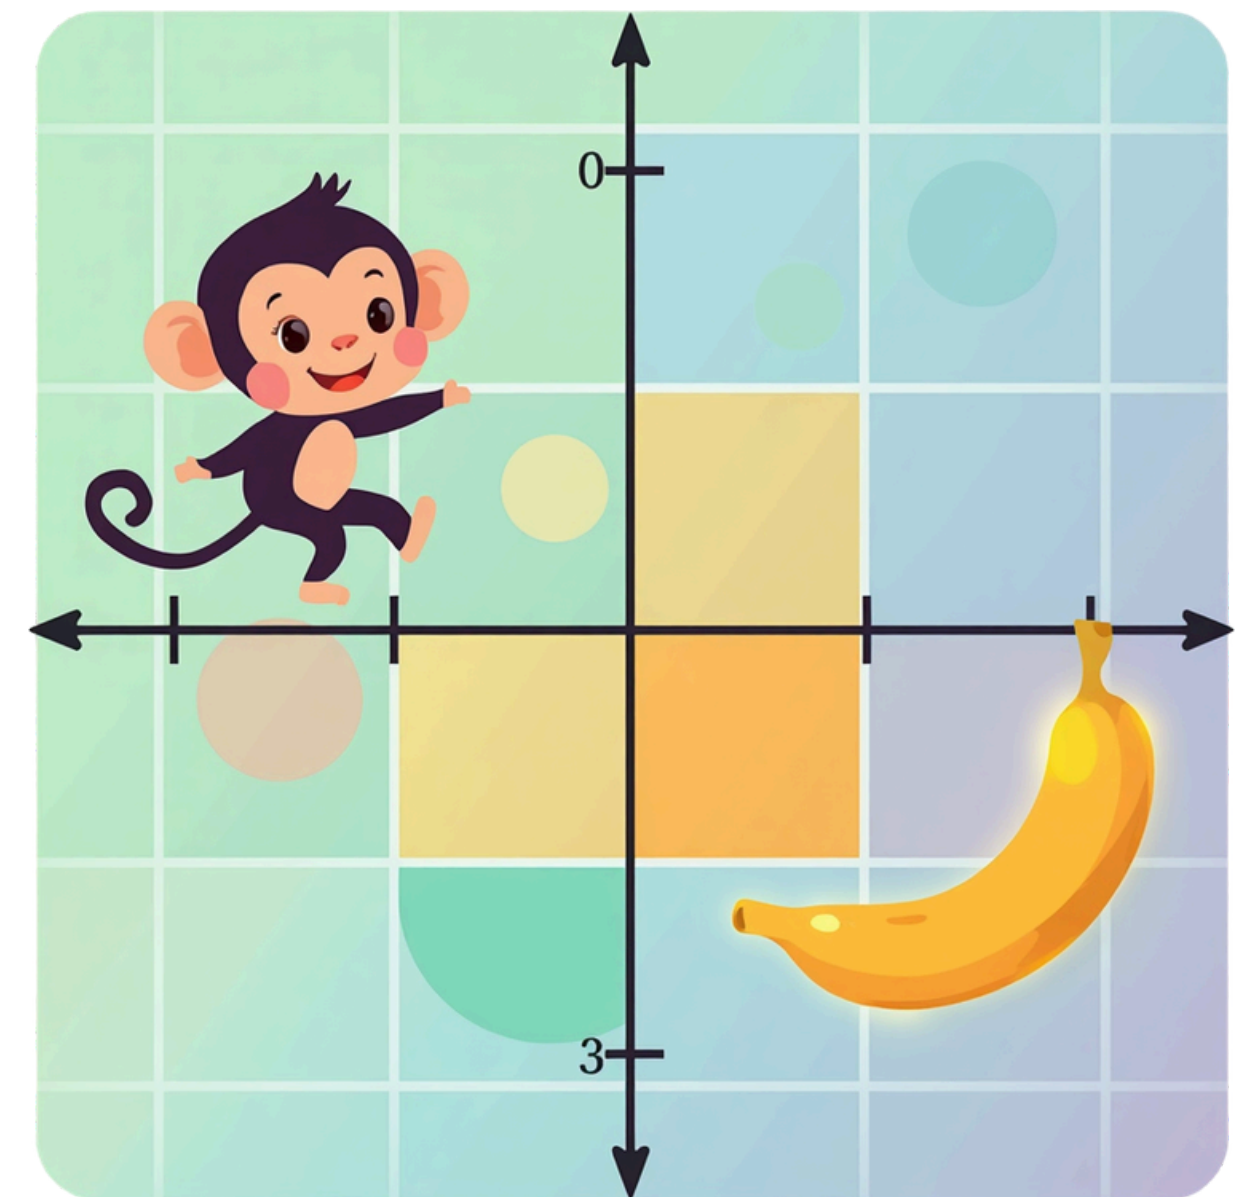

THE GOLDEN RULE: OVER-THEN-UP

To find a point, always move Over first, then Up. Think of it like finding your seat at PVR cinema – first walk along the row (Over), then climb the stairs (Up)!

MONKEY'S BANANA HUNT

Monkey starts at (0,0) and the banana is at (3,2). Watch monkey hop Over 3 steps, then Up 2 steps to reach the yummy banana!

