Grade 1 Session 1: The Festival of Lights

LED Greeting Card

My Glowing Diwali Card Adventure!

Let's Light Up Diwali!

Diwali is the Festival of Lights! It is a time when we celebrate with our families and decorate our homes with bright lamps.

Just like tiny clay Diyas glow with oil and wick, today we will make a card that glows using **Electricity**!

⚡ **Electricity = Bijli** ⚡

Bijli is the magic energy that will light up our card! Are you ready to become a little scientist and artist at the same time? Let's go!

Meet Our Circuit Friends

Just like you need friends to play, our light needs three special friends to work together!

1. Battery = "Fatty"

The Power House! It gives all the energy to our card, just like an inverter at home during a power cut.

2. LED = "Leggy"

Our Little Diya! This tiny bulb uses electricity instead of oil to glow bright.

3. Copper Tape = "Shiny Path"

The Bijli ki Taar! It is like the electric wires on the street that carry power like magic roads.

The Secrets of Leggy & Fatty

To make our circuit work, we must know the secret sides of our friends!

Leggy's Long and Short Legs:

Look closely at your LED. One leg is longer than the other!

✨ **Long Leg:** The Positive side (+)

✨ **Short Leg:** The Negative side (-)

Fatty's Positive and Negative:

The Battery also has a "Positive" and "Negative" side.

Important Scientist Rule: We must match the Long Leg (+) to the Positive side to make the light glow!

Copper Tape: The Shiny Path

Our Copper Tape is a special path for Bijli to travel.

Imagine the electricity is like a tiny car. It can only drive on a perfect road.

 **Scientist Warning:** If the tape breaks or has a gap, the path is broken and the light won't glow! Keep your Shiny Path perfect!

We will stick the tape on our card to connect Fatty the Battery to Leggy the LED.

Guided Build - Step by Step

Follow these easy steps to make your card glow!

- 1 Stick the copper tape paths on the card carefully.
- 2 Place the battery on the tape — Fatty is home!
- 3 Attach Leggy's legs on the tape and make a Fold-Switch!

 When you fold your card, watch Leggy glow bright! 

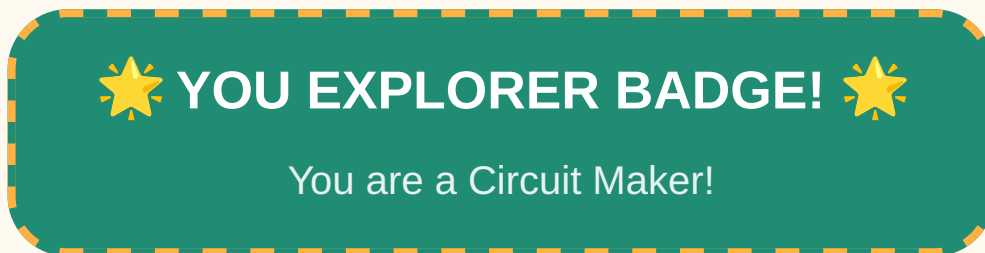

Decorate Your Card!

Now make your card beautiful with Indian motifs!

✨ **Rangoli Art:** Draw patterns around your tape paths.

✨ **Diya Decor:** Add colorful stickers or drawings around the LED.

✨ **Festive Greetings:** Write "Happy Diwali," "Eid Mubarak," or "Happy Birthday!"

"Every light you make brightens the world around you!"
