

■ SCRATCH — SOUNDS & MUSIC

Grade 2 Lesson Plan

■ Explore • Record • Create ■

■ What is Scratch?

Scratch is a fun, visual programming language designed for beginners. Students drag and drop colourful code blocks to make characters move, tell stories, build games — and add sounds and music!

■ Drag & Drop Blocks

No typing needed! Snap blocks together like puzzle pieces.

■ Make Characters Move

Control sprites and bring them to life on the stage.

■ Add Sounds & Music

Use the Sounds tab to add effects and background music.

■ Why Use Sounds & Music?

■ Sounds Make It Exciting!

A pop, a clap, or a cheer makes everything more fun and exciting to play with.

■ Music Tells a Story

A happy tune means celebration. A slow beat hints that something mysterious is happening.

■ Add Funny Noises!

Animal sounds, silly voices, or catchy songs — make your friends laugh or dance!

■■ Meet the Scratch Sounds Tab

The **Sounds Tab** is your music studio inside Scratch! Here you can browse the built-in sound library, upload your own sounds, or record directly from your microphone.

■ Browse Library

Hundreds of sounds are built in — animals, music, effects and more.

■ Record Your Voice

Click the microphone icon to capture your own voice or any sound.

— ■ Edit Sounds

Trim, fade in/out, and adjust levels right inside Scratch.

■ Adding Sounds to Your Project

Step 1

Click the Sounds Tab

Step 2

Choose a Sound from the Library

Step 3

Preview the Sound

Step 4

Add it to Your Sprite or Stage

■ Key Sound Code Blocks

■ play sound

Plays the selected sound once through.

■ stop all sounds

Immediately silences every sound in the project.

■ change volume

Increase or decrease the volume by a set amount.

■ set volume to

Lock the volume to an exact percentage (0–100).

■ **Try it!** Click the green flag to play a meow sound from your sprite. Hear it come alive!

■■ Recording Your Own Sounds

■ Step 1

Click the Sounds tab and press the Record button.

■ Step 2

Speak, sing, or make a funny noise into the microphone!

■ Step 3

Try recording your name or an animal sound.

■ Step 4

Click Save to add the recording to your project.

■ Making Music in Scratch

Use the **Music extension** to access these special blocks:

■ Play Drum

Add a rhythm! Try bass drum on beat 1 and snare on beat 3.

■ Play Note

Choose a note number and duration. Try C, E, G for a happy melody!

■ Set Instrument

Pick piano, guitar, flute, and more to give your music its sound.

■ Let's Make a Song!

Step 1 ■

Add a Drum Beat Bass drum
beat 1, snare beat 3

Step 2 ■

Add a Melody Play notes C, E,
G for a happy tune

Step 3 ■

Loop It! Wrap in a 'repeat' block
— try repeat 4

■ Volume and Sound Effects

■ Whisper (Quiet)

Volume: 10 or lower

Soft as a gentle breeze or a
mouse tiptoeing across the
floor.

■ Change the Volume

Use 'set volume to' or 'change
volume by' blocks to control
loudness.

■ Shout (Loud) Volume:

90 or higher

Big and bold — like a lion
roaring or a drum banging
loudly!

■ **Try it!** Pick any sound and change its volume. Can you make it whisper, then shout?

■ Fun Sound Ideas to Try!

■ Animal Noises

Add animal sounds to a game
— cow, cat, dog, and more!

■ Funny Voice

Record yourself making a silly
voice and trigger it with a
button.

■ Background Music

Play a looping tune behind
your story or animation.

■ Button Sound Effects

Play a click or chime whenever
a button is pressed.

■ Game Win Jingle

Trigger a happy tune when the
player scores or wins!

■ Mood Music

Match music to your story —
spooky, happy, adventurous.

■ Troubleshooting Sounds

■ Check Volume

Make sure volume is turned up on your computer AND that the Scratch
volume block is not set to zero.

■ Fix Sound Blocks

Confirm that your 'play sound' block is connected inside the correct script.

■ Test Before Sharing

Always click the green flag and listen before sharing your project.

■ Recap: What Did We Learn?

■ Add & Play
Sounds

■ Record Your Own

■ Music Blocks

■ Volume Control

Great work today! You are now a Scratch Sound Star! ■ Keep coding, keep creating, and have lots of fun with sounds and music!

■ Time to Play with Sounds!

■■ Your Turn to Create!

Open Scratch and explore sounds and music. Make something amazing today!

■■■■■ Share with Friends & Family

Show your sound projects to friends and family — they will love what you made!

■ Keep Exploring!

Keep coding, keep creating, and have lots of fun with sounds and music!