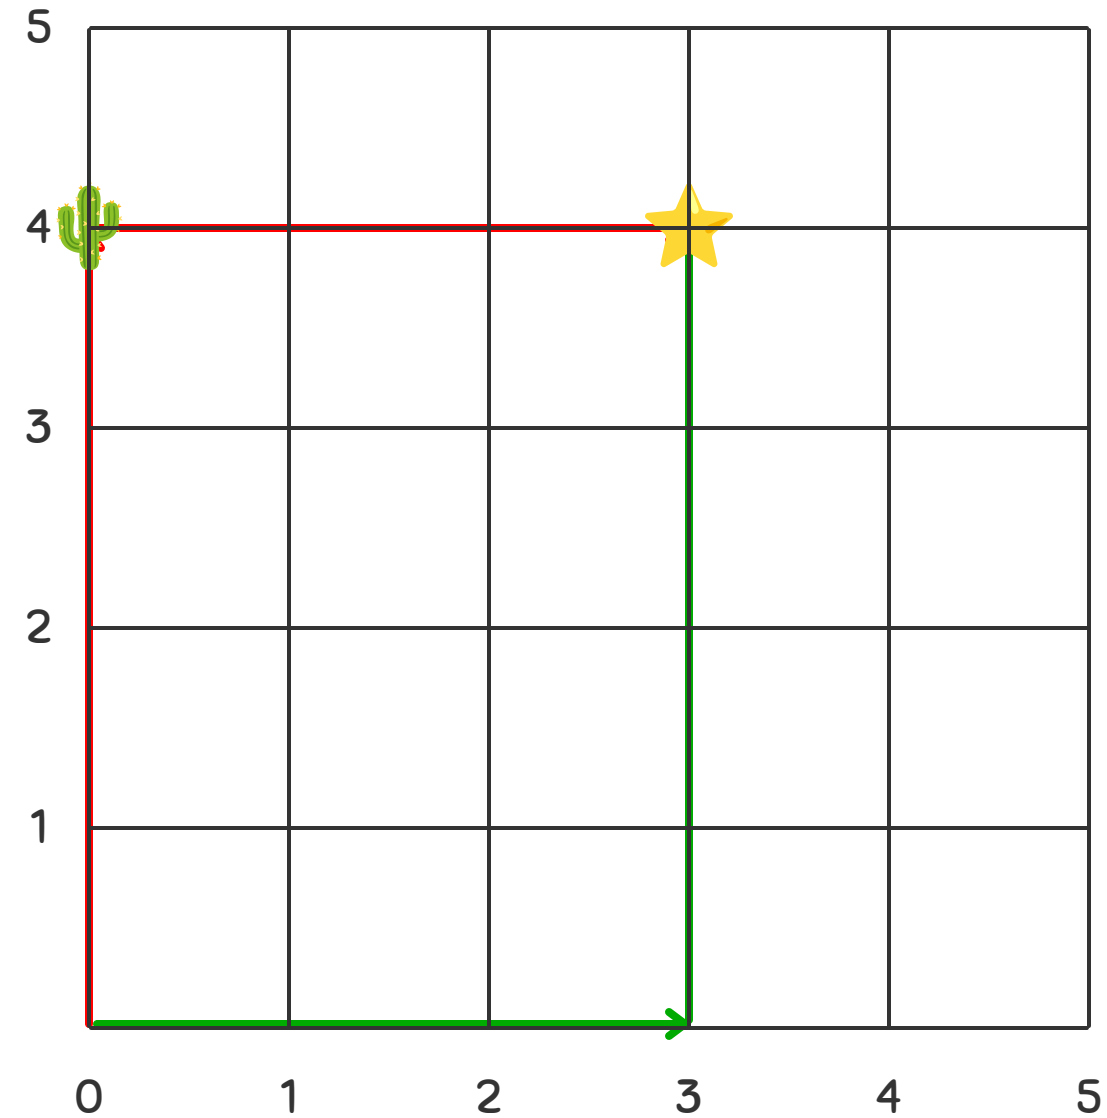

SECRET HANGAR HIDING CHALLENGE

Now, you help Rover find treasures on the grid! Rover is waiting at the start point (0,0). Can you guide him to the hidden treasures at (2,4) and (5,0)?

WATCH OUT! WRONG ORDER TRAP

If you go Up first, then Over, you might hit a cactus! Oops! That's the wrong path. Remember the golden rule: Always move Over first, then Up. Try again, you've got this!

