

The background is white and decorated with various colorful elements. In the top left, there is a large pink circle. To its right, there are several smaller colored dots (green, yellow, blue, pink) and starburst shapes. On the right side, there are large numbers 9 (green), 7 (pink), 0 (pink), 6 (blue), and 3 (yellow), along with plus signs. A large yellow circle is partially visible on the far right. In the bottom left, there is a purple curved shape. Near it are numbers 1 (green), 2 (pink), 6 (blue), 3 (blue), 8 (yellow), and 0 (yellow), along with plus signs and starburst shapes. A large green wavy shape is in the bottom right.

Large Numbers – Place Value to Lakhs

A cartoon illustration of a young boy with dark skin and short black hair, wearing a light blue school shirt and a dark blue striped tie. He is smiling and pointing his right index finger towards a large, light green speech bubble. The speech bubble contains the text 'Large numbers are numbers bigger than 999!'. The background is white and decorated with various colorful stars (pink, yellow, purple) and small dots (yellow, purple, pink).

**Large numbers
are numbers
bigger than 999!**

Understanding Place Value

Clean n-step-step vonals explanation int's a noart 3.
Step by-step, boals, wcthes blidged; ten = 40 tens = 5
Hundreds = 300 mmeitviralv dominant.

3

Hundreds = 300

4

Tens = 40

5

Ones = 5

$$300 + 40 + 5 = 345$$

Indian Number System Places

From Ones to Lakhs — Learn where digits live!

1

Ones

10

Tens

100

Hundreds

1,000

Thousands

10,000

Ten Thousands

1,00,000

Lakhs

THE ONES PLACE TO HUNDREDS PLACE

1. ONES PLACE

Single units! The digit 5 in
the number 345 means just
5 ones.

1. HUNDREDS PLACE

Groups of 100! The digit 3 in
345 means 3 hundreds, or
300.

1. TENS PLACE

Groups of 10! The digit 4 in the
number 345 means 4 tens, or 40.

THE THOUSANDS TO LAKHS PLACES

1. THOUSANDS

1,000 has four digits.
Example: 5,000 means five
thousand!

1. TEN THOUSANDS

10,000 has five digits. Example:
25,000 means twenty-five
thousand!

1. LAKHS

1 Lakh = 1,00,000. That's a
really big number!

WRITING LARGE NUMBERS

In the Indian number system, we group digits using commas to make large numbers easier to read. Starting from the right, we place a comma after the first three digits, then after every two digits. Example: 123456 becomes 1,23,456

Remember: The comma pattern in India is different from other countries!

READING LARGE NUMBERS

Step-by-Step: 1,23,456

One lakh

Twenty-three thousand

Four hundred fifty-six

Tips for Reading Aloud

Start from the left side

Say the place name after digits

Practice with a friend!

COMPARING LARGE NUMBERS

How to Compare:

Look at the highest place value first. Start from the left and compare digit by digit. The number with the bigger digit in the highest place is the larger number!

digit

WHICH NUMBER IS BIGGER?

Example:

2,45,678 vs 1,98,765

↓

2 lakhs > 1 lakh

So 2,45,678 is bigger!

54,321

5 is in the Ten Thousands place

4 is in the Thousands place

3 is in the Hundreds place

2 is in the Tens place

1 is in the Ones place

45,321

4 is in the Ten Thousands place

5 is in the Thousands place

3 is in the Hundreds place

2 is in the Tens place

1 is in the Ones place

REAL-LIFE EXAMPLES

COUNTING MONEY

When you save ₹1,25,000 in your piggy bank, you use place value to count it! Each digit tells you how many lakhs, thousands, and rupees you have.

POPULATION NUMBERS

India has over 140 crore people!
Your city might have 5,00,000 people. Place value helps us understand these big numbers.

DISTANCE MEASUREMENTS

The distance from Delhi to Mumbai is about 1,400 km. From Earth to the Moon is 3,84,000 km! Big numbers are everywhere.

