

Order Matters!

Secret Locks & Ice Cream Bowls

1. The Great Lock Mystery

Does 9-7-4 open the
lock 4-7-9? 🤔

1. What is Ordering?

Does the order change the lock? 9-7-4 vs 4-7-9 

Arranging vs Choosing!

Order MATTERS: Arranging friends on chairs, cricket podium 🏆

Order DOESN'T Matter: Fruit salad bowl, cricket team selection 🏏

1. Quick Poll! Stand Up!

Stand up for Arranging! Sit down for Choosing!

Medal winners 🏆 | Carrom team pairs 🎯 | School assembly line-up 🏫

The Slot Method

How many ways to seat Ananya, Rohan & Diya?

1st seat: 3 choices → 2nd seat: 2 choices → 3rd seat: 1 choice

$$3 \times 2 \times 1 = 6 \text{ ways!}$$

Choosing Ice Cream Scoops!

Choose 2 scoops from Mango, Kulfi & Chocolate.

Pairs: Mango+Kulfi, Kulfi+Chocolate, Mango+Chocolate.

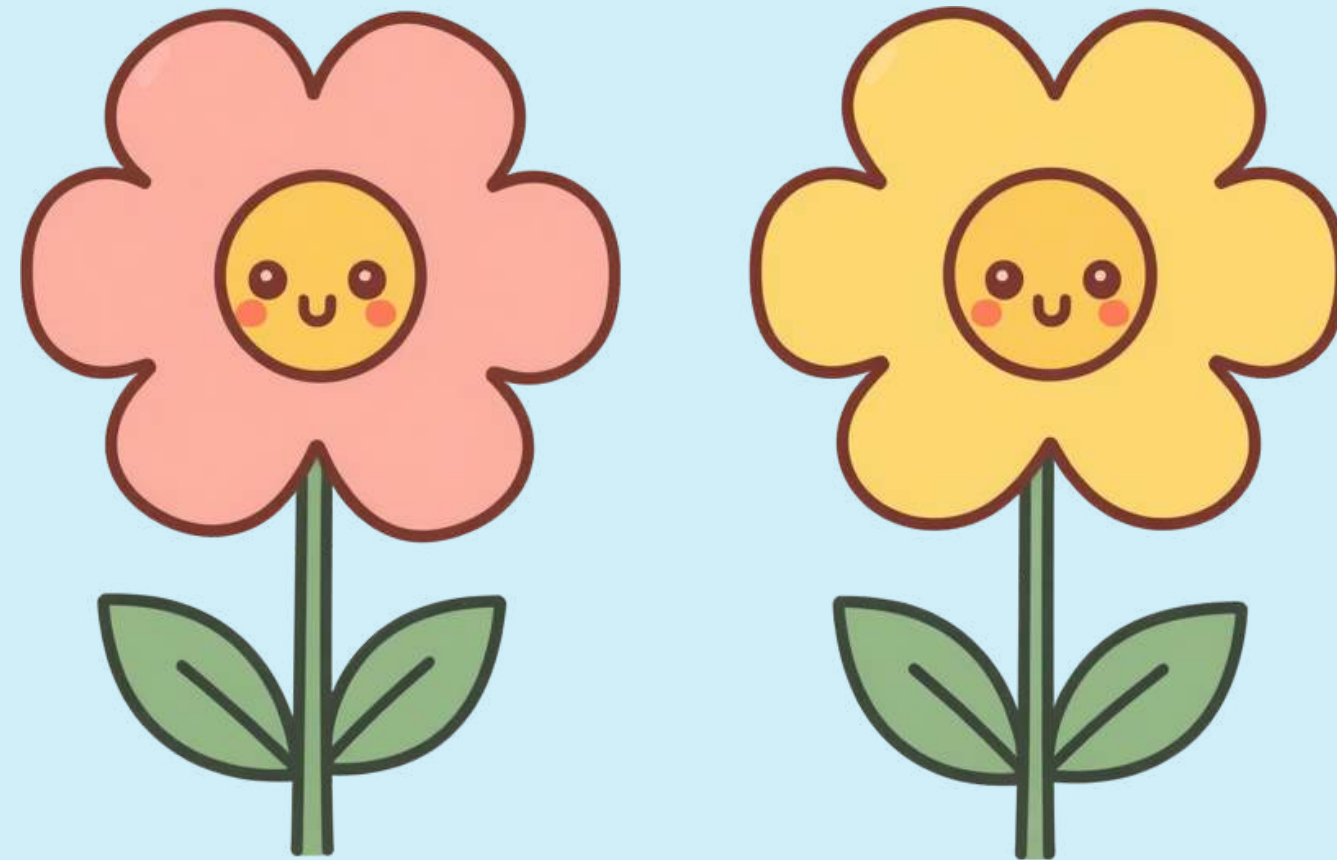

3 choices – order doesn't matter here!

Sweet Shop Helper!

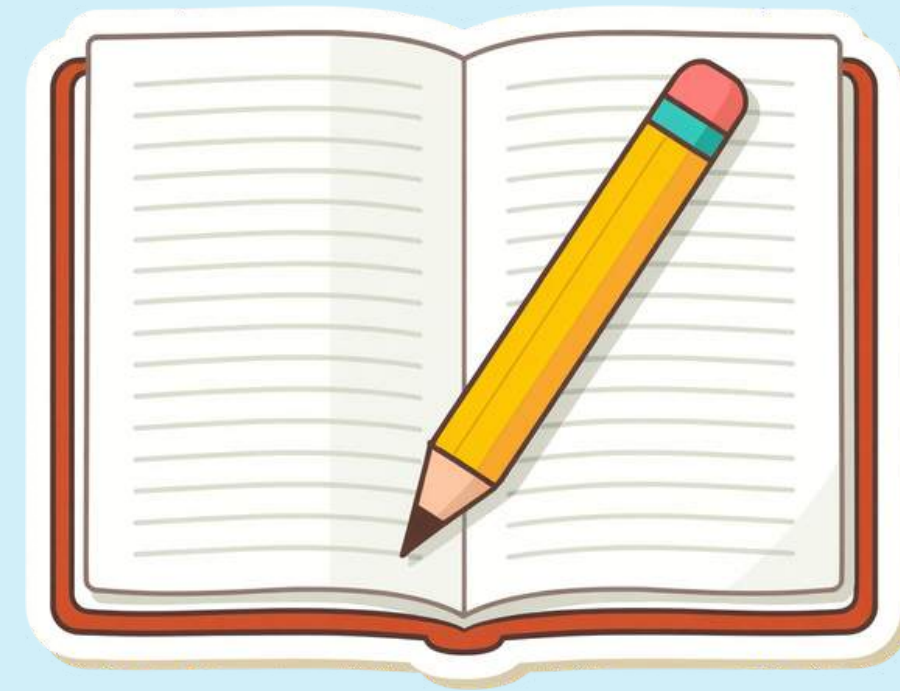

Help pick 2 sweets from
Jalebi, Laddu & Barfi!
How many sweet boxes can
you make?

Recap – What Did We Learn?

- ◆ Order matters when arranging or making codes
- ◆ Order doesn't matter when just choosing or picking
- ◆ Counting arrangements uses the slot method
- ◆ Combinations mean no repeats and no order!

Your Daily Micro-Challenge!

Find one example where ORDER MATTERS and one where it DOESN'T. Write them in your notebook tonight!

Practice Sheet Ideas

For Instructor Use Only: Practice arranging & choosing with fun puzzles – lock codes, ice cream combos & Sweet boxes!
