GENERATIVE AI — WHAT CAN IT CREATE?

WHAT IS GENERATIVE AI?

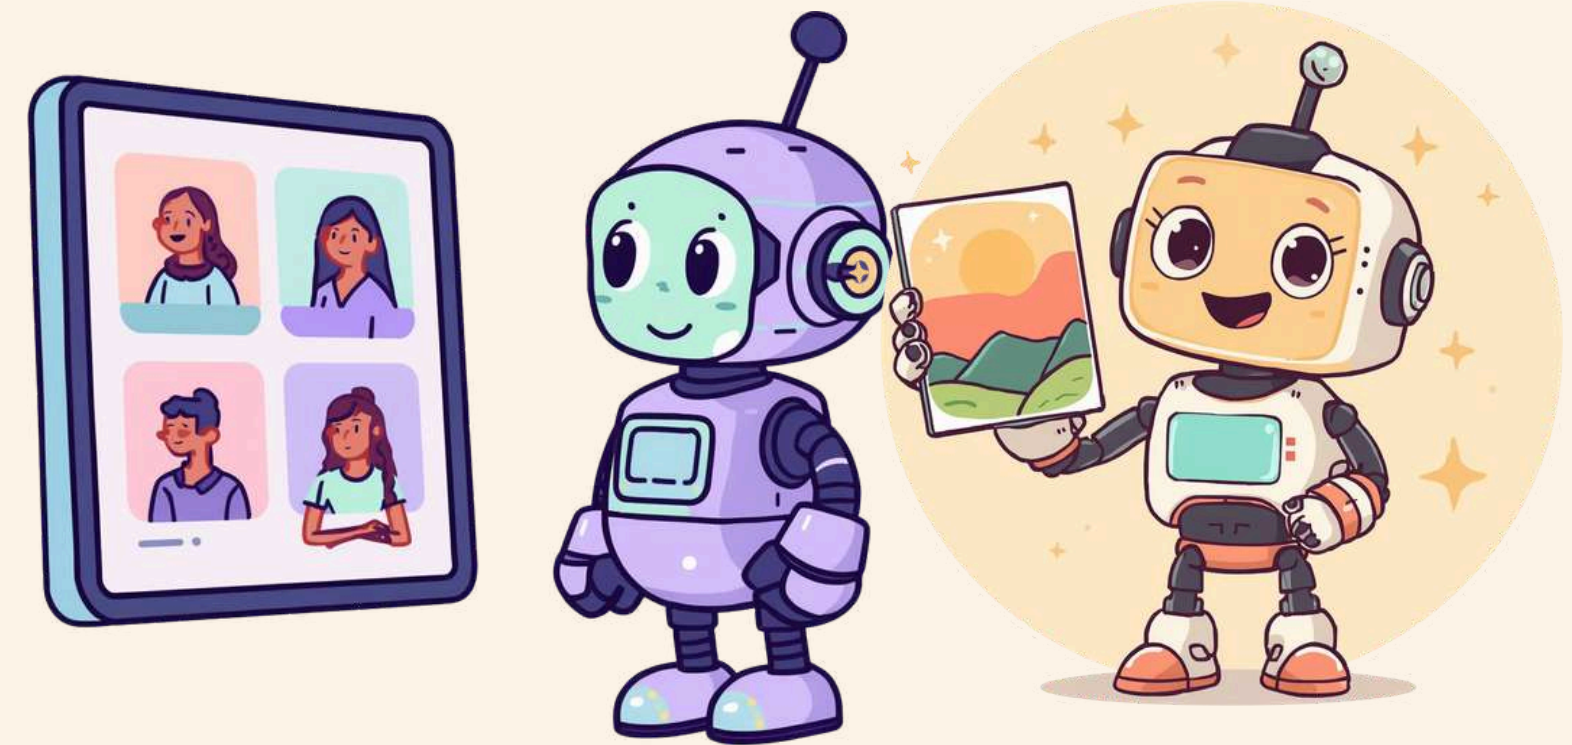

**Generative AI is a computer that
can make new things all by
itself!**

It can create amazing pictures, fun stories, beautiful music, and so much more!
AI is like a creative helper that learns and then makes something brand new.

How Does Generative AI Work?

AI learns from lots of examples! Just like you learn by reading many books and seeing many pictures, AI looks at thousands of images, stories, and sounds to understand patterns and ideas.

Then Makes Something New!

After learning, AI can create brand new things! It mixes what it learned to make pictures, stories, or music that never existed before. It's like magic, but it's really smart learning!

