

■ Build a Python Chatbot!

A fun coding lesson for young programmers!

■ What is AI? What is a Chatbot?

■ What is AI?

AI (Artificial Intelligence) helps computers learn to think and talk — just like people do!

■ What is a Chatbot?

A chatbot is a computer friend that chats with you! It reads your messages and replies back. "Hi! How are you?"

■ Why Do We Use Chatbots?

Answer Questions Anytime

Make Learning Fun

Always Ready to Help

■ Meet Python — Our Coding Friend!

Python is a **simple language computers understand**. It uses simple words like **print** and **input** to talk to computers. Even kids can learn it!

■ Basic Python Concepts — Four Magic Words!

print

Show messages

input

Ask questions

variables

Store words

if

Make choices

■■ How Does a Chatbot Work?

1. Listen It hears what you type.

■ **2. Think** It finds the best answer.

■ **3. Talk Back** It sends a friendly reply!

■■ Build Your Chatbot — 4 Steps!

■ **Step 1 — Plan Your Chatbot**

Think of greetings like "Hello!" • Plan fun questions like "What is your name?" • Decide friendly answers for each question.

■ **Step 2 — Write Your Code**

Open Python and type your chatbot code. Run it and watch your chatbot say hello!

■ **Step 3 — Test Your Chatbot**

Click play, type your name, and see what happens! Try funny names — does it still work? Testing helps find mistakes.

■ **Step 4 — Make It Smarter**

Add more questions and answers • Use if statements for different replies • Add jokes and tell stories too!

■ Your First Chatbot Code!

```
print('Hello! I am your chatbot.')
name = input('What is your name? ')
print('Nice to meet you, ' + name + '!')
```

■ Run it and watch your chatbot say hello!

■ Example Chat

Yo
u: Hi!

B
ot: Hello! How can I help?

You: Tell me a joke!

Bot: Why did the computer visit the doctor? It had a virus! ■

■ Fun Chatbots You Can Build!

Quiz Bot

Ask quiz questions and check answers

Story Bot

Tell fun interactive stories

Helper Bot

Give tips and study help

Joke Bot

Tell hilarious jokes on demand!

■ What We Learned Today!

- AI is Amazing — AI helps computers learn to think and talk, just like people!
- Chatbots are Friends — Chatbots are friendly chat partners built with Python!
- Python is Fun — Writing and testing code is creative and exciting!

■ Your Next Steps!

- 1. **Write Your Code** — Open Python and build your own chatbot today!
- ■ ■ ■ ■ 2. **Share & Show** — Show your chatbot to friends and family!
- 3. **Keep Exploring** — Keep learning about Python and AI!

■ Keep coding and have fun! You are now a Python Chatbot Builder!
