

Be a Demo Day Superhero!

Your Simple Guide to Sharing Your Invention with Pride

Hey Young Inventors! You worked so hard to build your amazing project. Now it is time to show it to the world! Follow this simple guide to become a stage superstar.

1. The 3 Magic Superhero Powers

To give a great presentation, you just need to remember the 3 Magic Powers:

🌟 **Power 1: Superhero Body (Stage Presence)**

Stand tall like a brave soldier. Glue your feet flat to the floor so you do not wiggle or rock. Smile big and look at your audience's hair if looking at eyes feels scary!

💡 **Power 2: Strong Voice (Speaking Tone)**

Speak clearly from your tummy. Do not whisper like a tiny mouse, and do not shout like a lion. Talk smoothly, and slow down so everyone can understand you.

💡 **Power 3: Helping Others (Solving Problems)**

Tell the audience exactly why you built your project and how it helps make people happy or protects our Earth.

2. Your 4-Step Magic Script

Use these easy steps to write your short speech. Just fill in the blanks!

Step 1: Say Hello

"Good morning everyone! My name is **[Your Name]**. Welcome to my creative showcase!"

Step 2: The Problem

"Have you ever noticed how hard it is when **[Insert a simple problem]**? I wanted to fix that!"

Step 3: Your Solution & Demo

"So, I built **[Name of Your Project]**! Let me show you how it works..." (Now, lift your project up high and show it!)

Step 4: Say Thank You

"Thank you for listening! Now I can answer any fun questions you have."

3. Tips for Your Live Show & Tell

- **Hold it High:** Lift your tablet or project up to your shoulders so everyone can see it. Do not hide it by your belly!
- **Point with Your Finger:** Use your finger to point directly at the cool buttons or shapes you are talking about.
- **Freeze and Count:** When something neat happens on your screen, hold perfectly still and count to 3 so your audience can see it clearly.

4. Answering Questions Easily

If someone asks a question at the end, do not be scared! Just do this:

- Smile and say: *"Thank you for that wonderful question!"* (This gives you time to think!)
- If you do not know the answer, smile and say: *"That is a great riddle! I don't know yet, but I will find out tonight!"* People will love your bravery!

5. What to Do If Things Go Wrong

If Your Game/App Freezes...	If You Forget Your Words...
Do not run away! Smile and say: <i>"Oh look, my app is taking a quick nap! Let me press reset."</i> Press the restart button calmly.	Take a deep breath. Take a sip of water, look down at your card, and keep going. You are doing great!

6. Being a Good Audience Friend

- **Zip Your Lips:** Sit quietly and listen when another friend is on stage.
- **Clap Loudly:** Give your friends a big cheer and happy applause when they finish!
