

ENTREPRENEURSHIP

From Idea to MVP

The Founder's Journey for Grade 6

Planrs Academy | Session 1

Building the Future, One Idea at a Time

WHO IS AN ENTREPRENEUR?

The Problem-Solver Mindset

An entrepreneur isn't just someone who starts a shop. They are a **Problem Solver!**

They look at the world and ask: "What is broken? What is hard for people? How can I make it better?"

Whether it's your local Kirana store owner or the founder of a huge app, they all started by fixing a problem they saw in their neighborhood.

The Mumbai Dabbawalas

The Dabbawalas of Mumbai are world-famous entrepreneurs. But they didn't use robots or expensive computers!

The Problem: Office workers in Mumbai missed their home-cooked meals but lived too far away to go home for lunch.

The Solution: A clever system using cycles and trains to deliver lunch boxes (Dabbas) from home to office and back.

They solved a real human problem with a simple, brilliant system.

Be a Problem Detective

Every great business starts with someone noticing a problem. Let's play a game called "I Wish..."

Think about your school or colony:

"I wish there was an easier way to recycle plastic..."

"I wish healthy snacks tasted as good as chips..."

"I wish I could find a cycle-rickshaw faster..."

Your "I Wish" is the seed of your future business!

Minimum Viable Product

You have a big idea! But you don't need a factory to start. You need an **MVP**.

MVP stands for:

Minimum: The smallest version.

Viable: It actually works.

Product: Something you can give to others.

It's the "Cardboard and Crayon" version of your dream.

How Giants Began

Did you know Flipkart started with just two people delivering books on a scooter?

They didn't build a massive website with millions of items on day one. They personally went to the market, bought the books people ordered, and delivered them!

They tested their MVP manually to see if people would trust an online bookstore.

Don't Build a Wheel!

If your goal is a car, don't start by building one wheel. You can't use a wheel to go anywhere!

Build a Skateboard first.

A skateboard is simple, it moves, and you can see if people like traveling that way. Then you make it a cycle, then a car!

Always build something that is useful from day one.

The Secret of Iteration

Iteration means taking your MVP, showing it to people, and making it better based on what they say.

The Street Food Vendor:

If a Chaat vendor makes bhel and the customer says "too spicy!", the vendor adds more chutney next time. That is iteration!

Listen to your neighbors. They are your first customers.

The Idea Canvas

Professional founders use a "Canvas" to keep their thoughts organized. Let's fill yours!

1. THE PROBLEM: What is bothering people?

2. THE SOLUTION: How will your idea fix it?

3. THE MVP: What is the simplest version you can make?

Cardboard and Crayons

You can build an MVP for an app by just drawing the screens on paper!

Activity: Take a piece of paper and draw your MVP. It could be a simple box, a drawing of a website, or a menu for a new snack shop.

The goal is to show people how your idea works, not to make it look perfect yet.

Indian Unicorns

India is home to many "Unicorns"—startups worth a lot of money. They all started with a simple MVP!

Nykaa: Bringing beauty products to everyone.

OYO Rooms: Making travel affordable.

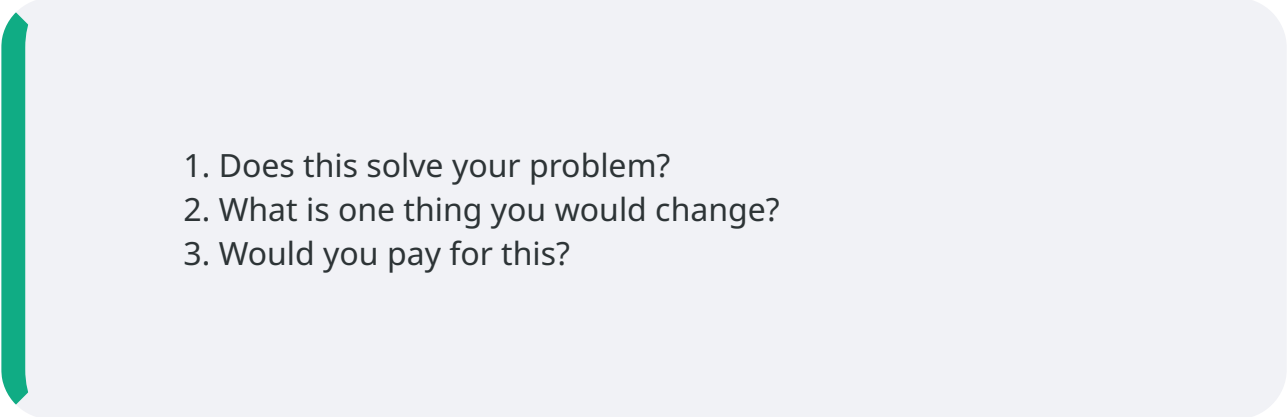

Zomato: Delivering food from your favorite dhaba.

If they can do it, so can you!

The Feedback Loop

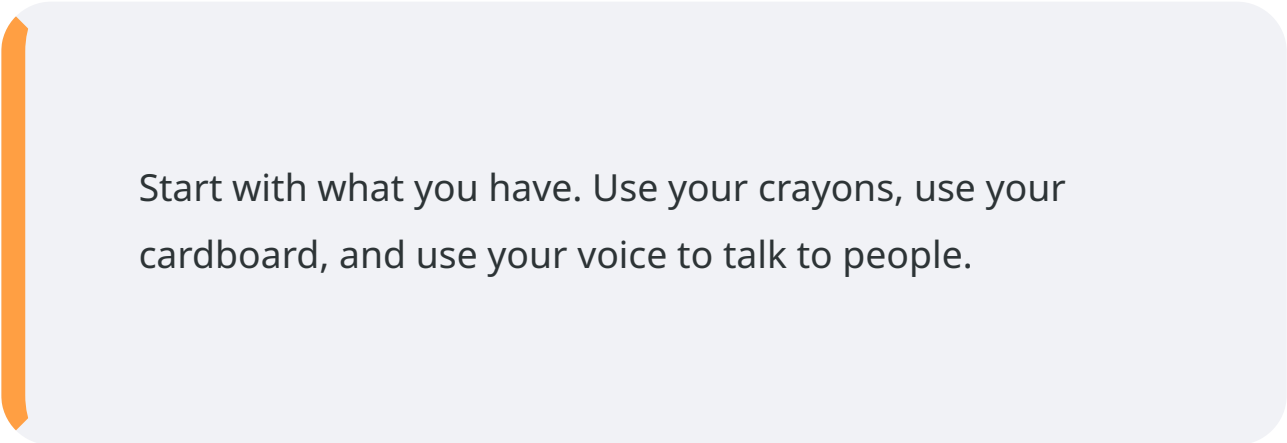

Once you have your paper MVP, show it to 3 people. Ask them:

- 
1. Does this solve your problem?
 2. What is one thing you would change?
 3. Would you pay for this?

Feedback is like a compass—it shows you which way to grow.

Don't Wait!

Entrepreneurship isn't about being an adult. It's about being a thinker.

Start with what you have. Use your crayons, use your cardboard, and use your voice to talk to people.

Great things have small beginnings.

What We Learned Today

Entrepreneurs solve problems.

MVP is the simplest version of an idea.

Iteration makes products better.

Starting small is the best way to grow.

"It's okay to start with a drawing!"

THANK YOU!
Go Solve a Problem Today!
