

JAVASCRIPT DOM MANIPULATION

DEEP DIVE

Search ...

MAGIC WEBPAGE DEMO

Watch closely! The heading on the screen will change without reloading the page. This is the magic of JavaScript!

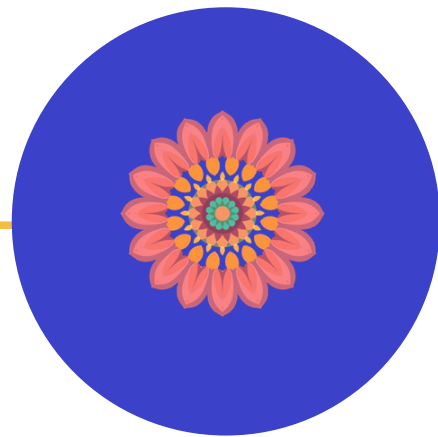

No page refresh needed — just pure JavaScript magic!

Search ...

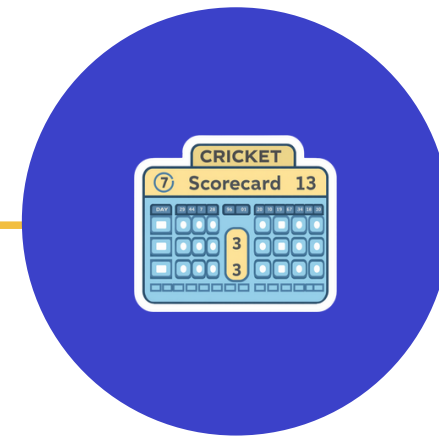

WHAT IS THE DOM?

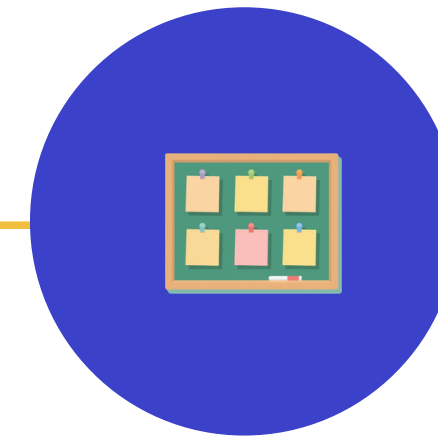

DIWALI RANGOLI

Colors we can repaint
anytime to make new
beautiful patterns!

CRICKET SCORECARD

Boxes we update
when runs are scored
in the match!

NOTICE BOARD

Paper slips we
replace with new
announcements!

