

Sorting Fun with Riya!

Let us learn to put things in order!

Planrs Academy • Grade 1 Learning Series

Meet Riya!

Meet Riya. Riya loves books!

But look at her bookshelf today. Oh no!

It is a very big mess!

[Picture: A messy shelf with books upside down and mixed up]

Riya wants to find her favorite Panchatantra storybook. Where is it?

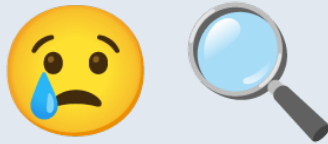

The Big Search

Riya looks and looks.

She looks behind the toys.

She looks under the papers.

She searches for 5 long minutes!

[Picture: Riya looking sad, looking for her lost book]

Riya is very sad. She cannot find her book anywhere. It is lost in the mess!

What is Sorting?

Let us help Riya! We can use a magic trick called **Sorting**.

Sorting = Putting things in a special ORDER!

 Messy →  Clean &
Orderly

[Picture: Scattered items turning into clean neat rows]

When we sort things, life becomes easy! We save time and avoid confusion.

Sorting by Size

We can sort things by how **big** or **small** they are.

Look at Amma in the kitchen!

Amma stacks the shiny steel tiffin dabbas.

She puts the **biggest** dabba at the bottom.

She puts the **smallest** dabba on top!

[Picture: 3 steel tiffin dabbas stacked from biggest to smallest]

Sorting by Height

We can sort people by how **tall** or **short** they are.

Listen! The morning bell rings at school.

PT Sir says: "Stand in a line for assembly!"

The **shortest** student stands first.

The **tallest** student stands last!

[Picture: Children standing in order from shortest to tallest]

Sorting by Value

We can sort money by how much it is **worth**.

Papa comes home from the market.

He has shiny rupee coins in his pocket.

He groups all the 1 Rupee coins together.

He groups all the 2 Rupee coins together.

He groups all the 5 Rupee coins together!

[Picture: Separate piles of ₹1, ₹2, and ₹5 coins]

The Special Rules

To sort, we need a **Sorting Rule**. Here are two fun rules:

Rule A: Small to Big (Ascending)

Like counting rupee coins: 1, 2, 5, 10!

Rule B: Big to Small (Descending)

Like stacking sweet laddoos: Biggest laddoo first!

Rule C: Same with Same

We can also group things that look the same!

Look at the beautiful Rangoli at the door!

Meena sorts the bright Rangoli powder.

Red powder goes into the red cup.

Blue powder goes into the blue cup.

Yellow powder goes into the yellow cup!

[Picture: Red, blue, and yellow powders sorted into neat matching cups]

How to Sort in 3 Steps!

You can sort anything with these simple steps:

1. **LOOK:** Look at all the messy things together.
2. **DECIDE:** Choose your rule (Size? Colour? Height?).
3. **PLACE:** Place each item in its right spot, one by one.

Riya sorted her bookshelf! Now she can find her Panchatantra book in just 5 seconds! Yay!

Let us Play a Game!

Question 1: What does 'Sorting' mean?

A) Hiding your toys under the bed.

B) Putting things in a special order.

Question 2: How does Amma stack tiffin dabbas?

A) Biggest at the bottom, smallest on top.

B) Smallest at the bottom, biggest on top.

You are a Sorting Star!

Great job! You learned how to sort today!

SORTING STAR BADGE

"Oops! Let us try again if you missed any!"

Today I Learned (For Parents): Today, your child learned the concept of sorting (putting items in order by size, height, and value). Practice at home by stacking tiffin dabbas or grouping coins together!
