

OUR TIFFIN CHART!

Math – Data Collection & Bar Graph (Grade 1)

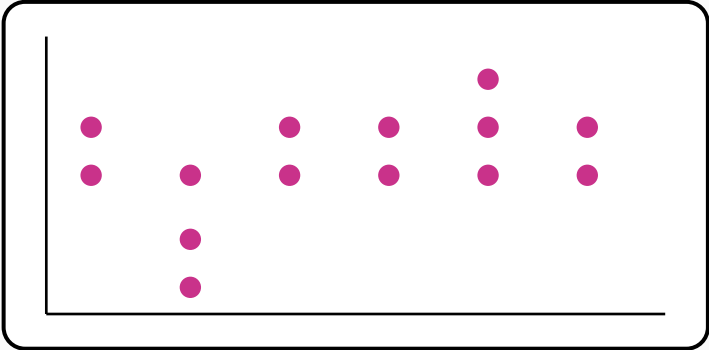

THE TIFFIN BOX MYSTERY

Ramesh bhaiya the school cook wants to make the **BEST tiffin ever** — but he needs **YOUR help!**
Let's solve the mystery together!

WHAT IS DATA?

information we collect and count!

Data means information we collect by asking questions or counting things.

Like the sabziwala counting how many kilos of tomatoes he sold!

■ Examples of Data

• Number of students in class	• Favourite colours in your group
• How children come to school	• Types of tiffin brought to school

WHAT ARE TALLY MARKS?

Tally marks help us count easily!

1	
2	
3	
4	
5	 /

Draw lines to count:

| = 1, || = 2, ||| = 3, |||| = 4
and cross for 5: |||||

Like kirana aunty marking biscuit
packets sold!

LET'S PRACTICE TALLY MARKS!

Count it. Draw it.

Number	Tally Mark	Your Turn — Draw It!
1		
2		
3		
4		
5		

WHAT IS A TALLY CHART?

A table to organize our counting!

Category	Tally	Total

+++++

A tally chart has 3 parts:

- **Category:**
What we are counting
- **Tally:**
Our tally marks
- **Total:**
The final number

SAMPLE TALLY CHART

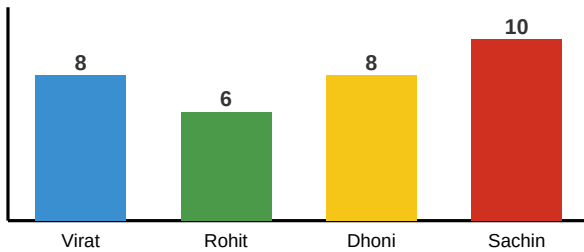

How many children like each fruit?

Fruit ■	Tally Marks	Total
Mango ■		4
Banana ■		3
Apple ■		5
Guava ■		2

WHAT IS A BAR GRAPH?

A picture that shows data with bars!

Runs Scored

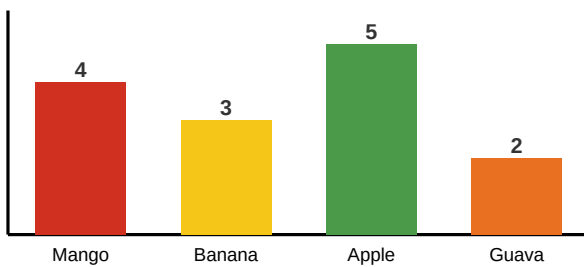

Categories go on the BOTTOM
(player names or things we count)

Numbers go on the SIDE (0–10)

Like a cricket scoreboard!

FROM TALLY CHART TO BAR GRAPH

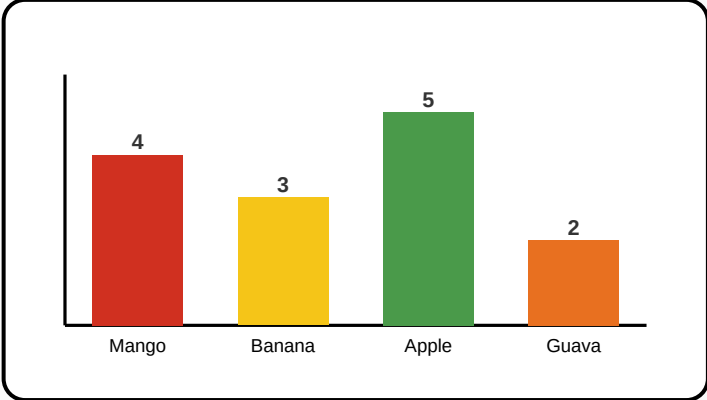

Bars show how many — taller means more!

- Turn tallies into colourful bars!
- Taller bars = MORE votes
- Shorter bars = FEWER votes
- Look at the tallest bar to find the MOST POPULAR choice!

READING BAR GRAPHS!

Look at the Favourite Fruit bar graph and answer:

Q1: How many children like mango?

A: _____

Q2: Which fruit is most popular?

A: _____

Q3: Which two fruits have the same number of votes?

A: _____

Answers

Q1: 4 children like mango	Q2: Apple (5 votes) is most popular
Q3: Mango (4) & Banana (3) — wait, none have the same!	There is no tie in this chart.

I AM A DATA DETECTIVE!

Student Activity

Task 1

Read the tally chart showing how children come to school (Walk, Cycle, Auto, Car).

Task 2

Colour the bar graph below using the same transport data.

Task 3

Ask 5 friends about their favourite tiffin snack (Roti, Idli, Paratha, Sandwich) and make tally marks!

Task 3 — My Tally Chart:

Tiffin Snack	Tally Marks	Total
Roti ■		
Idli ■		
Paratha ■		
Sandwich ■		

DATA DETECTIVE CHALLENGE!

Thumbs up or thumbs down? Let's test what you learned!

■ TRUE

Tally marks help us count.

■ TRUE

A tally chart has categories.

■ FALSE

Taller bars mean FEWER votes.

■ TRUE

Data is information we collect and count.

■ TRUE

Bar graphs make it easy to compare.

PARENT CORNER

Fun activities to try at home!

■ Family Survey

Ask everyone at home: "What is your favourite snack?" Write down all the answers and make tally marks together!

■ Draw a Bar Graph

Once you have your tally marks, help your child draw a bar graph on plain paper. Use different colours for each bar!

■ Market Data

Next time you visit a sabzi mandi or kirana store, count how many of each vegetable you see. Make a quick tally chart together!

■ Tally Games

Roll a dice 10 times. Make a tally chart of each number (1–6) that comes up. Which number appeared the most?

DATA DETECTIVE CHANT!

COLLECT it!

COUNT it!

CHART it!

That's DATA! ■

You are now a **Certified Data Detective! ■**

THANK YOU, DATA DETECTIVES!

Keep exploring the world of data!
