

Calendar Maths

Learning about days, weeks, and months

A fun learning adventure!

What Is a Calendar?

A calendar helps us keep track of days, weeks, and months. It shows us all the days in a month and helps us remember important dates like birthdays and holidays! Have you ever used a calendar? Think about where you might have seen one at home or in school!

Days of the Week

Sunday, Monday, Tuesday

Sunday is for rest and family time! Monday is when school begins. Tuesday keeps the learning going strong!

Wednesday, Thursday

Wednesday is the middle of the week - halfway there! Thursday means we're almost at the weekend!

Friday, Saturday

Friday is the last school day - time to celebrate! Saturday is for play, fun, and spending time with friends. There are 7 days in a week!

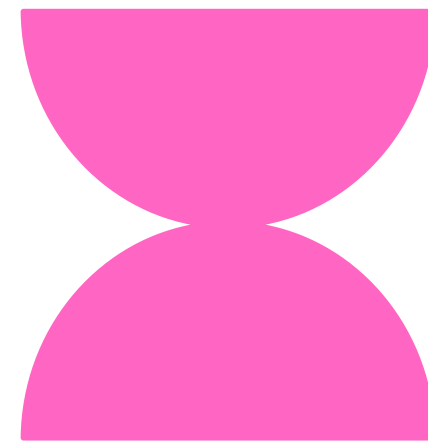

The Week Timeline

Sunday

The first day of the week when we rest and play.

Mon – Fri

Five busy days for school, learning, and activities.

Saturday

The last day of the week for family time and fun!

Months of the Year

January to April

January, February, March, April – Spring begins with flowers blooming! 🌸

May to August

May, June, July, August – Summer brings sunshine and holidays! ☀️

September to December

September, October, November, December – Winter arrives with snowflakes! ❄️ There are 12 months in a year.

How Many Days in a Month?

Most months have 30 or 31 days. February has 28 or 29 days.

Months with 30 or 31 Days

30 days: April, June, September, November

31 days: January, March, May, July, August, October, December

Special Month: February

28 days in most years

29 days in a leap year

The shortest month!

The Year Timeline

A year has 12 months!

Jan – Apr

January, February, March, and April start our year with new beginnings and spring flowers.

May – Aug

May, June, July, and August bring summer fun, holidays, and warm sunny days.

Sep – Dec

September, October, November, and December complete the year with festivals and winter joy.

What is a Leap Year?

Every 4 years, we add one extra day to February to keep the calendar correct. This special year is called a leap year!

In a leap year, February has 29 days instead of 28. The number 4 is important to remember - count 4 years and you'll find a leap year!

Leap years help our calendar stay in sync with the Earth's journey around the sun.

Weekdays vs Weekends

Weekdays are school days. Weekends are for rest and fun!

Weekdays (School Days)

Monday
Tuesday
Wednesday
Thursday
Friday

Weekends (Rest & Fun!)

Saturday
Sunday

Manenthly

Mon Tue Tual San Wen Sunt Pan

					4	8
1	2	4	5	10	11	10
5	16	17	14	13	10	14
13	10	11	25	29	28	24
20	27	28	29	24	28	

How to Read a Calendar

Understanding Your Calendar

Reading a calendar is easy once you know how! Here are some simple steps:

Look at the numbers to find the day. Each number represents a date in the month.

The top row shows the days of the week. Start from Sunday and go to Saturday.

Find today's date by looking for the current number. You can circle it or put a star!

Weekends are usually shown in different colors. Saturday and Sunday are rest days.

Practice finding important dates like birthdays and holidays on your calendar!

Activity: Find Your Birthday Month!

Can you find your birthday month on the calendar? Look at all 12 months and point to the one when you celebrate your special day! Share with your classmates which month your birthday falls in. Is it in summer, winter, or during the monsoon season?

Counting Days Activity

How many days are there from Monday to Friday?

Let's practice counting the days of the week together! Look at the week below and count how many days there are from Monday to Friday.
Start with Monday and count each day: Monday... Tuesday... Wednesday... Thursday... Friday!
How many days did you count? Say the number out loud!
That's right - there are 5 weekdays from Monday to Friday. These are our school days!
Try counting backwards too: Friday, Thursday, Wednesday, Tuesday, Monday. It's still 5 days!

Why Do We Use Calendars?

Know the Day

Calendars help us know what day it is today! Is it Monday or Friday? A calendar tells us right away.

