

LARGE LANGUAGE MODELS — HOW CHATGPT PREDICTS WORDS

WHAT ARE LARGE LANGUAGE MODELS?

Large Language Models (LLMs) are big computer programs that learn how to understand and use words. They read millions of books, stories, and websites to learn how language works!

THINK OF IT LIKE THIS!

Imagine a giant brain that reads lots and lots of stories and learns how to talk just like you and me!

HOW DO COMPUTERS UNDERSTAND WORDS?

Breaking Words Apart

Computers split words into pieces
They study how letters connect

Pattern Recognition

Computers look for patterns
They find similarities in words

**MEET CHATGPT!
YOUR FRIENDLY AI
HELPER THAT
TALKS AND WRITES
LIKE A PERSON!**

HOW DOES CHATGPT LEARN?

READING MILLIONS OF SENTENCES

ChatGPT learns by reading millions of sentences from books, websites, stories, and more. It's like reading the biggest library in the world!

REMEMBERING WORD PATTERNS

ChatGPT remembers how words and sentences usually go together, like knowing "good morning" comes before "everyone!"

PATTERN RECOGNITION IN LANGUAGE

1. FINDING PATTERNS

ChatGPT notices which words usually appear together in sentences.

1. HOW IT WORKS

It picks the word that fits best based on patterns it learned!

1. EXAMPLE SENTENCE

"I like to eat ____" → apples, pizza, or ice cream often come next!

PREDICTING THE NEXT WORD

moler

aloed

noottile

mint

LIKE PLAYING A GAME!

It's like playing "What comes next?" in a story. ChatGPT guesses the best word to continue!

