

PROMPT ENGINEERING

**The Art of Giving Perfect
Instructions [cite: 695, 696]**

Mastering AI Outputs for Grade 6 [cite: 717, 740]

AI Isn't a Mind-Reader! [cite: 697]

A common myth is that AI knows exactly what we want. But AI isn't a mind-reader! [cite: 697, 698]

Think of AI as a **helpful actor**—and YOU are the **director**!
[cite: 702]

It needs clear orders from you to deliver a perfect performance. [cite: 699, 700]

Clearer and more detailed instructions lead to much better help from the AI. [cite: 701]

The Process of Refining [cite: 703]

Prompt Engineering is the process of **refining instructions** to get better AI results. [cite: 704]

Vague Prompt [cite: 705]

"Write something" [cite: 706]

Improved Prompt [cite: 707]

"Write a story about Diwali celebrations in your city for a school magazine" [cite: 708]

By being specific, we guide the AI toward exactly what we need! [cite: 741]

Context + Task + Format [cite: 709, 710]

Every "Pro Prompt" needs these three pillars to stand strong: [cite: 710, 751]

- **Context:** Who you are or where you are. [cite: 711, 712]
- **Task:** What exactly you want the AI to do. [cite: 713, 715]
- **Format:** How you want the answer to look. [cite: 714, 716]

Example: "I am a Grade 6 student in Chennai [cite: 717].
Write a poem about the Monsoon [cite: 718] in bullet
points with simple words [cite: 719]."

Cooking Up Good Answers [cite: 720]

Just like cooking, adding more details to your instructions changes the final result! [cite: 721]

Vague: "Make tea" → Result: Plain, boring tea you didn't want! [cite: 722, 724, 725]

Engineered: "Make Masala tea with extra ginger, less sugar, served in a clay cup" → Result: Perfect tea, exactly how you like it! [cite: 726, 727, 728, 729, 730]

Details make all the difference in prompting! [cite: 779]

Changing the AI's Voice [cite: 731]

Pretend the AI is someone else to change the **tone and style** of its response! [cite: 731, 732]

Try these Personas: [cite: 733, 734, 735]

- "Act like a Cricket Commentator..." [cite: 733]
- "Act like a Grandparent..." [cite: 734]
- "Act like a Science Teacher..." [cite: 735]

Changing the role changes the "voice" of the answer! [cite: 732, 780]

Context vs. Task [cite: 736]

Adding Context to a clear Task makes your prompt **10x better!** [cite: 741]

Weak: "Write a poem" [cite: 737, 738]

Strong: "I am a 6th-grade student at Planrs Academy, and I need a poem about the Monsoon for my school magazine" [cite: 739, 740]

The extra context helps the AI understand *who* it's writing for. [cite: 740, 741]

Planning for Indian States [cite: 742]

Let's use AI to plan a **Culture Day stall** for specific states like Kerala, Punjab, or West Bengal! [cite: 743, 745]

Apply the pillars: [cite: 744, 746, 748, 749]

- **Context:** "Stall for West Bengal" [cite: 744, 745]
- **Task:** "Plan 5 stall activities" [cite: 746, 747, 749]
- **Format:** "Give me a numbered list" [cite: 748, 749]

Transforming "Lazy" Prompts [cite: 750]

Let's transform a simple prompt into a **PRO prompt**! [cite: 751]

Original: "Tell me about tigers" [cite: 752]

Pro Version: "As a wildlife scientist [cite: 761, 759], write a detailed paragraph [cite: 762, 758] about the habitat and diet of tigers in India [cite: 763] for my Grade 6 science project [cite: 764, 756]."

See the difference? The Pro version gives the AI a clear roadmap! [cite: 760, 775]

Practice Makes Perfect! [cite: 765, 766]

Prompting is a journey. Keep improving—each version gets better! [cite: 766, 779]

- **V1:** "Tell me about tigers" (Vague) [cite: 767, 768, 771]
- **V2:** "Write a paragraph for school" (Better) [cite: 769, 770, 772]
- **V3:** "As a scientist..." (Pro level!) [cite: 773, 774, 775]

Don't settle for the first result—refine until it's perfect! [cite: 780]

Your Turn to Build! [cite: 776]

Use this template whenever you need help from AI: [cite: 776, 781]

Persona: Who should AI pretend to be? [cite: 776]

Context: What's the situation? [cite: 777]

Task: What do you want it to do? [cite: 777]

Format: How should the output look? [cite: 778]

The Secret to Success [cite: 779]

Always remember the **Golden Rule of Prompting**: [cite: 779]

- ✓ Be specific and clear [cite: 779]
- ✓ Provide context [cite: 779]
- ✓ Use Persona to set tone [cite: 779]
- ✓ Practice iterative refinement [cite: 779]

Better input = Better output! [cite: 779, 780]

Becoming a Pro [cite: 780]

Today you mastered the art of instruction: [cite: 780]

- ★ Defined Prompt Engineering [cite: 780]
- ★ Applied Context, Task, Format [cite: 780]
- ★ Used Personas to change tone [cite: 780]
- ★ Learned to test and refine [cite: 780]

You are now a **Prompt Engineering Pro!** [cite: 780]

The Future is Yours! [cite: 781]

AI is your assistant, and you hold the map! [cite: 698, 702]

Ready to create your perfect prompts? [cite: 781]

Go out and lead your AI actor to greatness! [cite: 702]

THANK YOU! [cite: 781]

Any Questions? [cite: 781]
