

How They Bend Light and Make Things Bigger!

THE MAGIC OF LENSES

Grade 4
Optics
Academy

WHY IS ONE BLURRY AND THE
OTHER SO CLEAR?

Do you wear chashmey (glasses)?

YES

NO

WHAT IS A LENS?

LENS

ee

A lens is a clear, curved piece that bends light.
It helps us see things bigger or smaller!

Key Words to Remember:

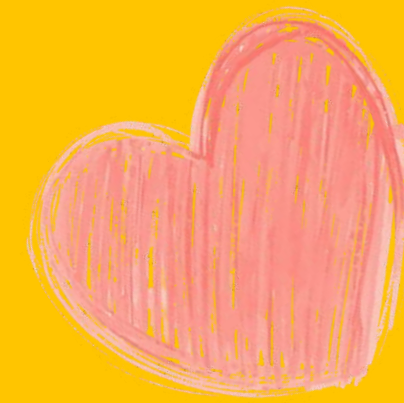

- Lens – a curved piece of glass or plastic
- Transparent – lets light pass through
- Refraction – when light bends

REFRACTION IN LEMON WATER

BEND!

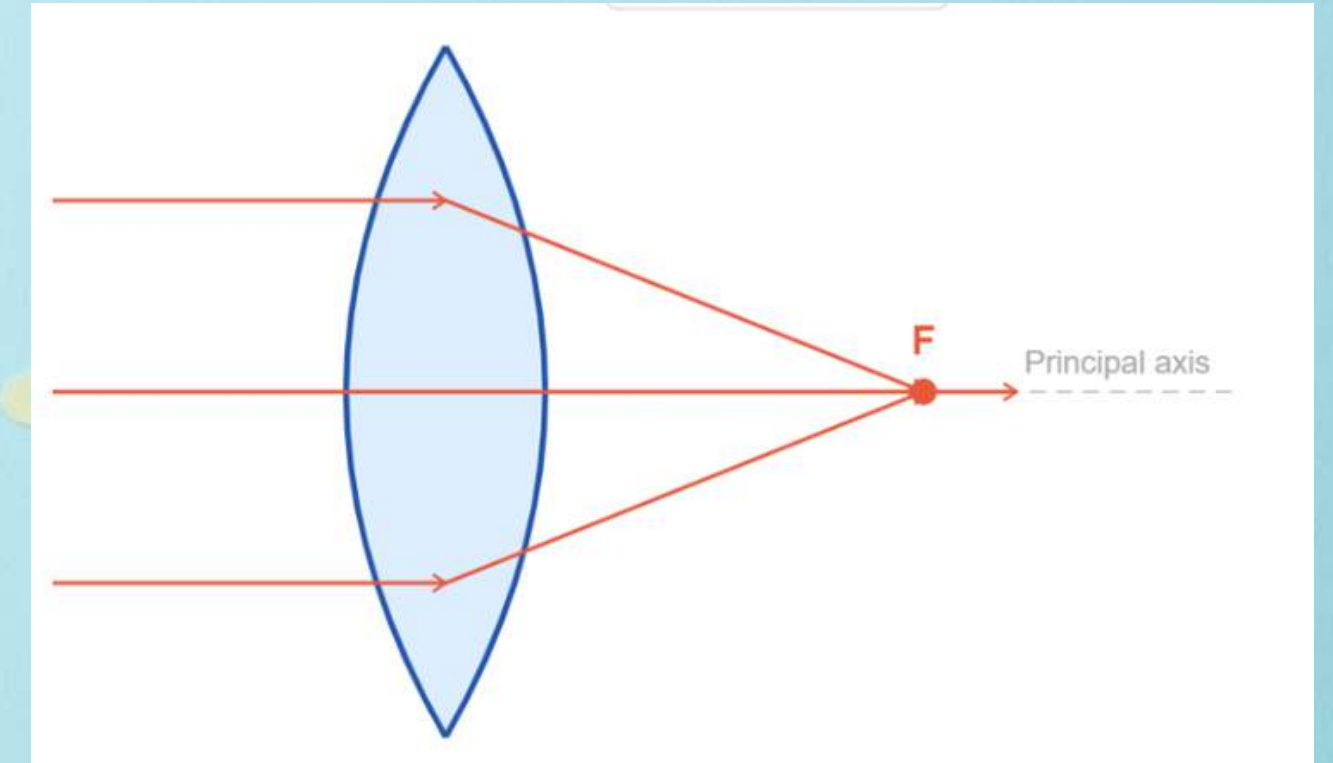

Light bends when it passes through different things like water or glass.
This is called refraction!
Look at the straw — it looks broken, but it's just light playing tricks!

CONVEX LENS

THE MAGNIFIER

- 1 Convex lens is like a laddoo shape — thicker in the middle.
- 2 It bends light rays to come together (converge). It makes things BIGGER!
- 3 Memory trick: "Convex Comes OUT — Convex Converges — Convex = BIG!"

Remember!

laddoo = convex
thick in middle!

MAGNIFYING GLASS MAGIC!