HOW IT CHOOSES

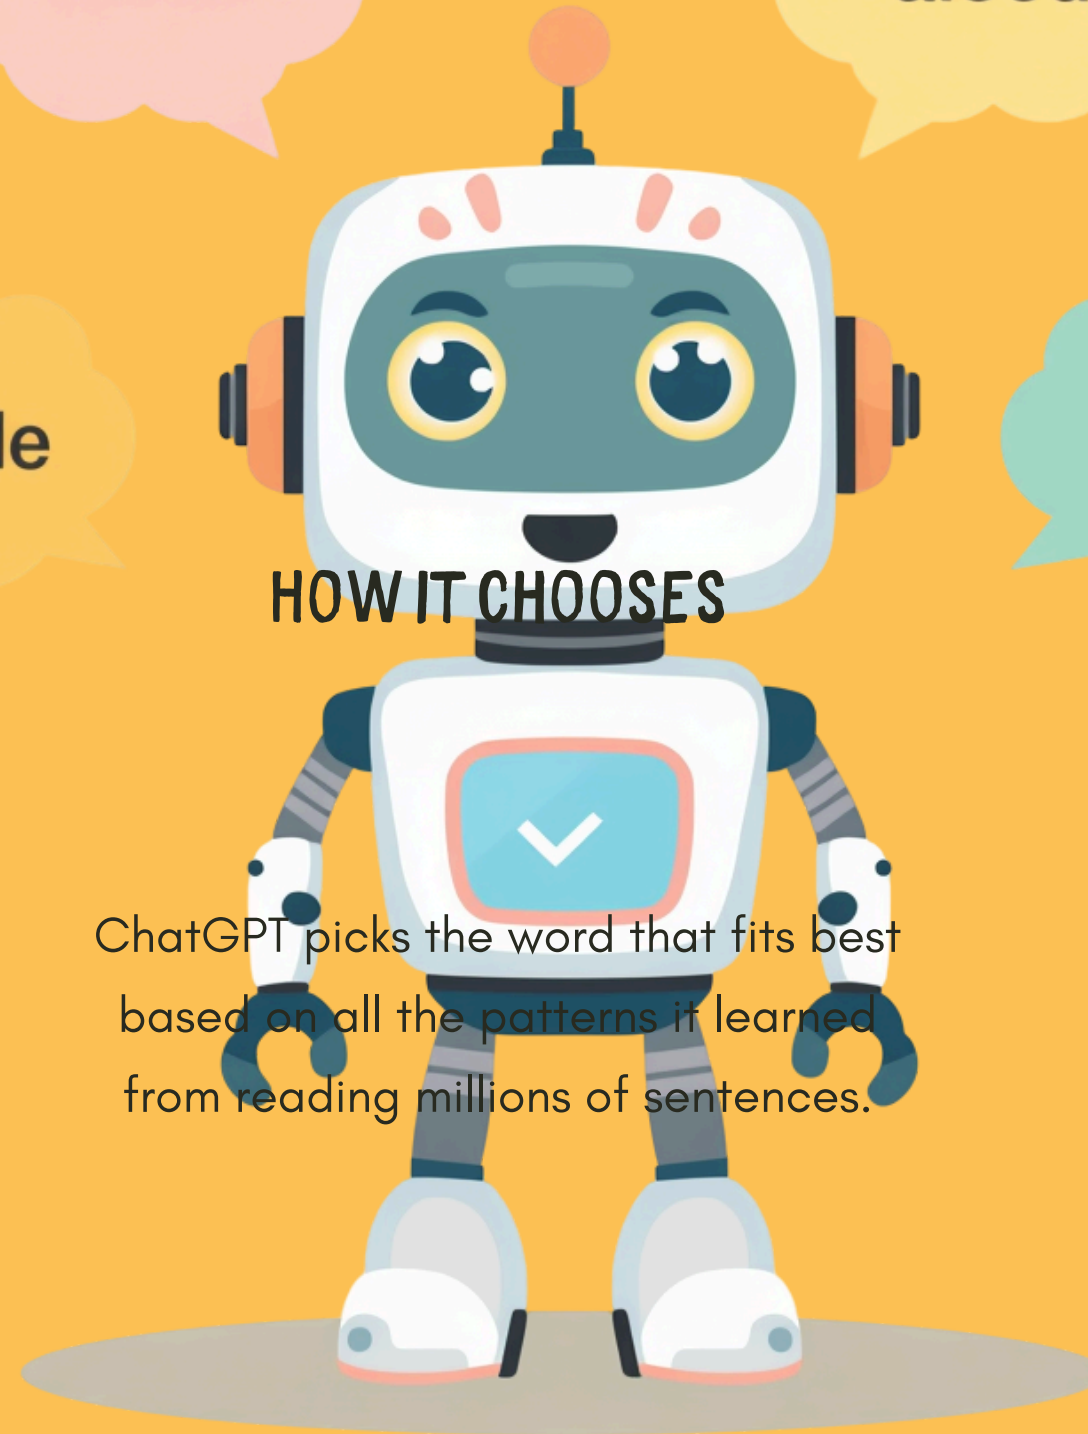

ChatGPT picks the word that fits best based on all the patterns it learned from reading millions of sentences.

EXAMPLE PREDICTIONS

"The dog likes to ____"

- play (most likely!)
- bark
- sleep

Different words can fit!

HOW DOES CHATGPT GET SO SMART?

ChatGPT becomes smart by following simple steps, just like you learn to read!

