

Spreadsheets: Our Super Data Helpers!

What Is a Spreadsheet?

A spreadsheet is like a magic table that helps us organize and understand information.

It has rows, columns, and cells where we can put words and numbers!

DAY	DAY	WY	FT	RUCK
1				Rf
2				Rf
3				Rf
4				Rf
5				Rf
9				Rf
10				Rf

Why Use Spreadsheets?

Spreadsheets help us in so many ways!

Keep track of your pocket money

Organize who feeds the class pet

Record your favorite foods

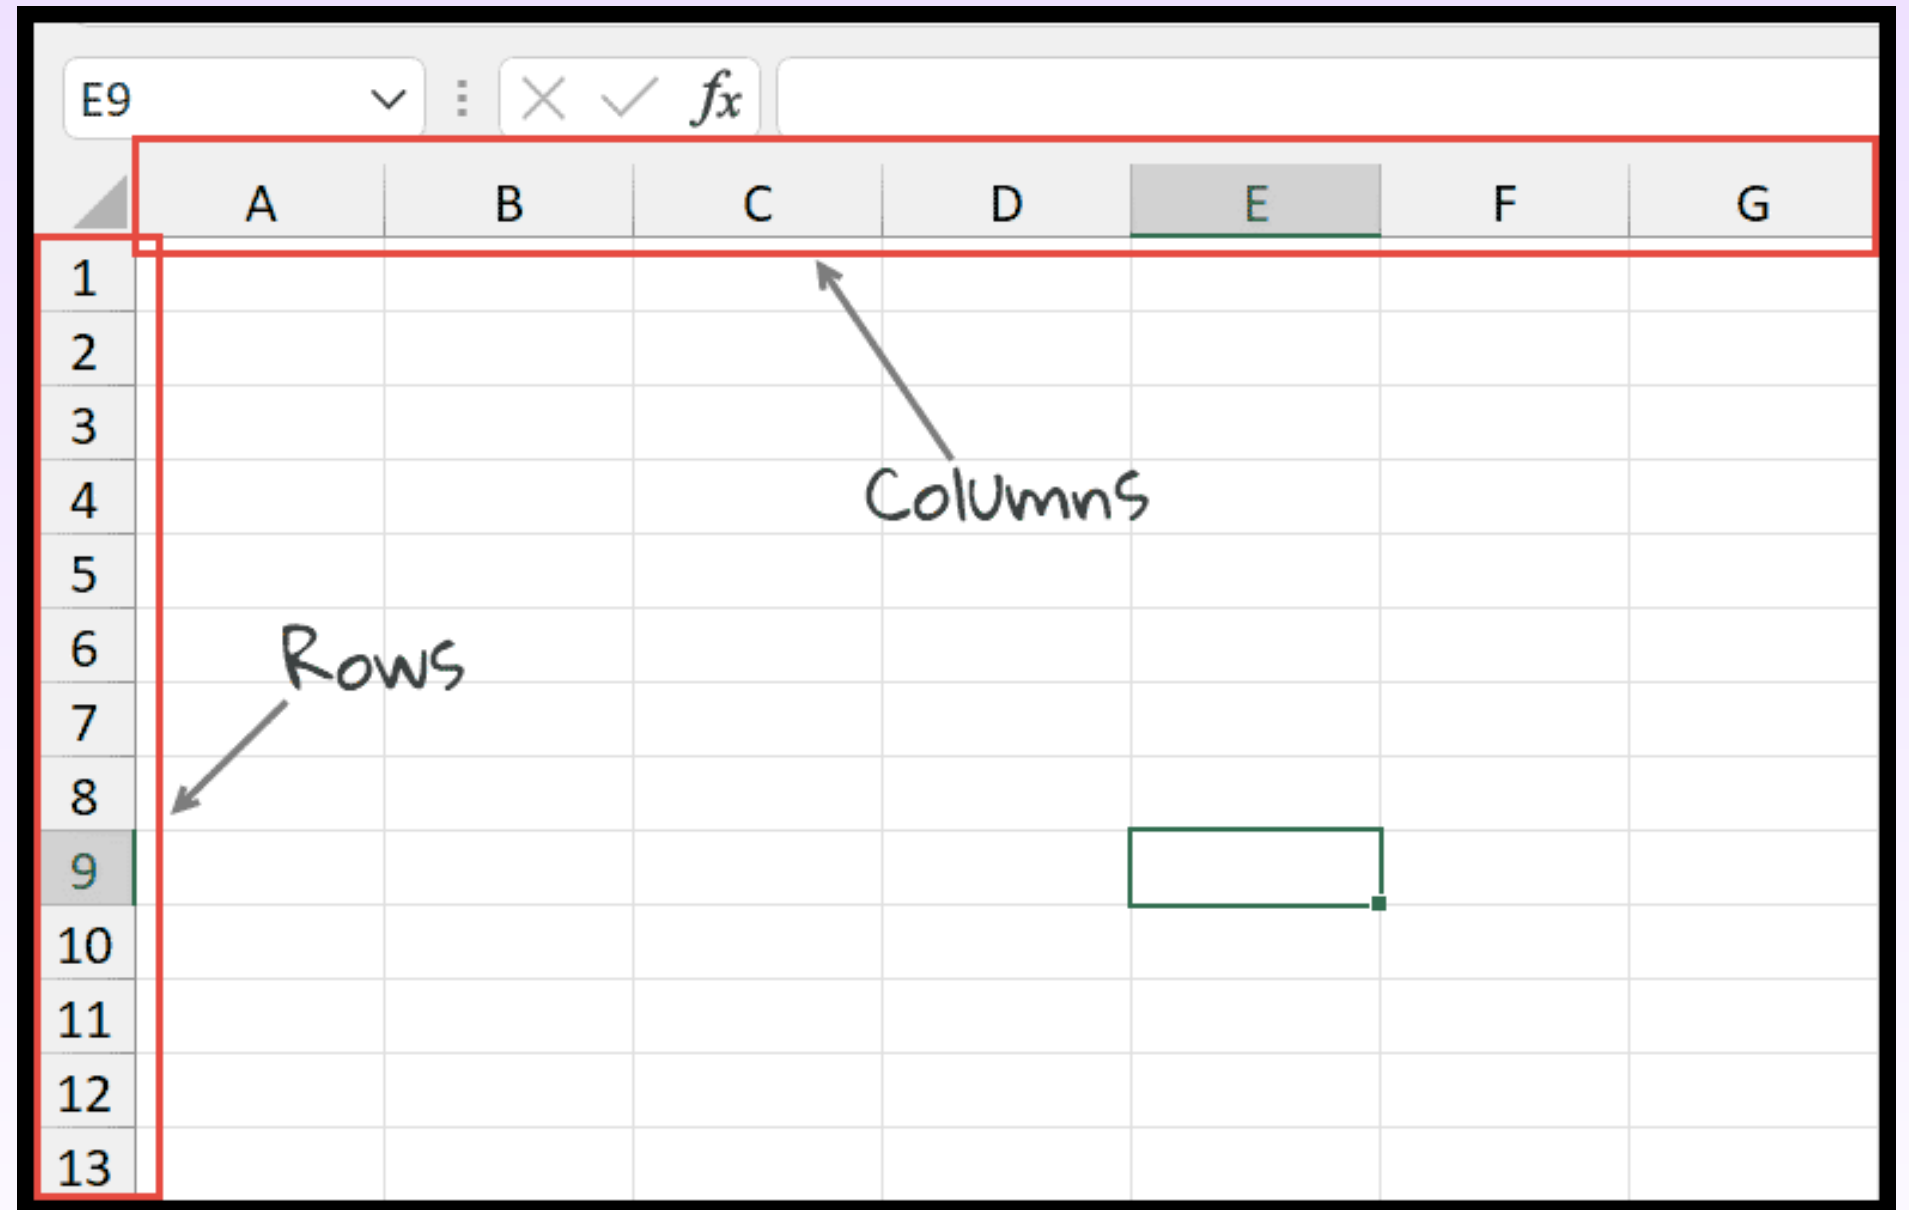

Meet the Rows and Columns

Rows go left to right (like reading a book!)

Columns go top to bottom (like a tall building!)

Where a row and column meet, we get a cell!

How Do We Enter Data?

Step 1: Click on a cell

Step 2: Type the word or number

Step 3: Press Enter

That's it! Your data is saved in the cell.

Highlighting Important Data

We can use colors to mark special data!

Use yellow to show the highest score

Use green to show completed tasks

Colors make data easier to read!

How Can Spreadsheets Help You?

Easy to organize information

Helps with simple math

Makes teamwork easier

Helps us understand our data better

Thank You & Happy Spreadsheetsing!

Now you know how spreadsheets can be your friendly helper!

Keep exploring in class or at home.