CONVEX LENS USES

SCHOOL MICROSCOPE

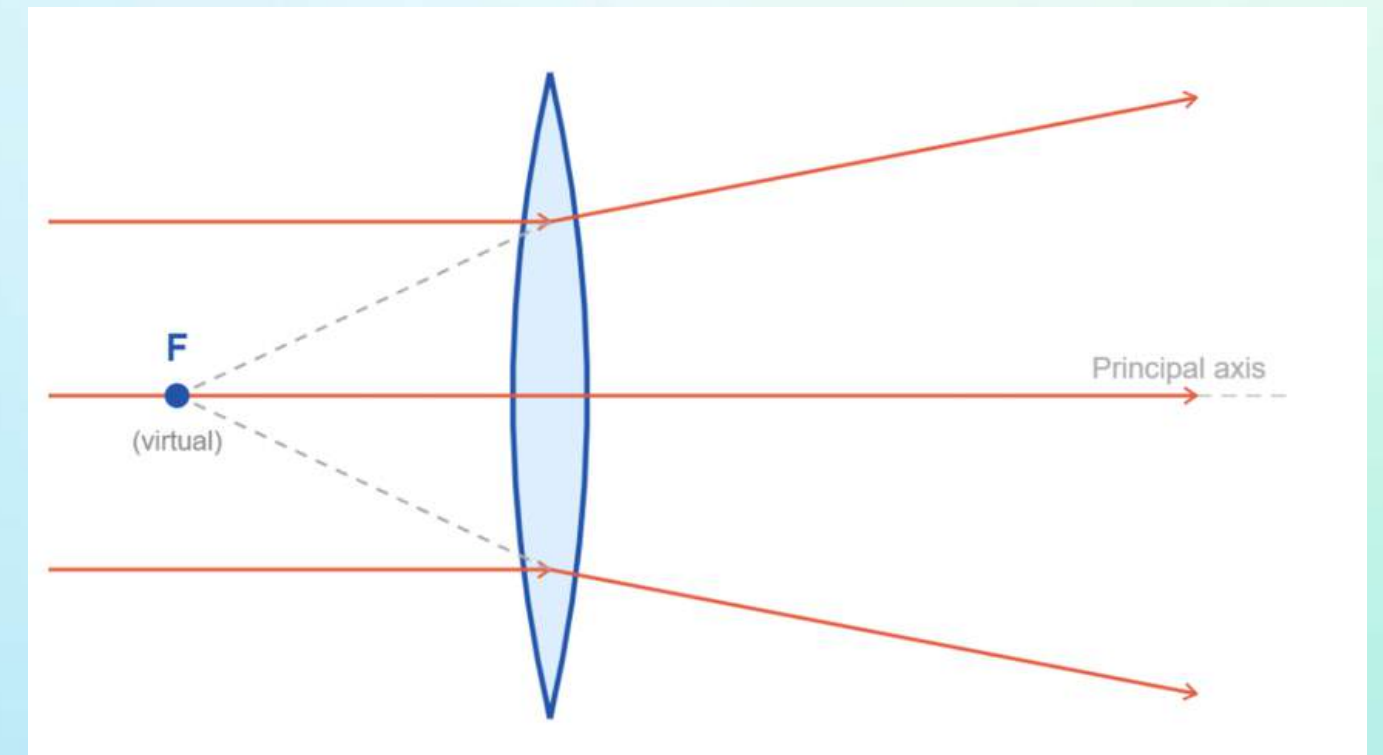

MOBILE CAMERA LENS

SCIENTISTS AND
PHOTOGRAPHERS
USE CONVEX LENSES TO
SEE BETTER!

CONCAVE LENS THE SHRINKER

- 1 Concave lens is like a cooking bowl — thinner in the middle.
- 2 It bends light rays apart (diverges). It makes things SMALLER!