AI-Generated Animals & Landscapes

AI can create amazing pictures of animals like tigers, elephants, and peacocks! It can also make beautiful landscapes with mountains, rivers, and forests — all from imagination!

AI-Generated Cartoons

AI can draw pictures like these! From funny cartoon characters to colourful scenes, AI uses what it learned to make brand new artwork.

AI WRITES STORIES

AI can help tell new and fun stories! It learns from many books and then writes its own tales.

Once upon a time, a little parrot named Mittu found a magical mango tree. Every mango gave him a new adventure! — A story created by AI

AI MAKES MUSIC

AI can create songs and melodies all by itself!

Just like AI learns to draw pictures, it can also learn from lots of music and then make brand new songs. AI can create happy tunes, relaxing melodies, and fun beats!

AI DESIGNS GAMES AND CHARACTERS

**AI helps create fun game worlds
with amazing characters!**

From colorful heroes to magical creatures, AI can design characters and build exciting game scenes for us to play and explore.

AI CREATES VIDEOS AND ANIMATIONS

AI can make cool videos and cartoons that move and tell stories!

Just like magic, AI can create animated characters, colorful scenes, and fun videos. It helps filmmakers and artists bring their ideas to life!

FUN AI CREATIONS AROUND US

You might have already seen AI creations without even knowing it! AI helps make the fun filters and stickers you use on phones and tablets.

AI creates fun emojis and face filters

Have you seen AI creations on your phone or tablet?

What Can You Create With AI?

Drawing pictures of animals, places, or imaginary worlds

Writing poems or short stories with fun characters

Making music beats and cool sound effects

Designing simple characters for games or comics

Creating fun art projects with AI as your helper

How Can Kids Use AI Safely?