Plan Fun Events

We use calendars to plan birthdays, holidays, and special celebrations with family and friends!

Track Time Passing

Calendars help us see how time passes. We can count days until vacation or see how many days are left in the month!

Review: What Did We Learn?

7 Days

A week has 7 days from Sunday to Saturday.

12 Months

A year has 12 months. Each month has different days - 30, 31, or 28/29!

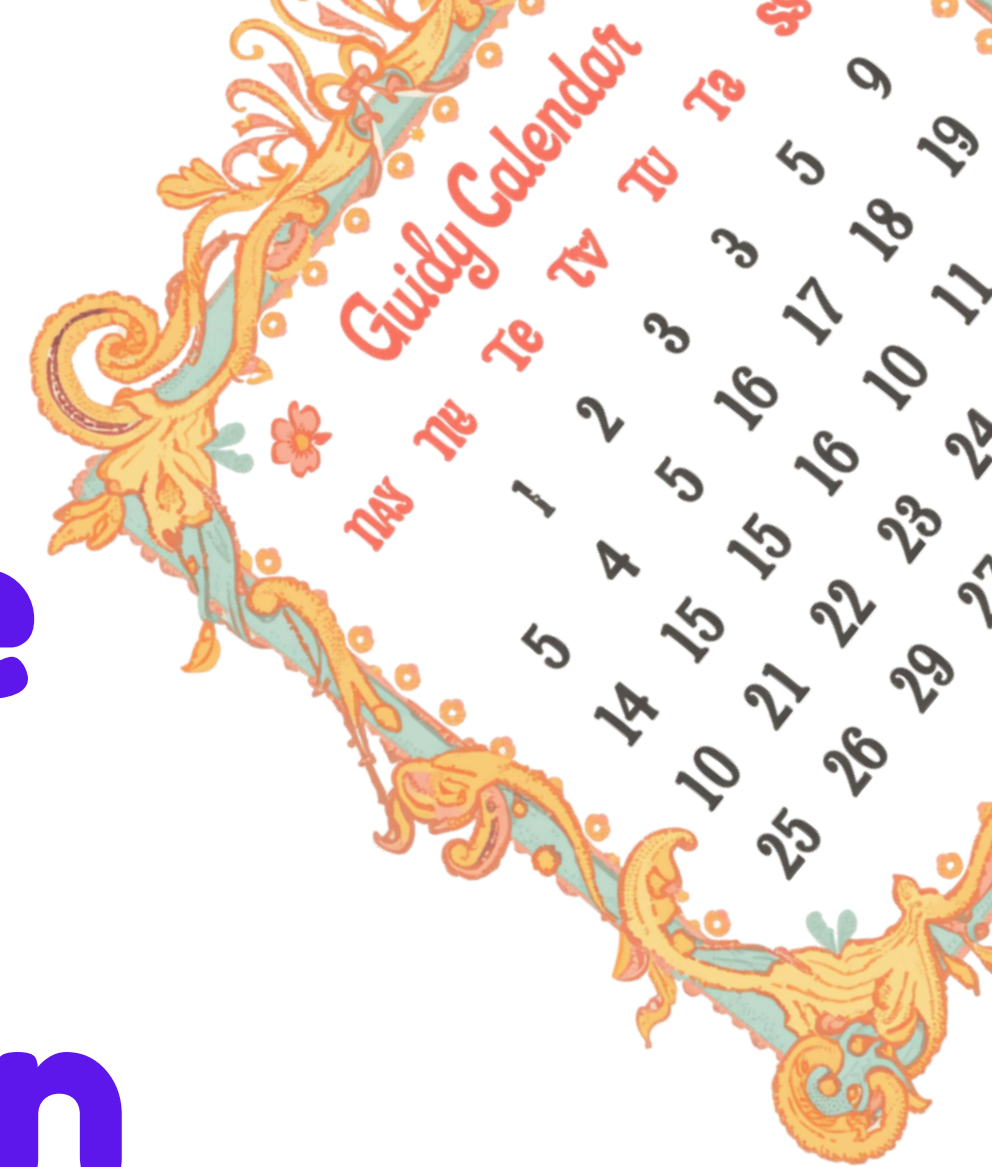

Track Time

Calendars help us know dates, plan events, and track time passing.

"Did you know? The calendar we use is called the Gregorian calendar!"

– Fun Fact!