- 3 Memory trick: "Concave CAVES IN like a bowl - Concave = SMALLER!"

Remember!

light spreads out
with concave!

MYOPIA GLASSES

DOOR PEEPHOLE (MAGIC EYE)

CONVEX VS CONCAVE: PART 1

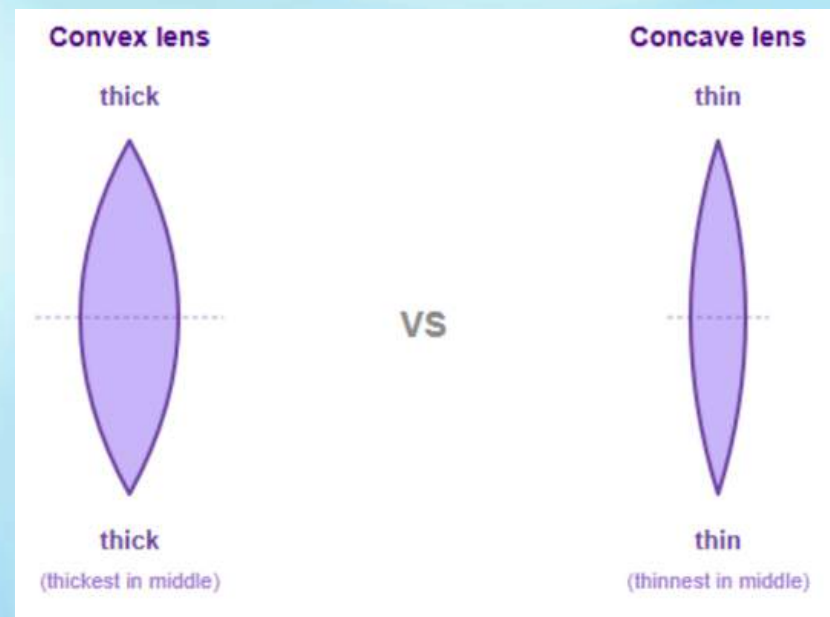

CONVEX

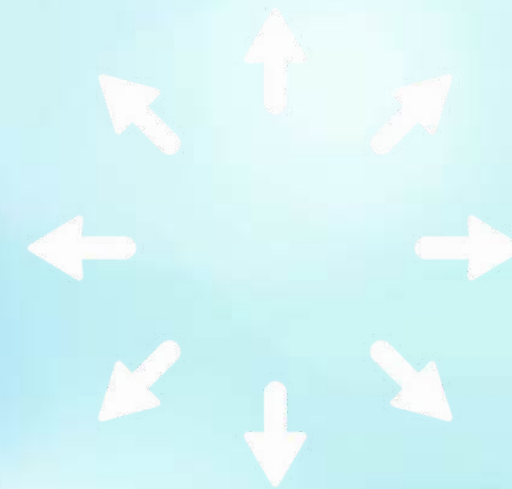

LIGHT RAYS CONVERGE

CONCAVE

THICK IN MIDDLE

RAY'S DIVERGE

(Let's Find the Lenses!)

