

# MY DIGITAL PORTFOLIO!

Your Very Own Virtual School Showcase

Grade 3 Interactive Lesson Guide

**Let's Get Started!**

**Learn how to collect your best work, save it safely on a screen, and celebrate your big ideas!**

# What is a Digital Portfolio?

---

**Imagine a giant, colorful binder where you keep all your secret codes, beautiful art pieces, and amazing school projects. 💖**

A **digital portfolio** is just like that binder, but it is virtual! It is a special online folder where you keep your absolute best school work safe on a computer or a tablet device.

Because it lives on a screen, your digital portfolio can hold all kinds of neat creations in one place:

- 🎨 **Your Colorful Drawings:** Scanned pictures or digital paintings you made.
- 📷 **Fun Photos:** Snaps of your physical models, science experiments, or building blocks.
- 📝 **Creative Writing:** Stories, poetry, or text responses you typed up.
- 🤖 **School Projects:** Cool files or games you worked on during class!

## Why Make a Digital Portfolio?

---

Making a digital portfolio is super fun! Here are four incredible reasons why every junior inventor should build one today:

### Share Your Work!

You can show your best projects to your family, friends, and teachers anytime you want with just one click!

### Stay Organized!

No more lost papers or messy desks! It keeps all your school assignments safe, neat, and very easy to find in one clean spot.

### See Your Growth!

You can look back at things you made months ago and see how much smarter, faster, and better you have gotten at your work!

### Be Super Proud!

It is like a personal museum of you! It helps you celebrate your hard work and feel proud of everything you have created.

## Step 1: Choose Your Best Work!

---

**Ready to build your portfolio? The very first job is to become a treasure hunter! 🕵️**

Look through all the things you have created recently. You don't need to put \*everything\* in your portfolio—just the pieces that make your heart happy.

### **The Selection Rule:**

**Pick 3 or 4 of your favorite school projects or drawings to start with!**

Think about the work you are the most proud of. It could be an awesome science drawing, an exciting adventure story you wrote, or a fun group project.

### **Quick Helper Tip:**

If you can't decide which pieces are your favorites, don't worry! Just ask a teacher, classmate, or grown-up helper to look at your work and help you choose the best ones.

## Step 2: Put It in the Folder!

---

Now that you have selected your favorite treasures, it is time to move them into their new digital home on the computer or tablet device!

This part is super easy and feels like magic. Just follow these basic computer steps:

- **\*\*Find Your Special Folder:\*\*** Look on your screen for the folder with your name on it that your teacher set up.
- **\*\*Click and Drag:\*\*** Use your mouse or your finger on the touch screen to pick up your project file. Drag it right over the folder icon and drop it inside!
- **\*\*Safe and Sound:\*\*** Once it drops, your work is tucked away perfectly inside your digital portfolio folder.

**Don't be shy! If you get stuck or can't find your special folder icon on the screen, raise your hand and ask a grown-up for a quick hand!**

## Step 3: Share and Celebrate!

**Hooray! You did it! Your files are saved, and your virtual album is complete! 🏆**

Now comes the absolute best part of being an innovator: showing off your amazing creations to the people you love.

Open up your neat digital portfolio and share it with:

- 🏠 **\*\*Your Family:\*\*** Show your mom, dad, siblings, or grandparents what you do at school every day!
- 🏫 **\*\*Your Teacher:\*\*** Show your teacher how neatly you organized your files.
- 🤝 **\*\*Your Friends:\*\*** Sit with a classmate and look at each other's cool designs.

✨ **Stand Tall and Smile:**

**Be incredibly proud of your hard work. Share all the amazing, wonderful things you have learned, drawn, and created this term!**

## Super Tips for an Awesome Portfolio!

Want to make your digital portfolio look like it was built by a professional software designer? Follow these four secret tips to keep it shining bright:

| The Tip Goal                                                                                                       | How to Do It!                                                                               |
|--------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
|  <b>Keep It Tidy</b>              | Make sure your folder stays neat and organized at all times. No messy extra files!          |
|  <b>Add New Work</b>              | Whenever you finish a brand new drawing or project, drop it in right away to keep it fresh! |
|  <b>Use Colors &amp; Titles</b> | Make your portfolio fun, cheerful, and bright by adding colorful pictures and neat titles!  |

**Remember: If you ever get stuck, just ask a grown-up, your teacher, or a nearby classmate for help!**

## ✨ You Are an Expert Portfolio Builder!

---

**Thank you for working so hard today! You have learned a wonderful skill that will help you all through school.**

Now your best work is safe, beautiful, and ready to share with the whole world. Keep exploring, keep creating beautiful art, and keep adding to your awesome digital folder!

### **ANY QUESTIONS?**

**Raise your hand and ask your teacher or classmates right now!**