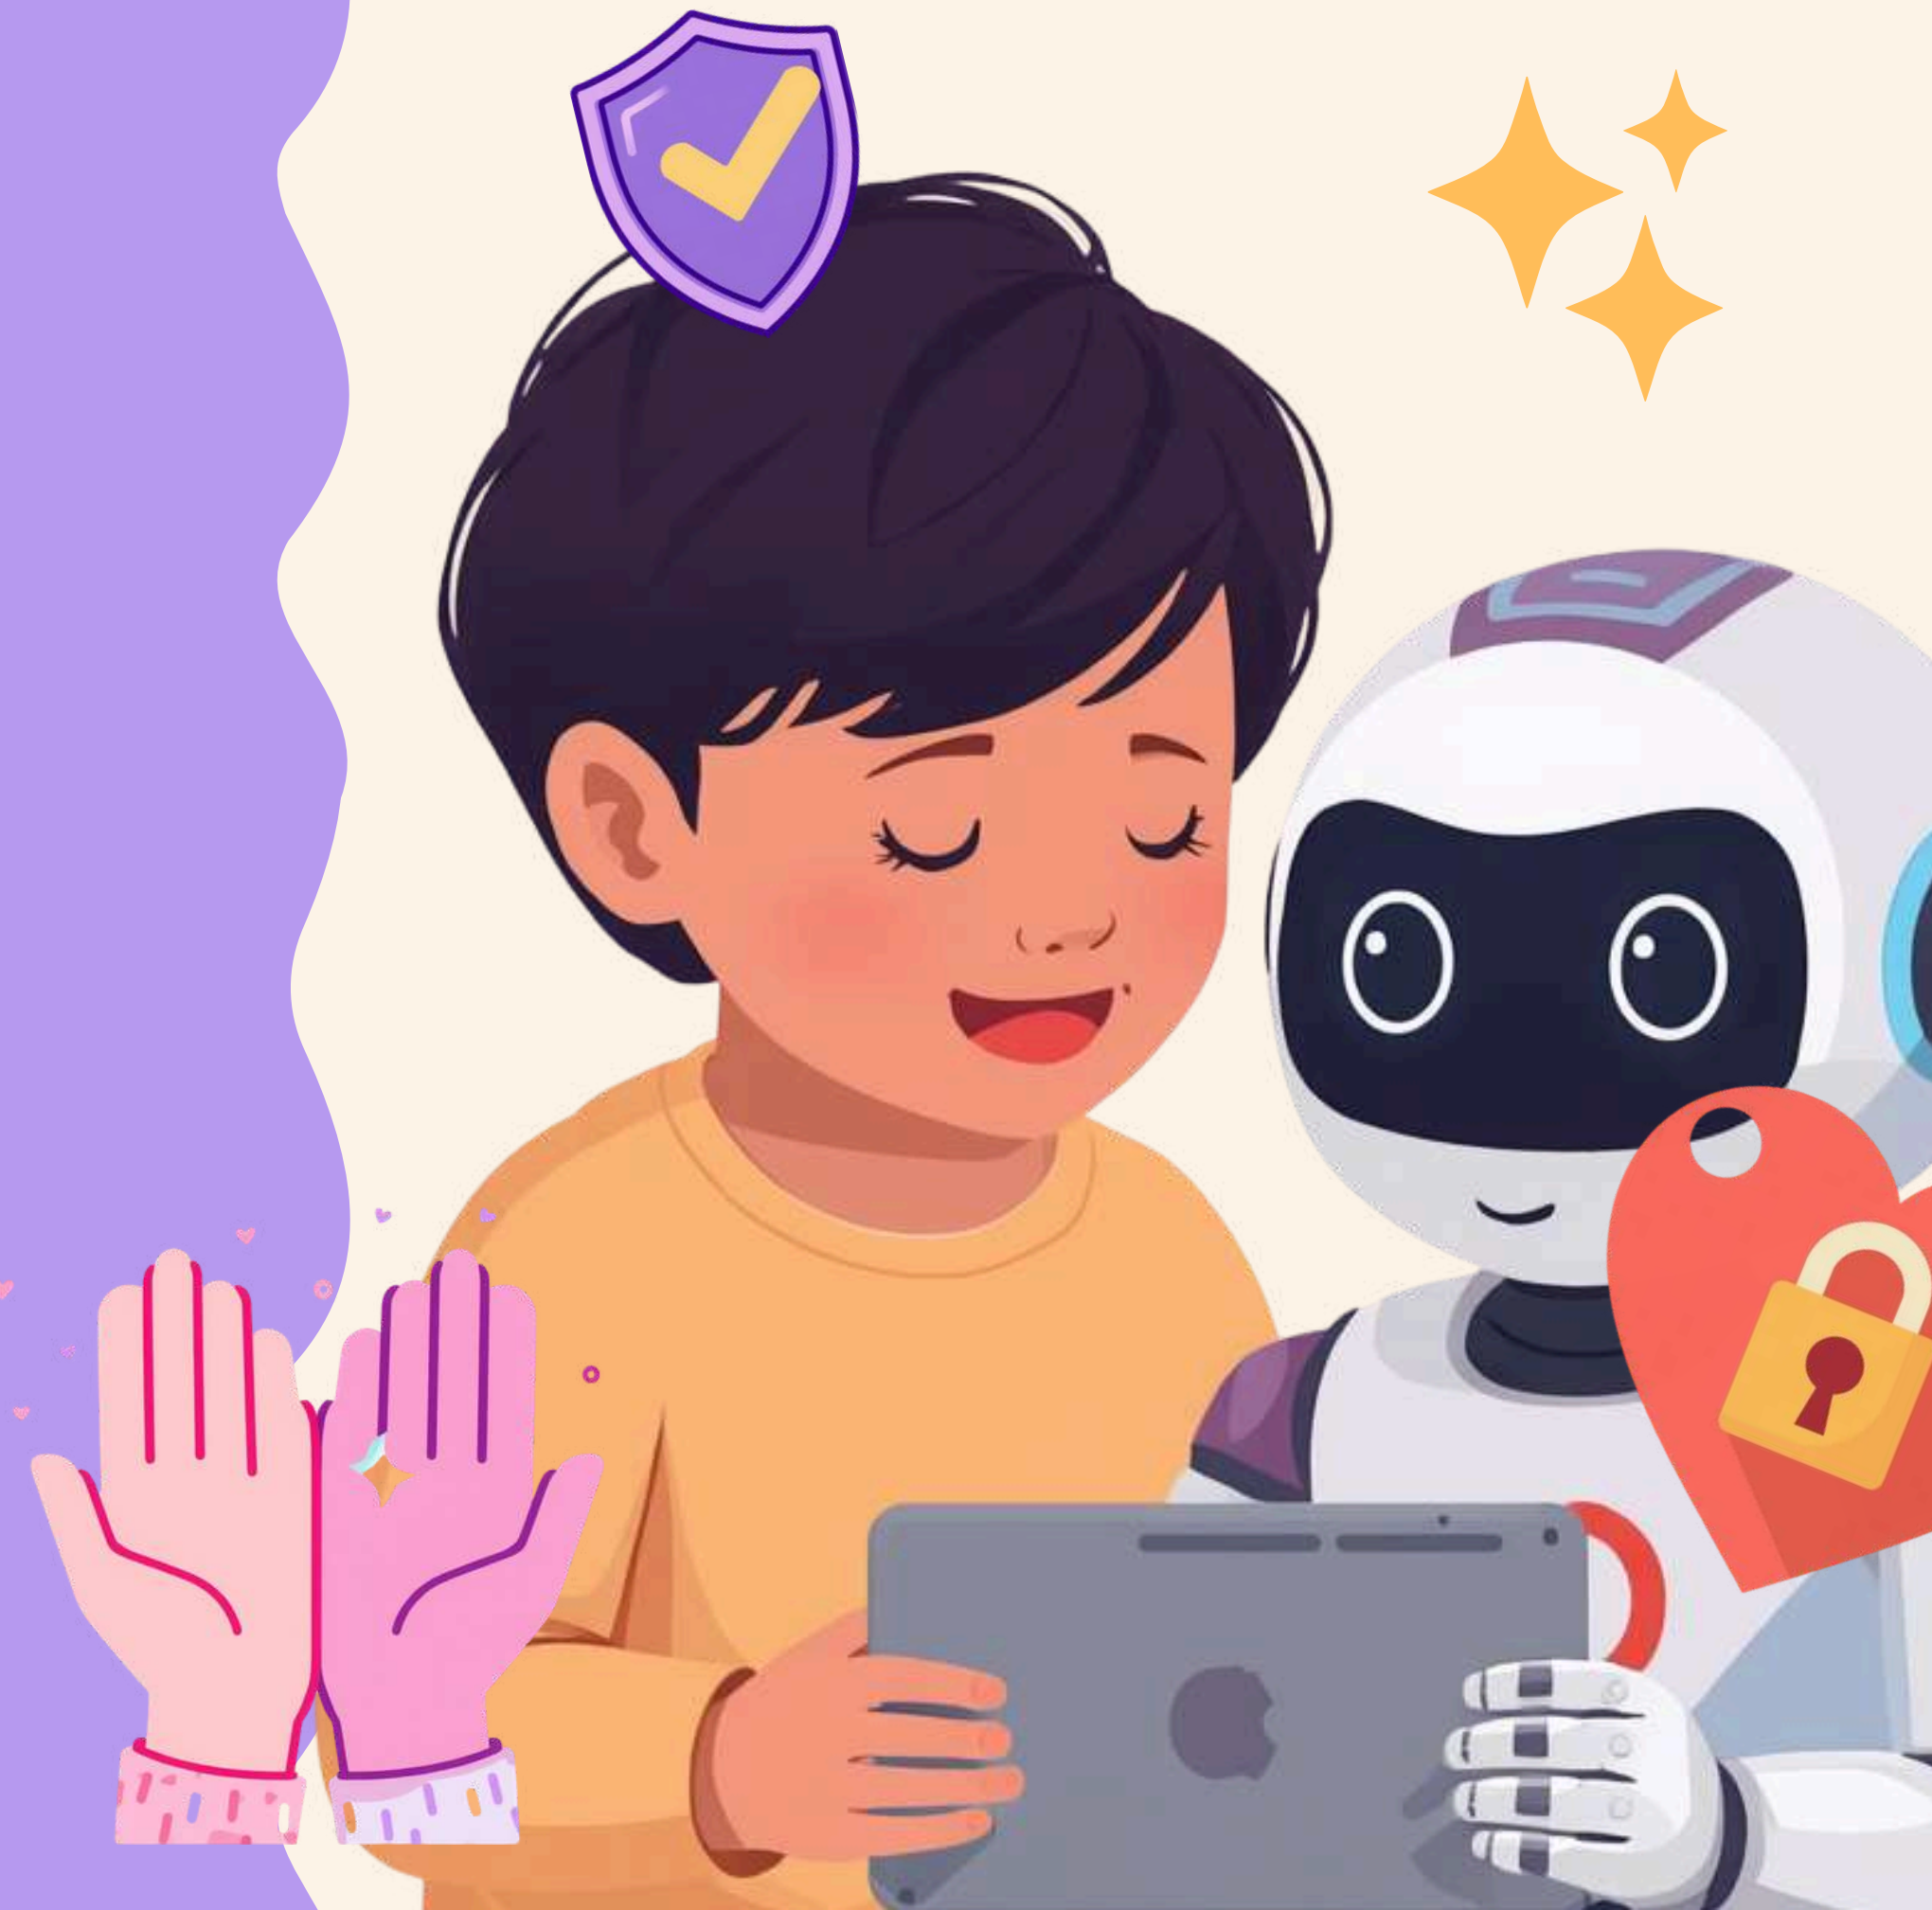

Always ask a grown-up before using AI tools

Don't share personal information with AI