LENS DETECTIVE ACTIVITY!

🌟 LENS DETECTIVE 🌟

CAN YOU IDENTIFY WHICH
LENS TYPE EACH OBJECT
HAS?

DADI'S READING GLASSES →
CONVEX

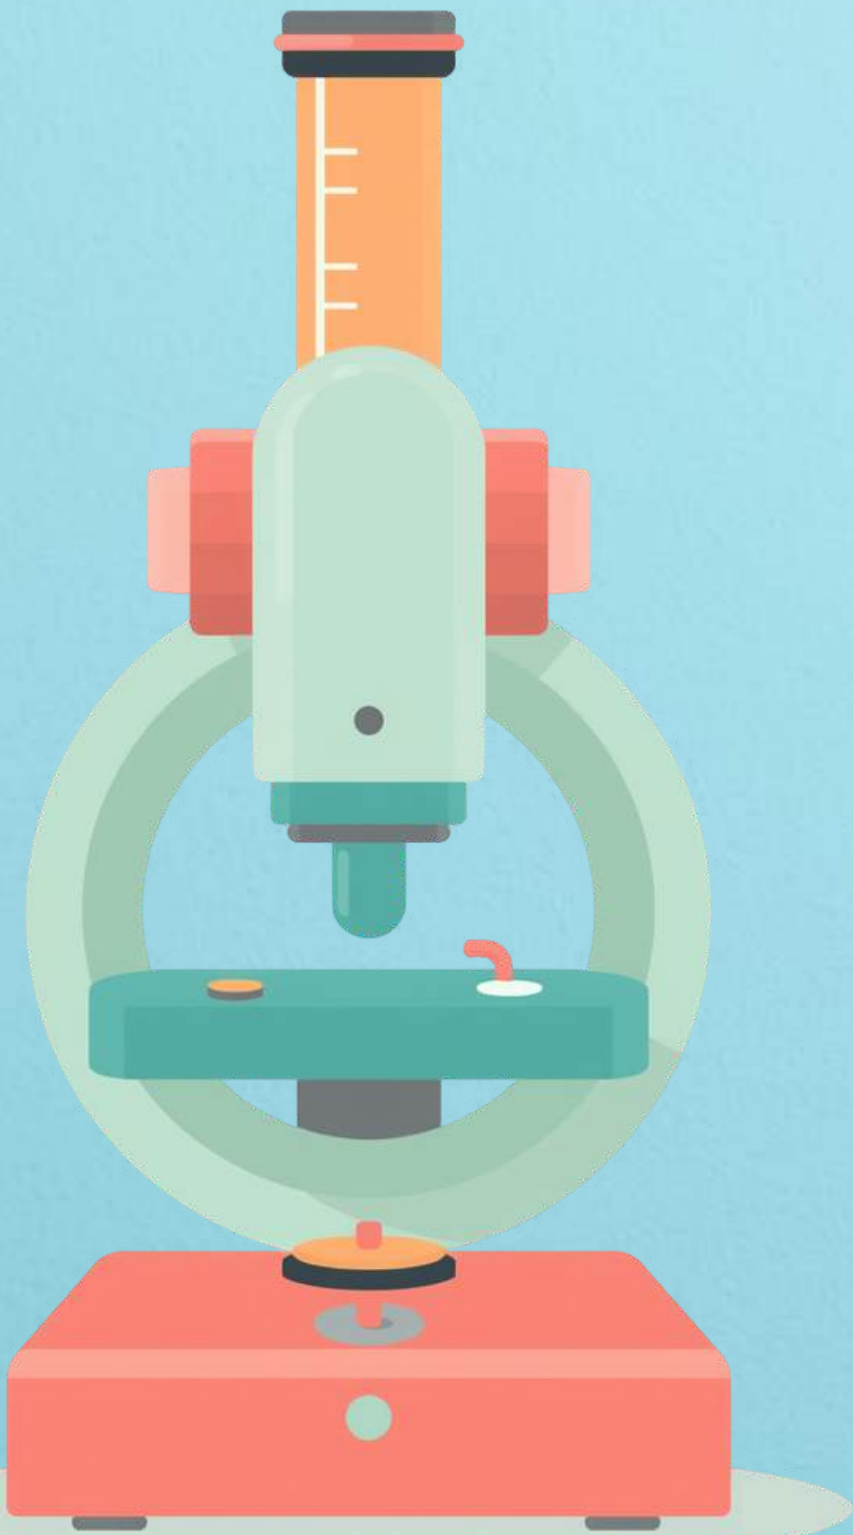

STUDENT'S MYOPIA GLASSES
→ CONCAVE

MAGNIFYING GLASS → CONVEX

WINDOW GLASS → NO LENS

🌟 LENS DETECTIVE PART 2 🌟

CAN YOU IDENTIFY WHICH LENS TYPE EACH OBJECT HAS?

DOOR PEEPHOLE → CONCAVE

MOBILE CAMERA → CONVEX

BATHROOM MIRROR → NOT A LENS!

SCHOOL MICROSCOPE → CONVEX

RECAP: WHAT DID WE LEARN?

Lens bends light — this is called refraction!

Convex = laddoo shape, converges light, makes things BIGGER!

