

How GPS Works —Triangulation Game

Let's Learn
Together!

What is GPS?

GPS is a system that helps us find places anywhere in the world! Like a magic map in your phone!

Why Do We Need GPS?

GPS is super helpful in our everyday lives!

Finding your way home

Tracking school buses or cars

Playing fun location games

Meet the Satellites!

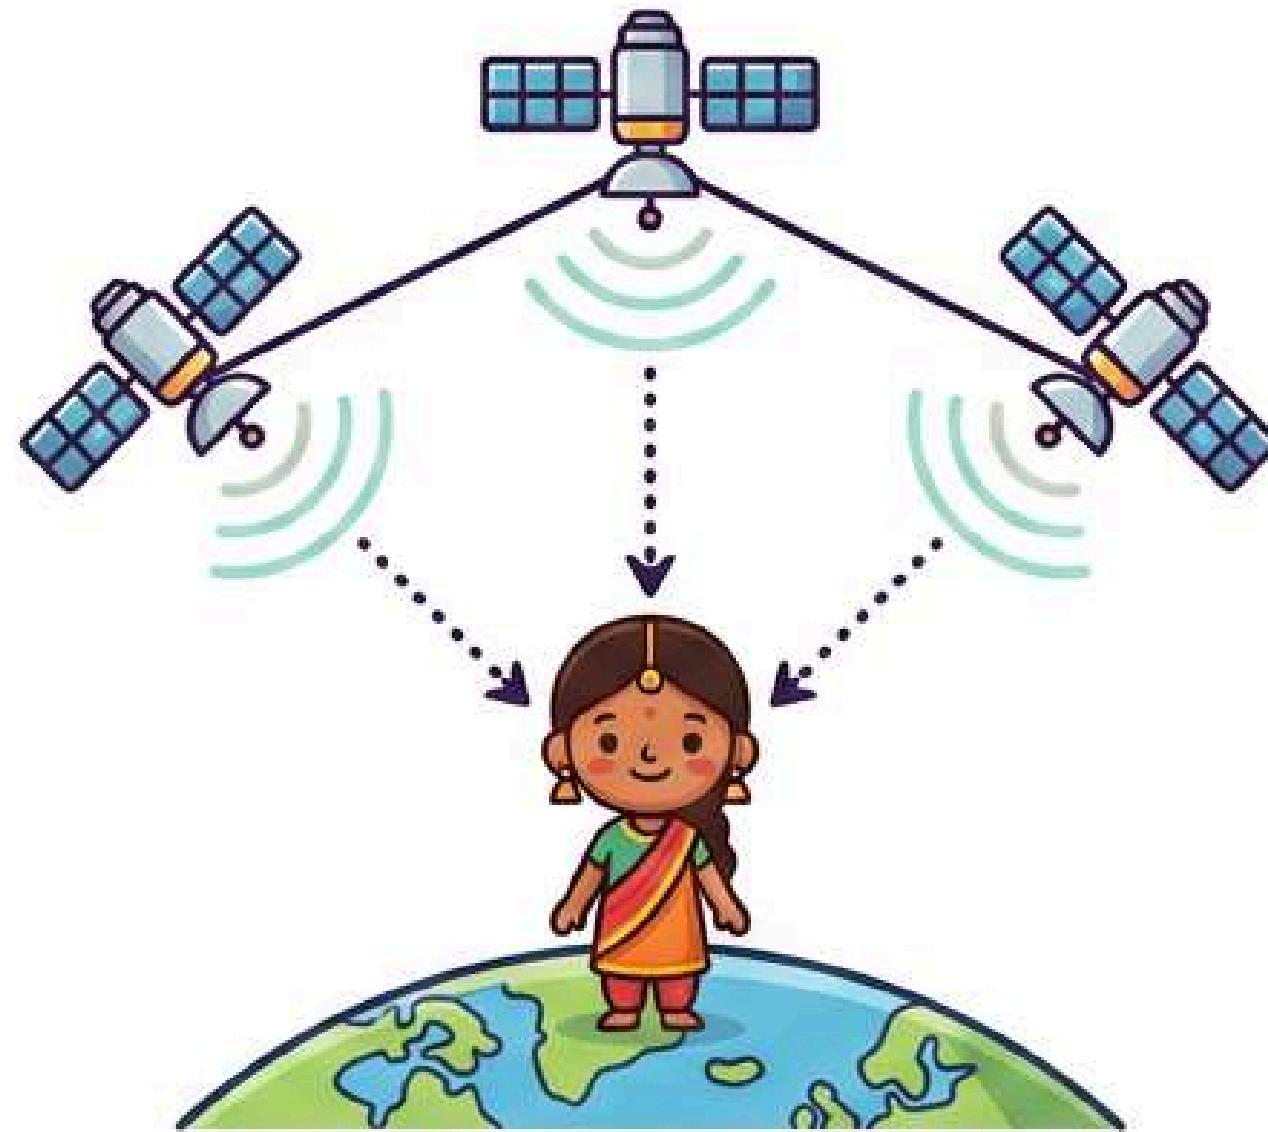

GPS satellites are like helpful friends in space!

They fly around Earth and send special signals down to us.

What is Triangulation?

The Key to GPS Magic

3 satellites working together
can pinpoint your spot!

How Triangulation Works — Step 1

Satellite 1 sends a signal that reaches you.
Imagine a big invisible circle spreading out!

Imagine you hear this
signal first!

How Triangulation Works — Step 2

Satellite 2 sends a signal too!
Now we have two circles.
Where the circles cross is the
intersecting area!

The more signals we get,
the closer we find you!

HOW TRIANGULATION WORKS — STEP 3

Satellite 3 sends a signal, and where all three circles meet is your exact spot!

The star shows exactly where you are standing!

Triangulation Game Instructions

1

Use 3 friends as
“satellites”
standing apart.

2

Each friend stands
at a different point.

3

Use string or chalk
to make circles
around each friend.

4

Find where all
circles overlap –
that’s your spot!

Let's Play Together!

Now it is your turn to try the triangulation game!
Grab some friends and strings!

1.

Get 3 friends to be
your satellites

2.

Use strings to make
circles that overlap

3.

Find your spot where all
circles meet!

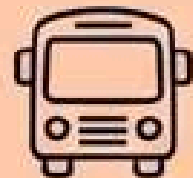

GPS AROUND US

GPS Helps Everyone, Everywhere!

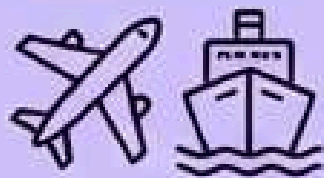

GPS is used by many people every day to find their way and stay connected with the world around them.

Navigation Apps: Help us find routes to new places.

Tracking Vehicles: Know where buses are.

Pilots & Ships: Safely travel through sky and sea.

Quick Quiz: What Did We Learn?

Test your GPS knowledge!

1. What does GPS help us do?

2. How many satellites does GPS use for triangulation?

3. What is triangulation?

Fun Fact: GPS Satellites

**There are more than
30 GPS satellites
circling Earth
right now!**

**They work
together to
help us every
day!**

Why is GPS Important for You?

GPS Benefits for Kids

Keeps you safe: GPS helps your family find you

Makes exploring fun: Discover new places with maps!

Connects us to the world: GPS links everyone everywhere!

Grade 3 AI & Digital Literacy

Thank You! Let's Keep Exploring

Thank you for learning how
GPS works! Keep playing,
exploring, and discovering!

Questions?

Do you have any questions about GPS or our triangulation game? Raise your hand and ask away!

There are no wrong questions — only curious minds!