Use AI to help you learn and create new things

Don't copy or cheat — use AI to inspire you

Stay safe online and tell an adult if something feels wrong

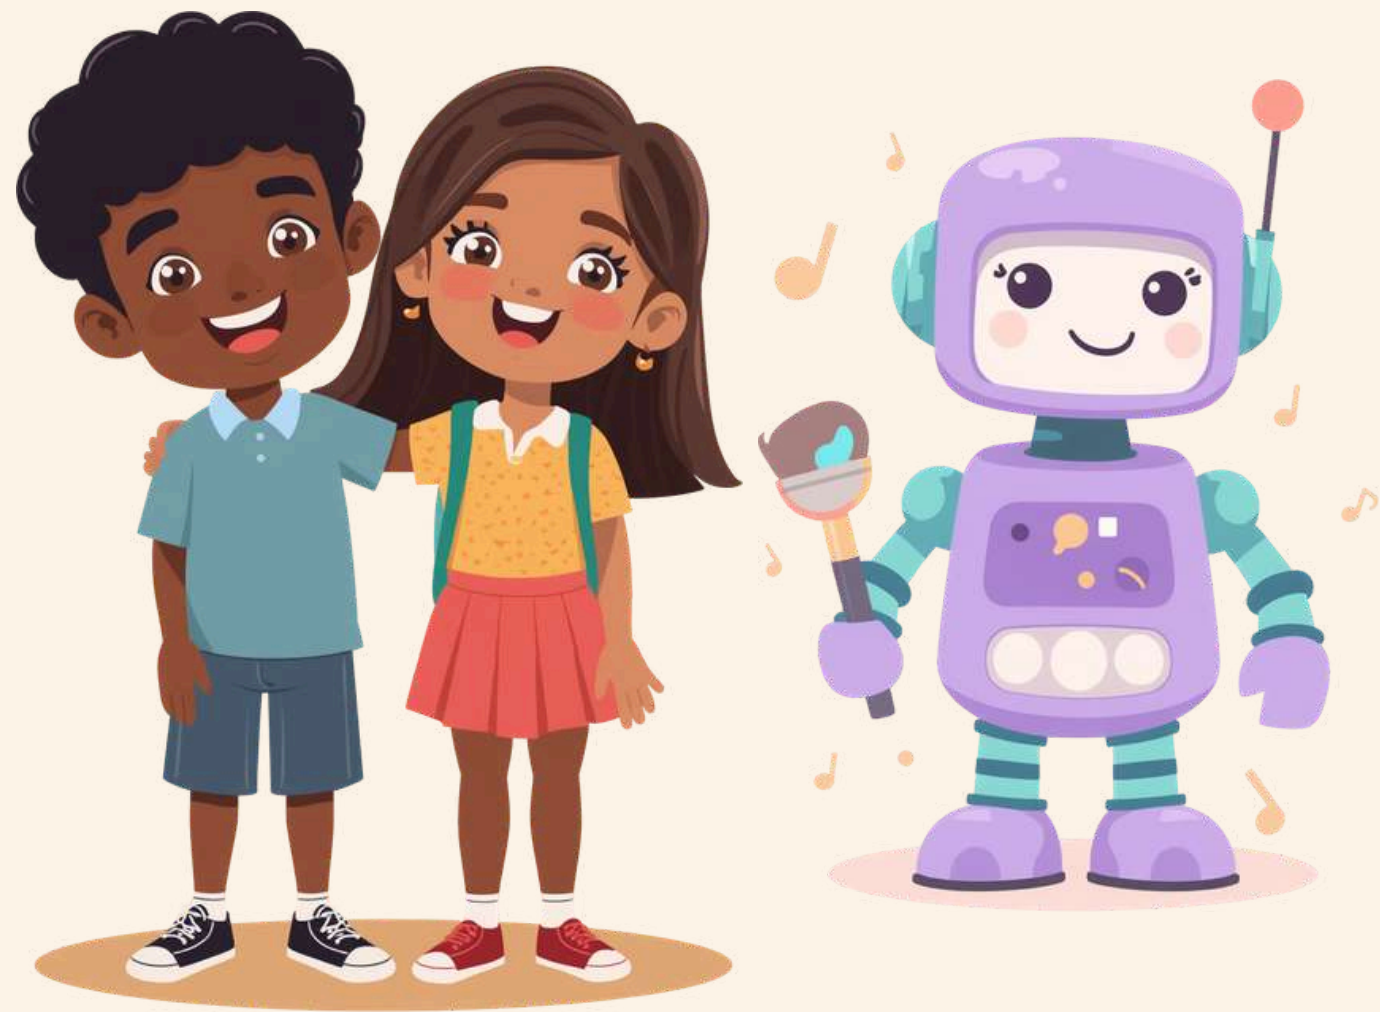

AI IS A CREATIVE FRIEND

AI can be your creative friend to help you imagine new things!

When you work with AI, you can dream up amazing stories, pictures, and ideas together. AI helps you create, but you are always the one in charge of your imagination!