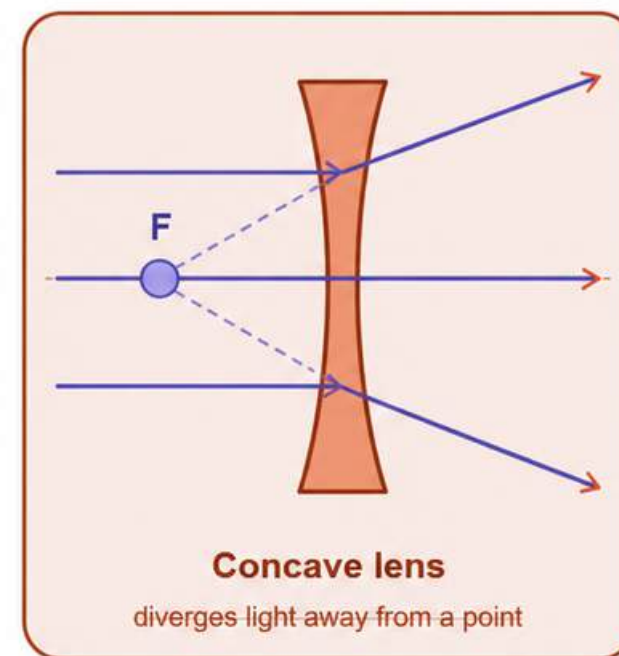

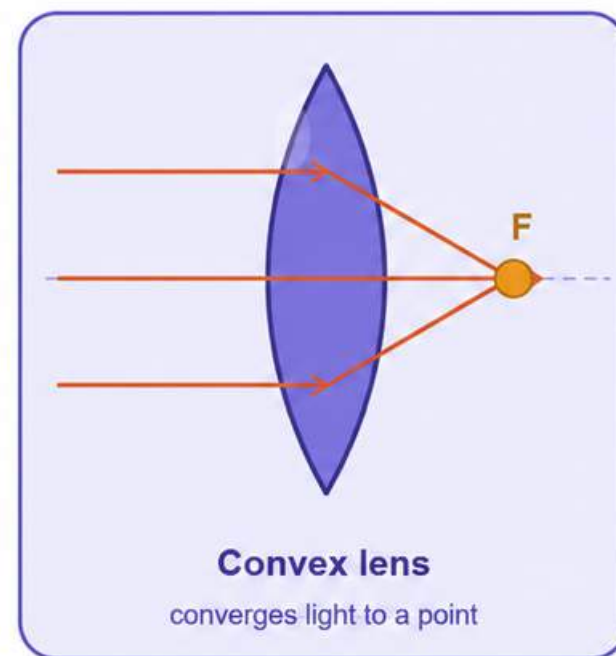

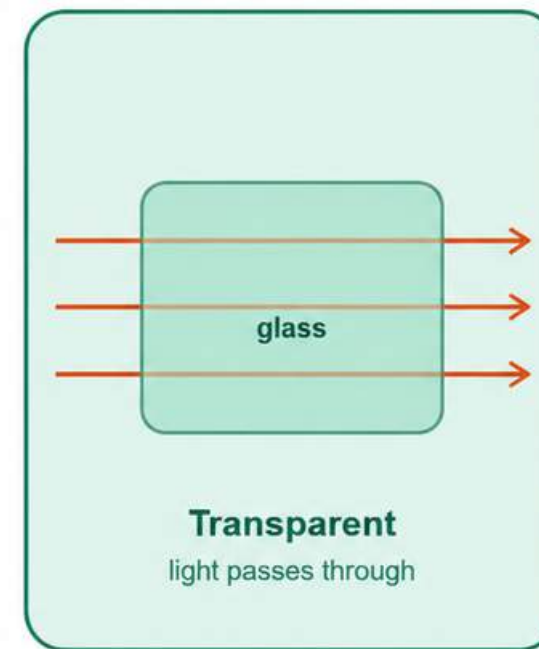