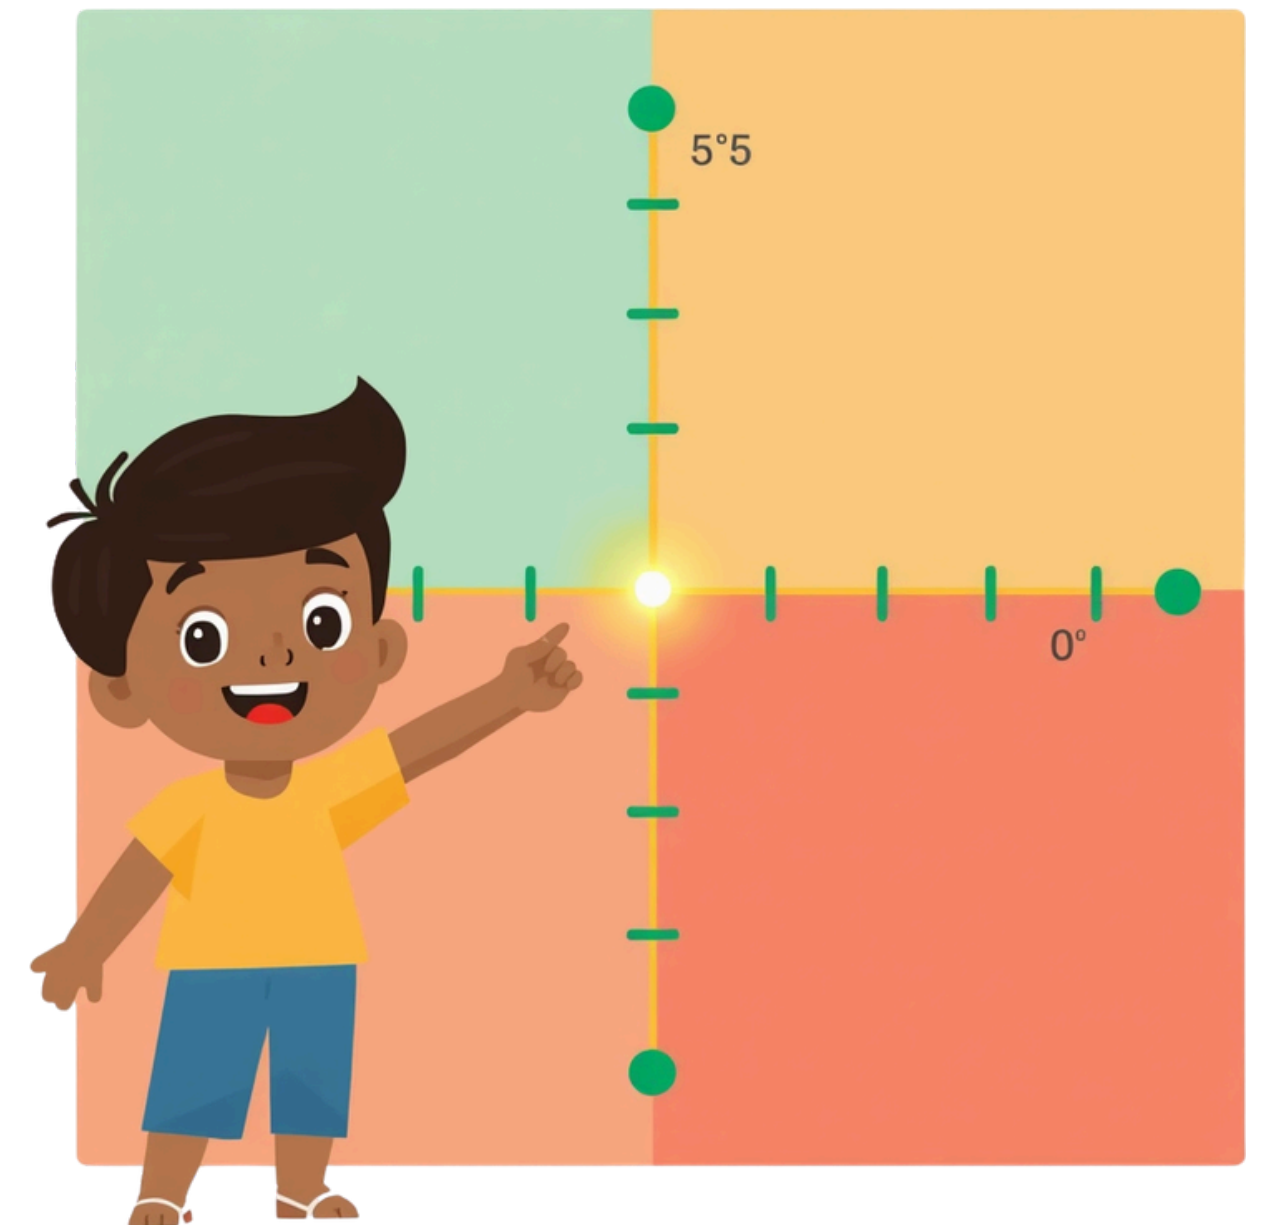

Wrong: Up then Over

Correct: Over then Up

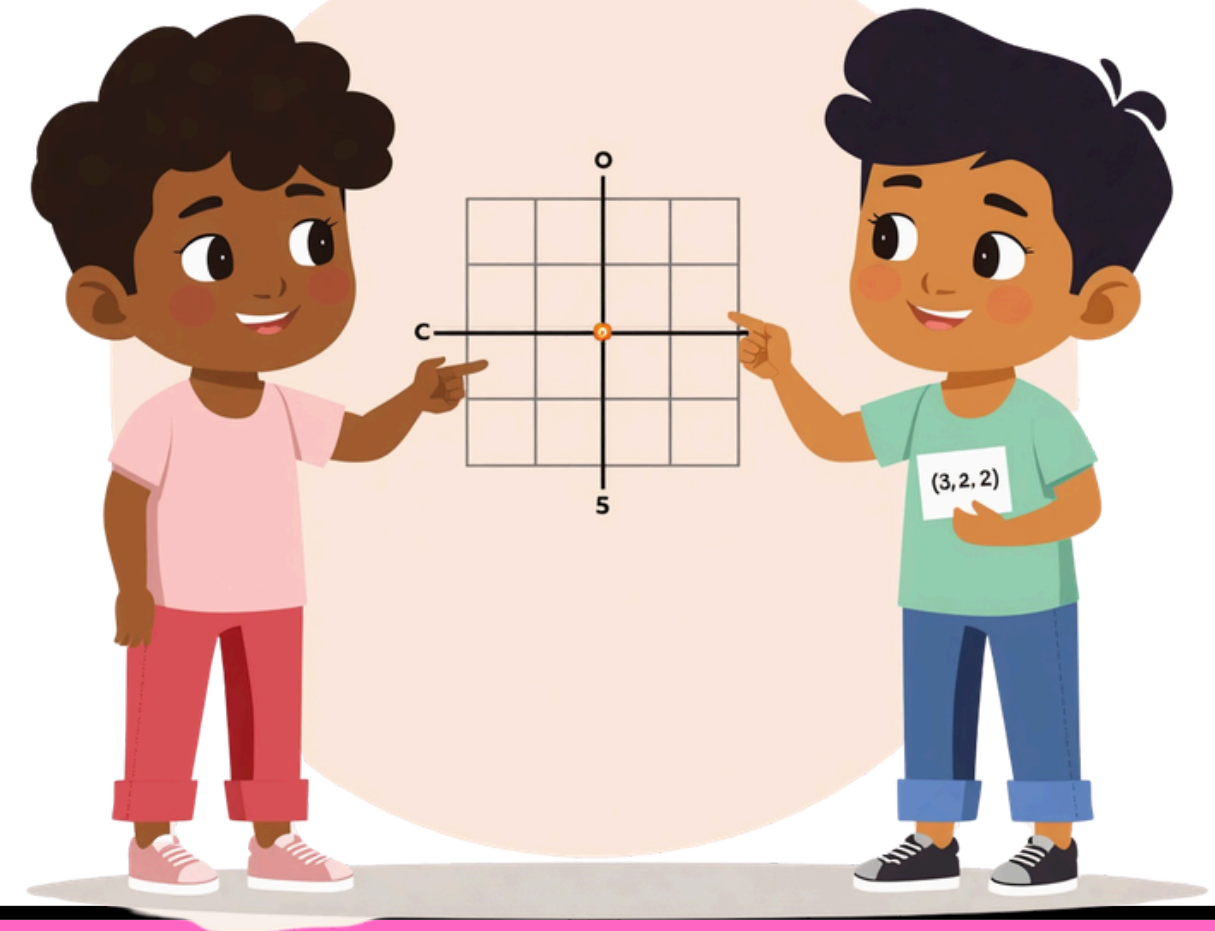

STAYING ON THE FLOOR LINE

Position (5, 0) means move Over 5 steps, Up 0 steps. You stay right on the floor line! When Up is zero, you don't climb at all.

READING THE GRID ADDRESS

Say it like this: Over 3, Up 2 or (3, 2). It's like planting saplings in a nursery – first count the row, then the lane!

BADGE MATCHING CHALLENGE

Match the badges to the correct spots on the grid. Look at each badge showing coordinates like (1,3), (4,1), and (2,5). Remember: Over first, then Up!

YOUR EXPLORER'S SUMMARY

Remember these treasure map secrets:

- The baseline lines are called Over (X) and Up (Y)
- Always move Over first, then Up
- Coordinates show location on the grid
- Treasure maps help us find hidden spots!

HOME QUEST: FLOOR TILE TREASURE HUNT

Use floor tiles to create your own treasure map! Mark tiles with numbers and practice finding spots using Over-then-Up codes with your family.

CONGRATULATIONS!

WELL DONE, MAP CARTOGRAPHER!

You're now a treasure map expert! You learned how to use Over-then-Up to find any spot on a grid. Keep exploring more coordinate grids and discover new treasures!

QUESTIONS & NEXT STEPS

ANY QUESTIONS? GET READY FOR MORE MAP ADVENTURES!

Great job exploring coordinate grids today! If you have any questions, ask your teacher or parent. Next session, we'll discover even more treasure map secrets!