Quick Recap

Pictures and artwork

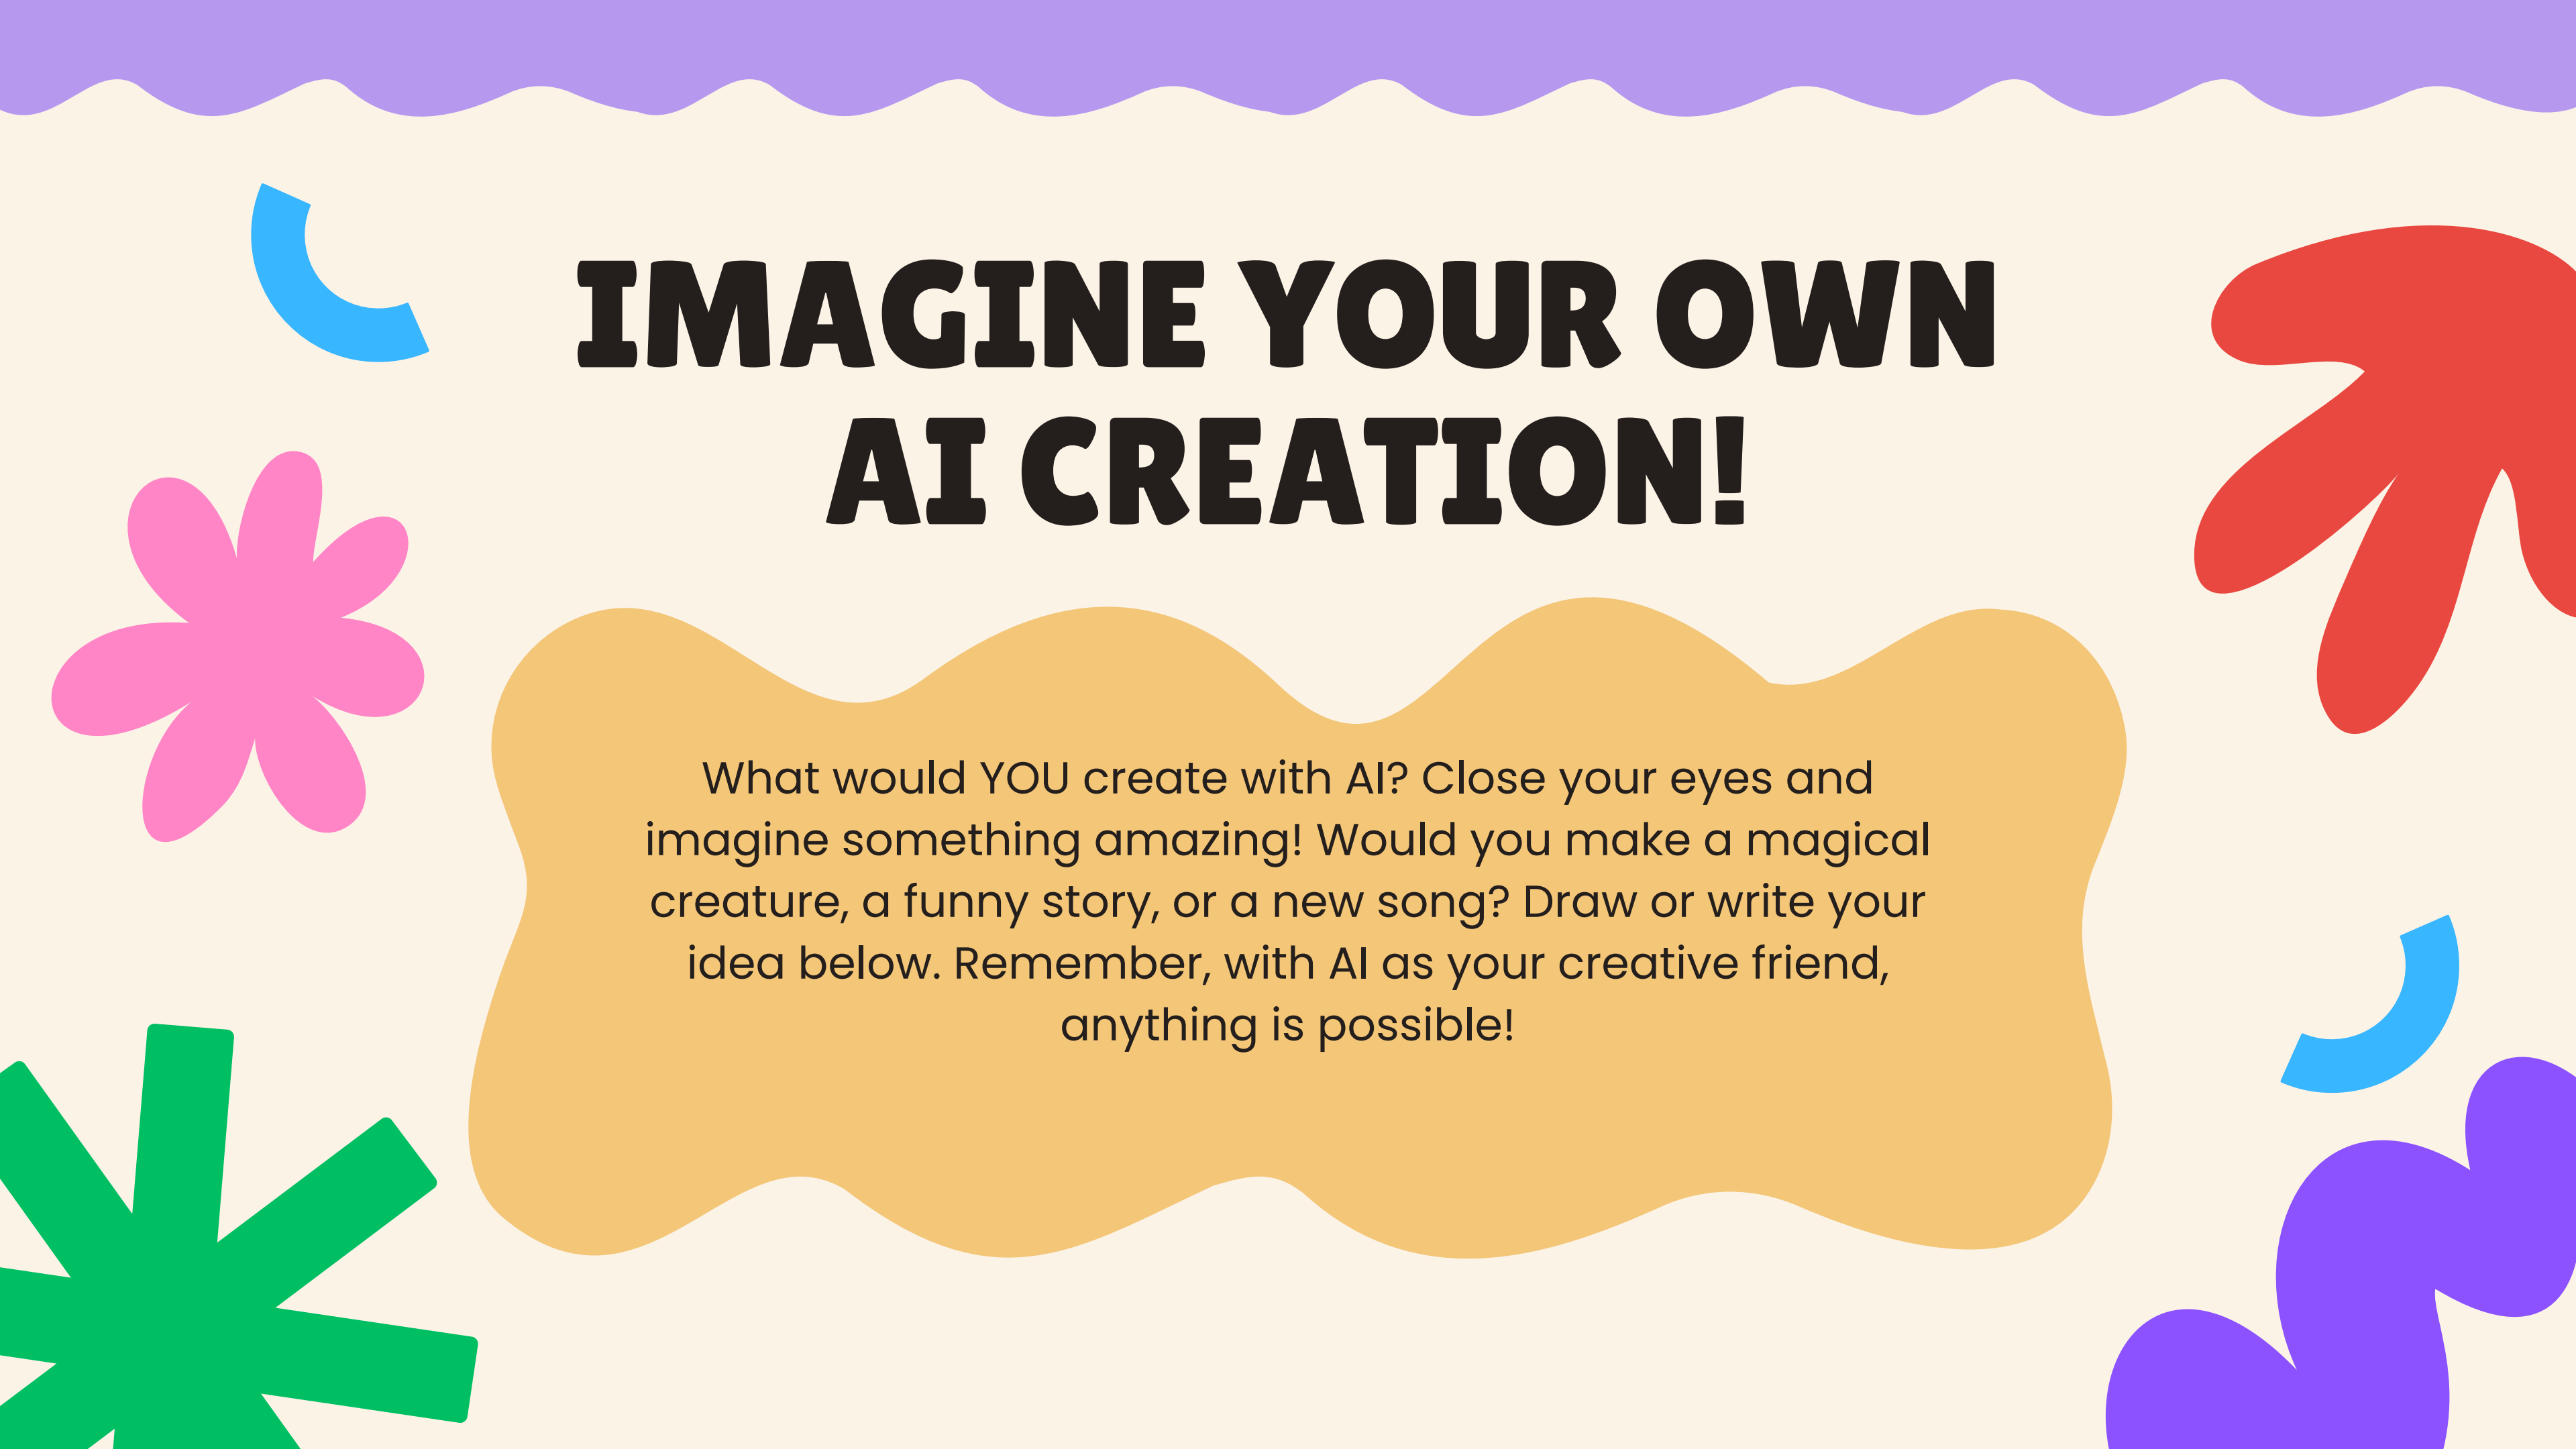

Stories and poems

Music and melodies

Games and characters

Videos and animations

Generative AI learns from lots of examples and then creates amazing new things! It's like a creative helper that never runs out of ideas.

IMAGINE YOUR OWN AI CREATION!

What would YOU create with AI? Close your eyes and imagine something amazing! Would you make a magical creature, a funny story, or a new song? Draw or write your idea below. Remember, with AI as your creative friend, anything is possible!

WE DID IT!
THANK YOU!

Thank you for learning about Generative AI!