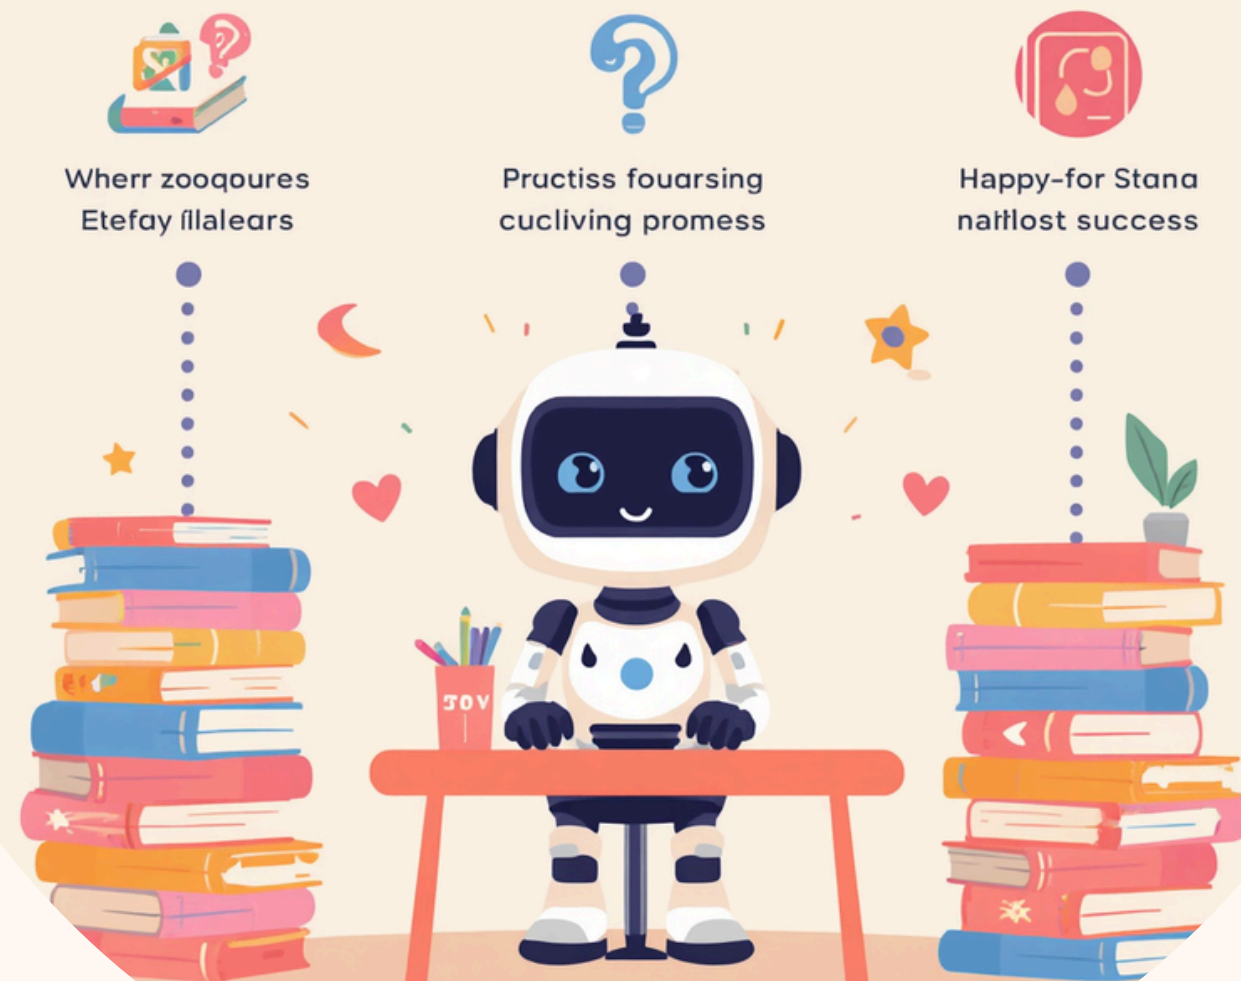

📖 Reading Lots → 🎯 Practicing Guesses → ★ Getting Better Over Time

It's like practicing reading every single day until you become a super reader!

The more ChatGPT practices, the better it gets at predicting words!

My Learning Journey: A

Over this learning gave our overview of the people-lous and when learning to write the crerd unied is for ninsion.

WHAT MAKES PREDICTIONS GOOD OR NOT?

1. MORE PRACTICE

The more examples ChatGPT reads, the better it gets at guessing the next word!

1. NEW IDEAS

Words it hasn't seen before or unusual sentences can confuse it!

1. TRICKY WORDS

Sometimes ChatGPT makes funny mistakes with tricky words like "bat" (animal or sports gear?).

FUN EXAMPLES OF CHATGPT PREDICTIONS

ChatGPT can predict words in fun sentences! Try these:

"The hungry dog wanted to eat a ____" (bone, treat,
biscuit)

