

PERIMETER OF IRREGULAR SHAPES — THE BOUNDARY EXPLORER

The Missing Border Mystery

A festival poster is missing its border! How do we find the length needed to fix it? Can we figure out how much border is needed to complete the decoration?

Can You Solve It?

What Is Perimeter?

Perimeter is the total distance around the outside of a shape. Like an ant walking all around the edge once!

Key Terms: Edge • Boundary • Total Distance

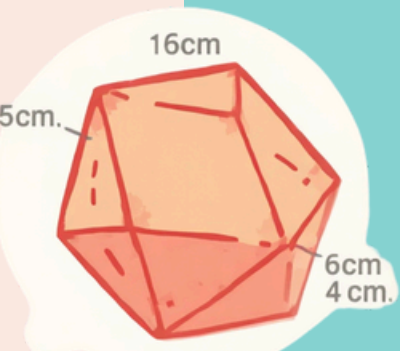

Everyday Perimeters Around Us

- ✂ Gota lace border on a Dupatta
- 🌳 Garden fences in the colony park
- 🪔 Rangoli borders during Diwali

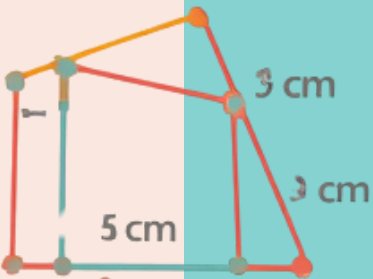

Irregular Shapes

Not All Sides Are Equal!

How to Find Perimeter

$$4 + 5 + 3 + 6 = 18 \text{ cm}$$

Let's Walk the Boundary Together

Imagine walking all around the shape like
an ant. What do you think the total
distance is?

Practical Activity

The L-Shaped Garden

Solution Walkthrough

$$5 + 7 = 12$$

$$12 + 4 = 16$$

$$16 + 6 = 22$$

$$22 + 3 = 25$$

$$25 + 5 = 30 \text{ cm}$$

Interactive Practice

Rangoli Borders

Why Add Every Side?

All sides form the
boundary path
Missing sides leave gaps

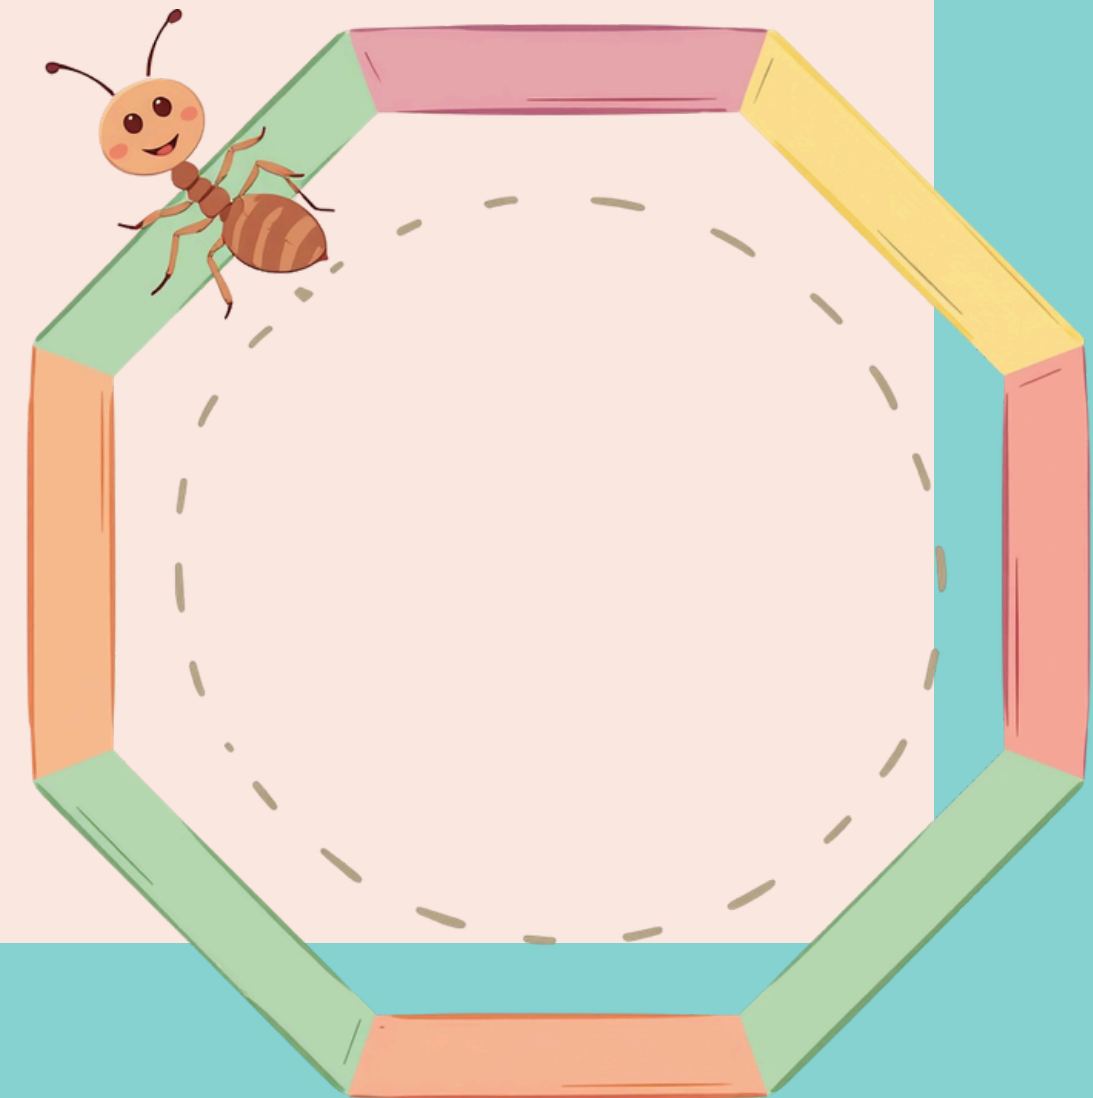

Adding all sides gives the
true perimeter

Summary — The Ant Walk Mental Check

Perimeter is the total distance around a shape. Add all sides, even if the shape is irregular.

Quick Quiz: Can you explain what perimeter means?

Explore Perimeters Around You!

Look for perimeters at home and outside! Check the fence around your garden, picture frames on the wall, or Rangoli borders during festivals. Try measuring the perimeter of your favorite shape today!