THE DOM TREE

01

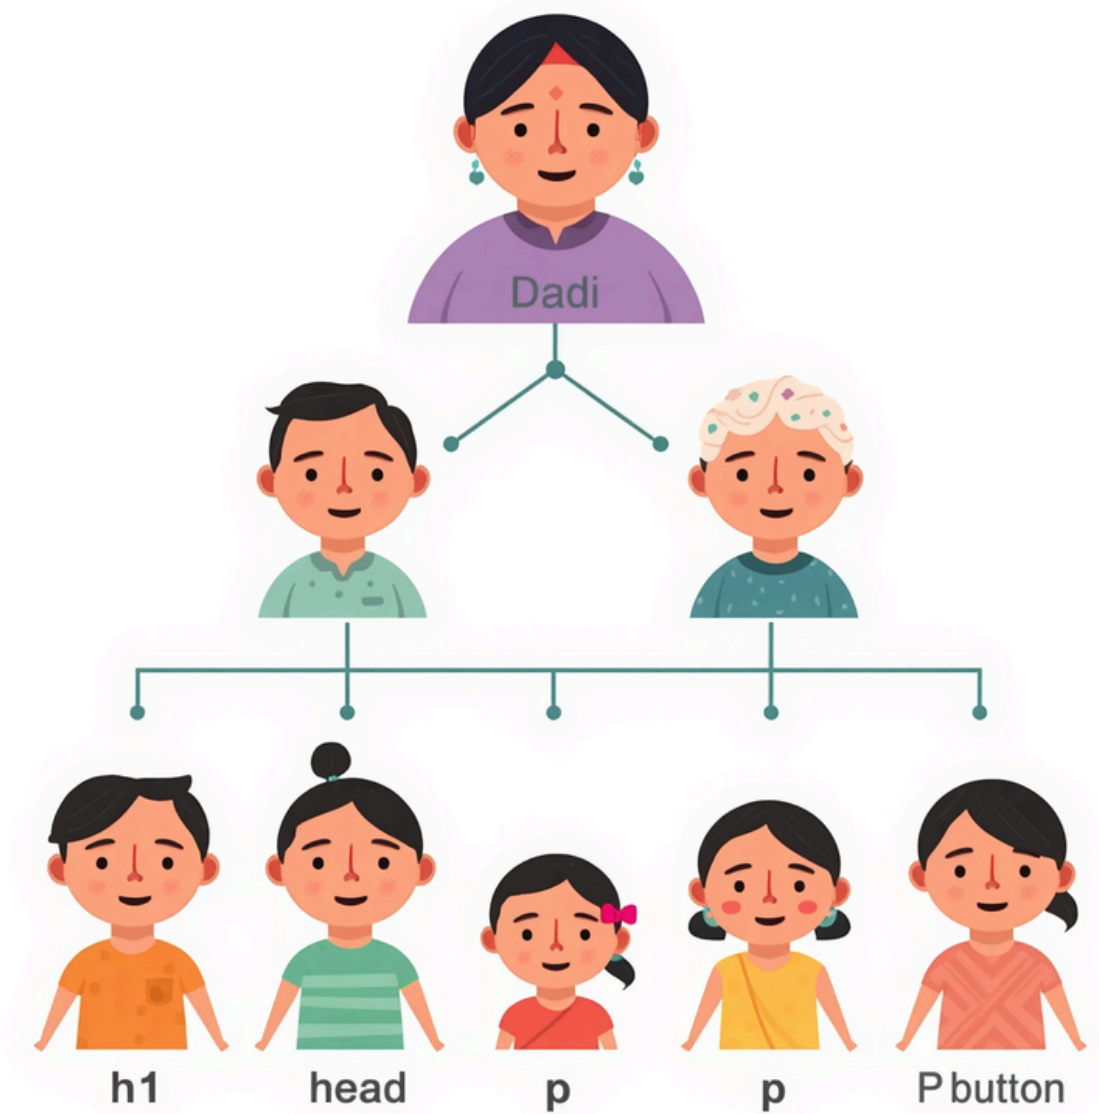

GRANDMOTHER AT TOP (HTML)

Like grandmother in a family tree, html is the top parent with head and body as children.

02

CHILDREN ELEMENTS

Body has children like h1, p, and button — just like kids in a family!

JAVASCRIPT – THE HELPER

JavaScript is the helper that changes the webpage! It can find parts, change words, and make things happen when you click!

MEET YOUR HELPER

Just like a helpful friend with tools, JavaScript helps you build and change webpages!

SELECTING ELEMENTS WITH GETELEMENTBYID()

01

SCHOOL ROLL NUMBER

Like when teacher calls your roll number — only ONE student stands up!

02

AADHAR CARD ID

Every person has a unique Aadhar number — getElementById finds ONE element!

issIn in selectI is; that solo me standing student, my tirial of stue roll-number'a fresent 4:

CHANGING TEXT WITH .INNERHTML

Change words inside like WhatsApp status or chai shop menu! Use .innerHTML to update what's written inside any element.

CODE EXAMPLE

```
document.getElementById('myHeading').innerHTML =  
'Namaste, India!'
```

INTERACTIVE CHECK-IN QUIZ

01

QUESTION 1

What is the DOM like?
a) Rangoli b) TV c) Car

02

QUESTION 2

What does getElementById() do?
a) Find one part b) Change color c) Play music

USING ONCLICK EVENTS

Clicking is like ringing a doorbell or temple bell! When you click a button, it triggers an action — just like pressing a doorbell makes it ring!

CODE EXAMPLE

Badlo! (Change!)

WRITING FUNCTIONS IN `<script>` TAG

JavaScript code lives inside the `<script>` tag — like a recipe card with ingredients (HTML) and cooking steps (JavaScript)!

FULL FLOW RECAP

CLICK BUTTON

getElementById finds the
element by its unique ID

FIND ELEMENT

onclick calls the function
when button is clicked

CHANGE TEXT

innerHTML changes the text
inside like magic!

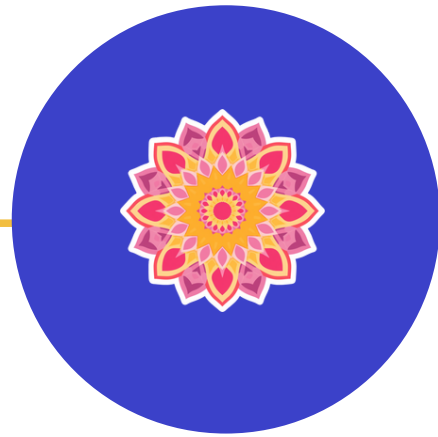

MY MAGIC NAME BOARD

Replace the name on the board with YOUR name!
Click the button and watch the magic happen!

CODE EXAMPLE

KEY TAKEAWAYS

DOM & GETELEMENTBYID

DOM is webpage parts like Rangoli. getElementById finds one part by its unique ID.

INNERHTML MAGIC

innerHTML changes text inside elements like updating your WhatsApp status!

ONCLICK EVENTS

onclick runs functions when you click, just like ringing a doorbell!

Keep Learning!

WHAT'S NEXT & HOMEWORK

01

COMING UP NEXT

More fun with events and styles! Learn to change colors and make things move!

02

YOUR HOMEWORK

Try changing your own webpage heading at home. Show your family the magic!