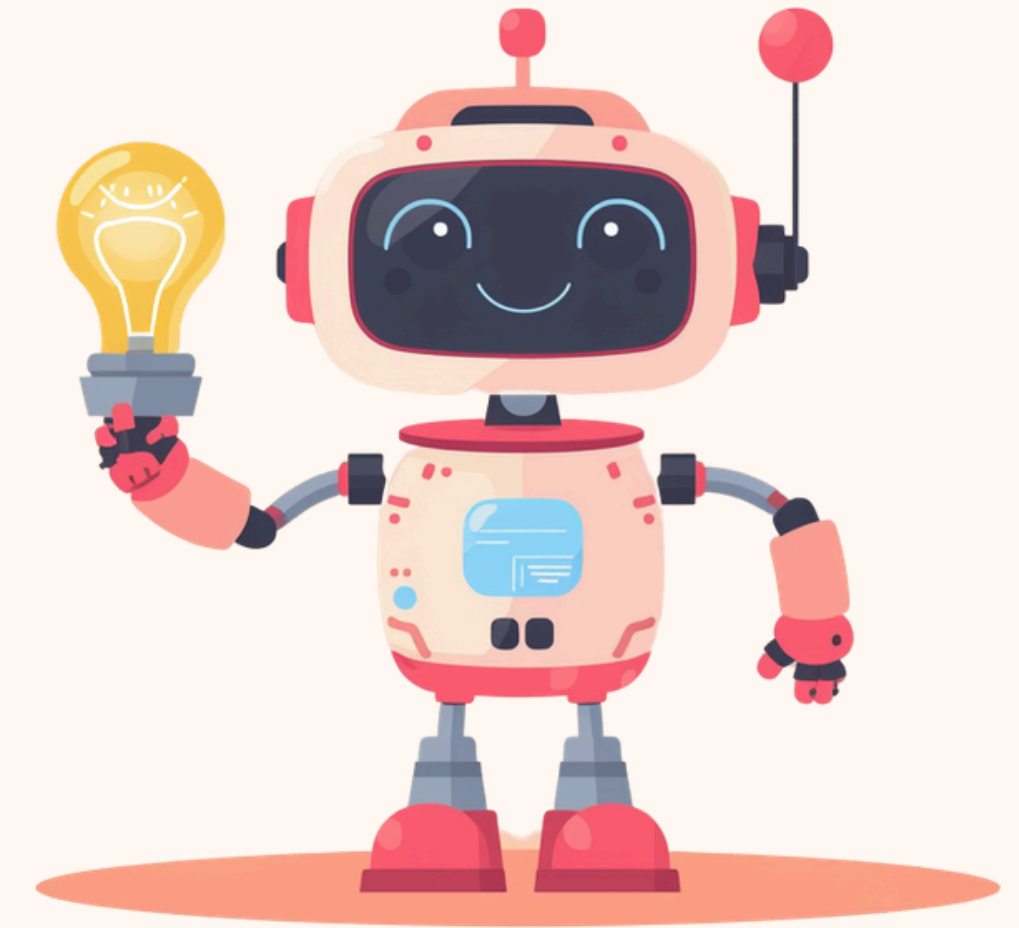

"At school, I love to read ____" (books, stories, comics)

"My favourite fruit is a juicy ____" (mango, apple,
banana)

WHAT AI CAN DO

AI is really good at some things! It can answer questions quickly, help you write stories, translate languages, and find information from millions of books and websites. It's like having a super-fast reading helper!

WHAT AI CANNOT DO

AI doesn't understand feelings or emotions like people do. Sometimes it makes mistakes or says silly things! It can't truly think or know what's real — it just guesses based on patterns.

USING AI RESPONSIBLY

CHECK AI ANSWERS WITH ADULTS

Always ask a parent or teacher to help check what AI tells you. They can help you know if the information is correct!

KEEP PERSONAL INFO SAFE

Never share your name, address, school, or photos with AI chatbots. Your safety comes first!

USE AI TO HELP, NOT TO CHEAT

AI is a helper for learning, not for doing your homework for you. Use it to understand, then do your own work!

THE FUTURE OF AI AND LANGUAGE

LOOKING AHEAD WITH EXCITEMENT!

LET'S RECAP AND REMEMBER!

What is an LLM?

A big computer brain that learns words!

How Does ChatGPT Predict?

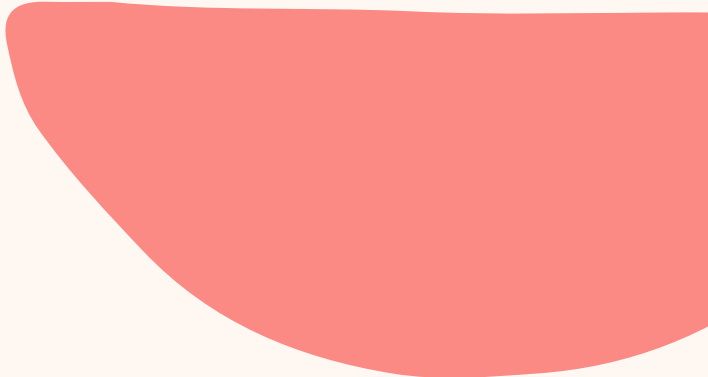

It finds patterns and guesses next words!

Why Use AI Carefully?

AI helps but needs adult guidance!

THANK YOU FOR LEARNING!