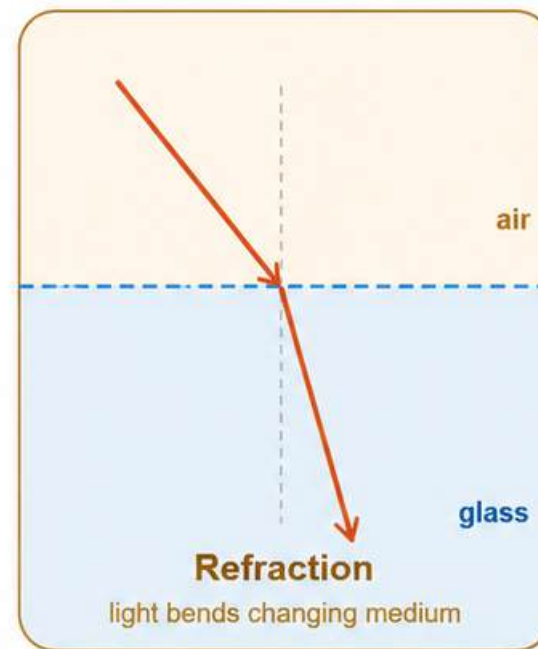

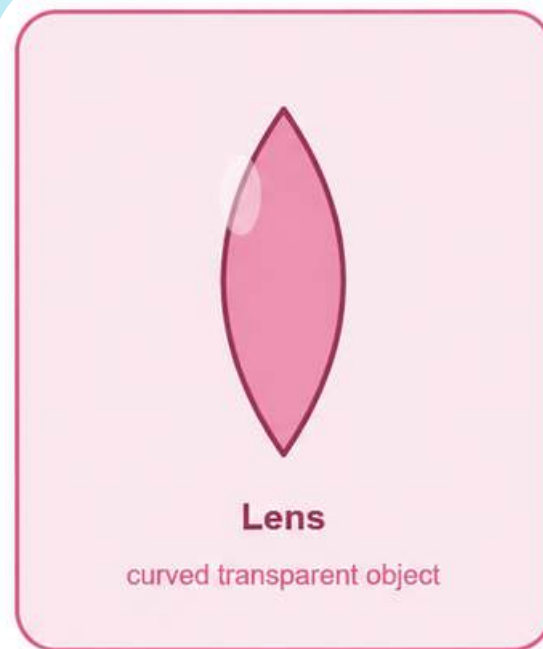

Concave = Karahi shape, diverges light, makes things SMALLER!

Great Job!

Indian examples help us see and explore!

VOCABULARY FLASHCARDS

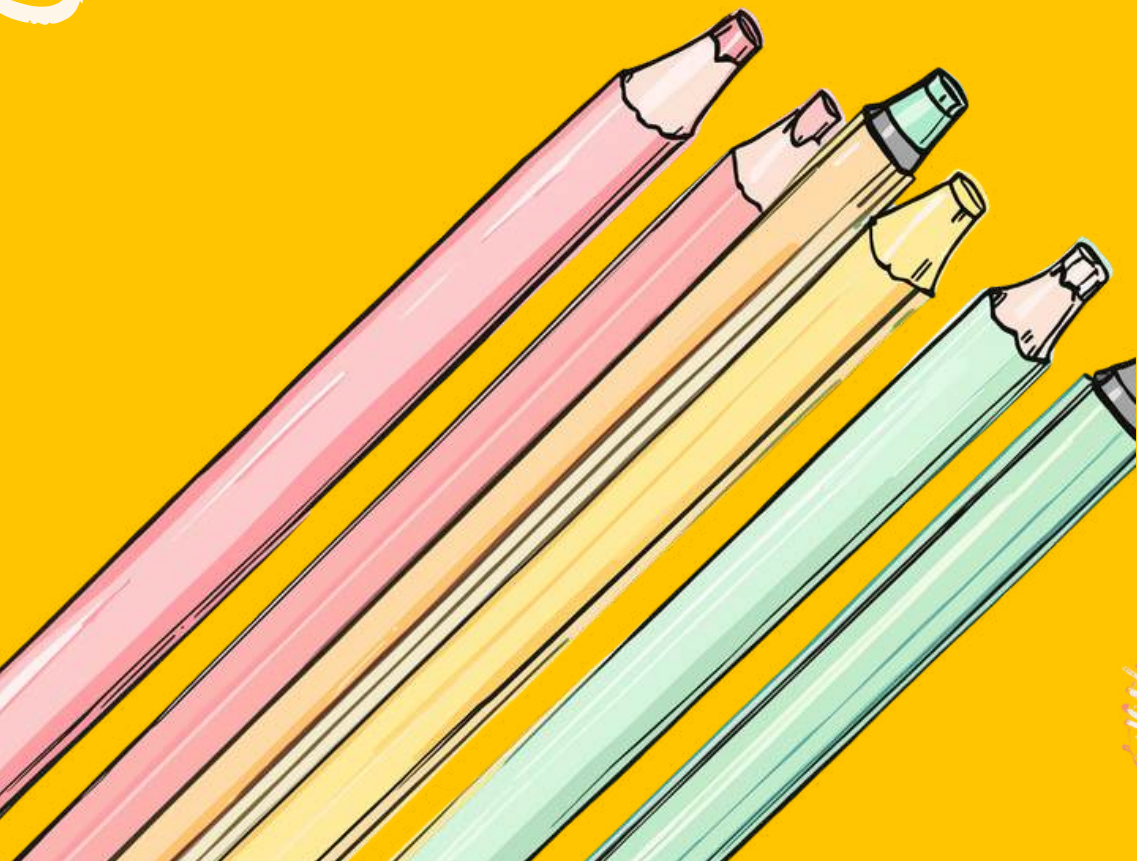

LENS HUNT HOMEWORK

FUN!

Find 3 objects with lenses at home.
Draw them in your notebook.
Write if each lens is convex or concave.
Ask your family to help you search!
Be creative with your drawings!

Thank You for Learning with Us!

**YOU'RE AMAZING
LENS DETECTIVES!**