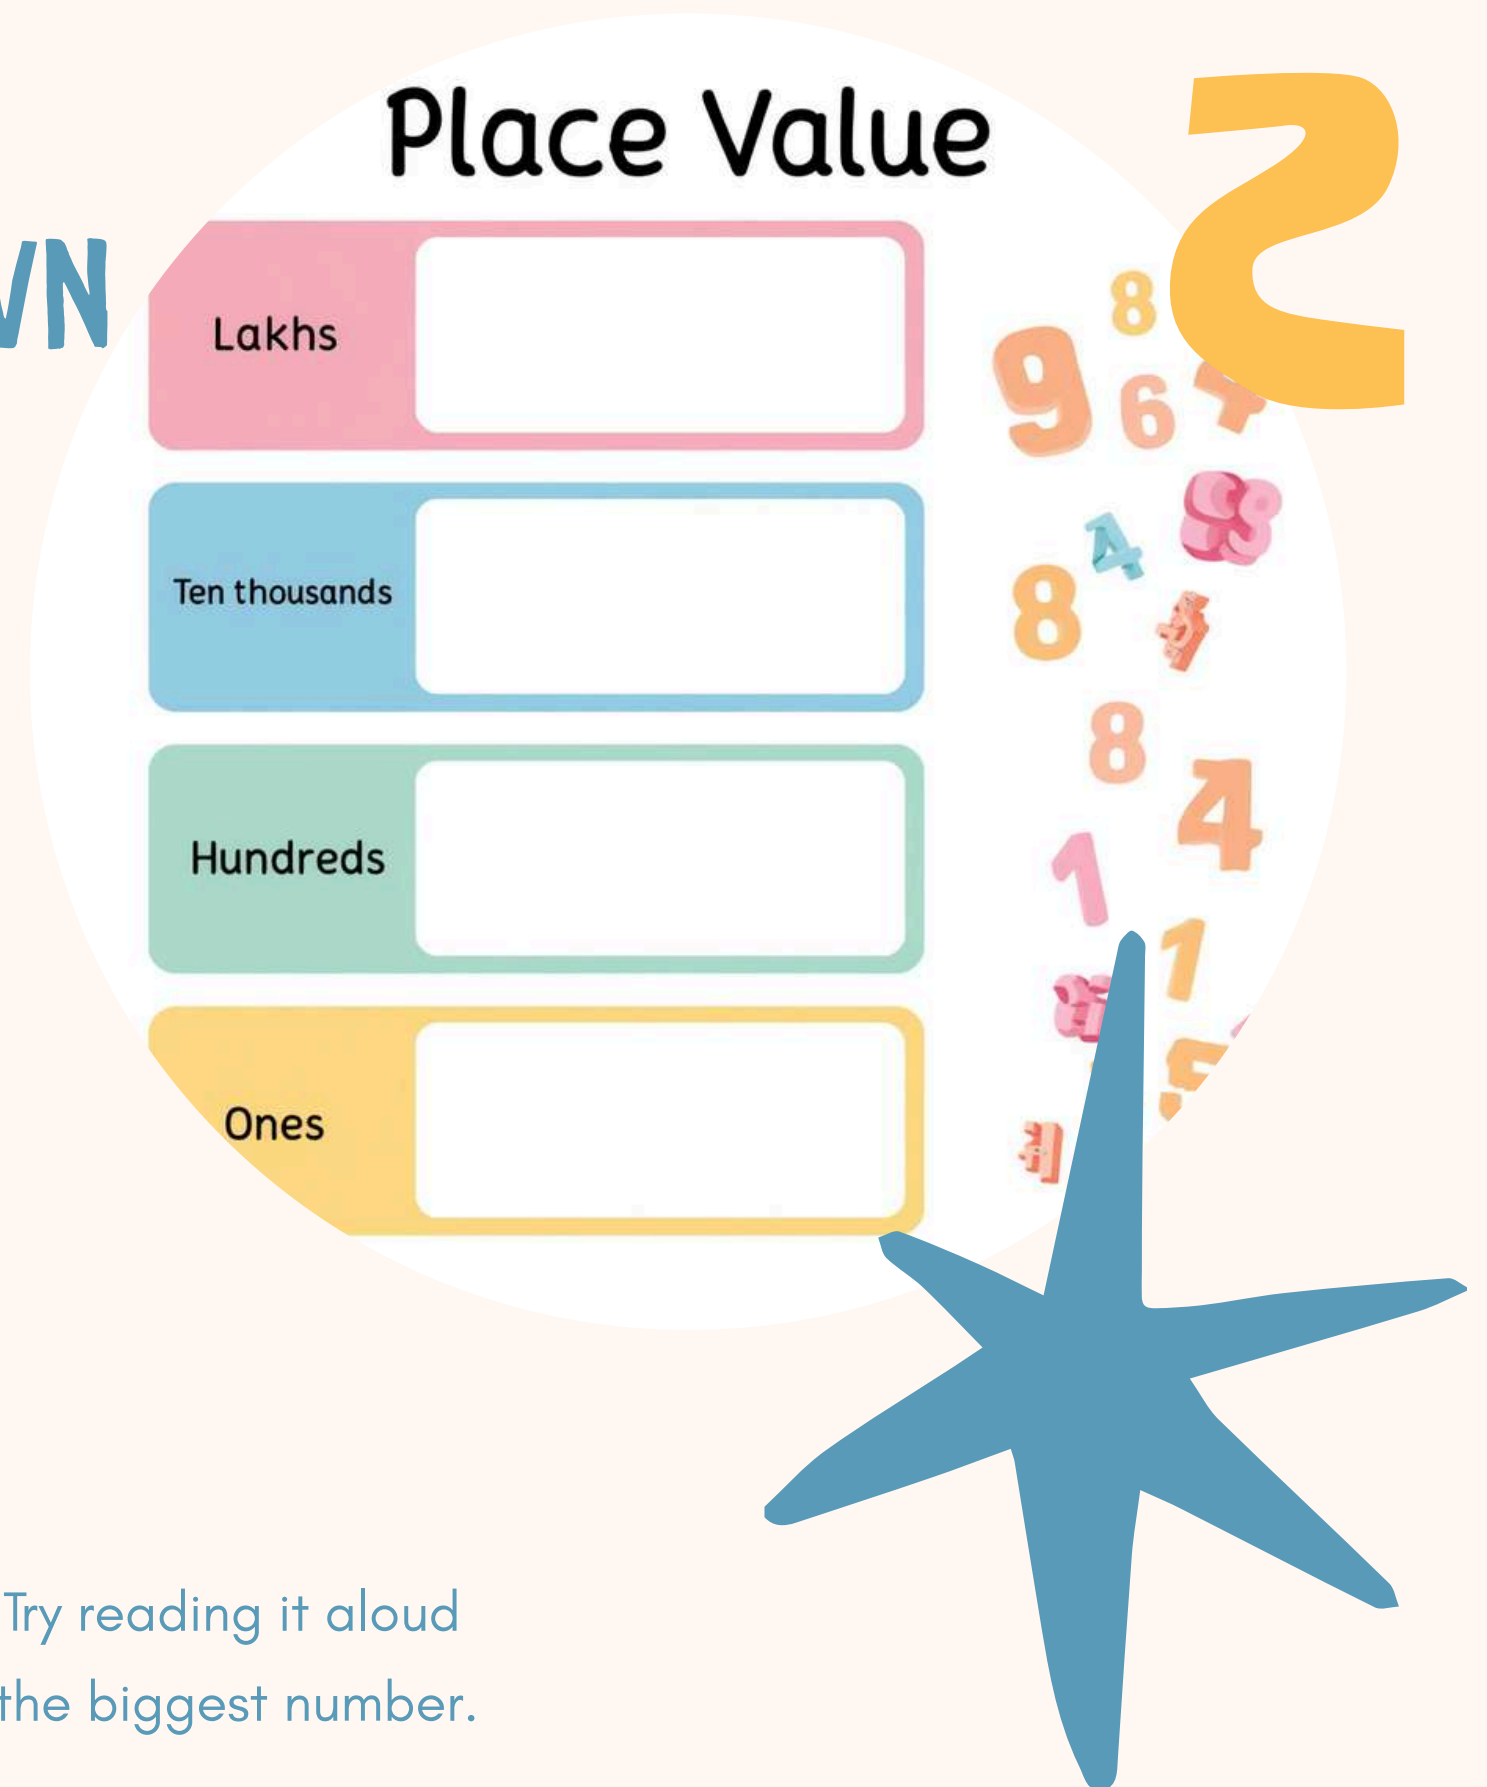

FUN ACTIVITY: BUILD YOUR OWN NUMBER

HOW TO PLAY

Choose any digit from 0-9 for each place value box. Start from Lakhs and fill in all the way to Ones. Write your complete number!

SHARE YOUR NUMBER!

Share your number with a friend! Try reading it aloud together and see who can make the biggest number.

RECAP: WHAT WE LEARNED

UNDERSTANDING PLACE VALUE

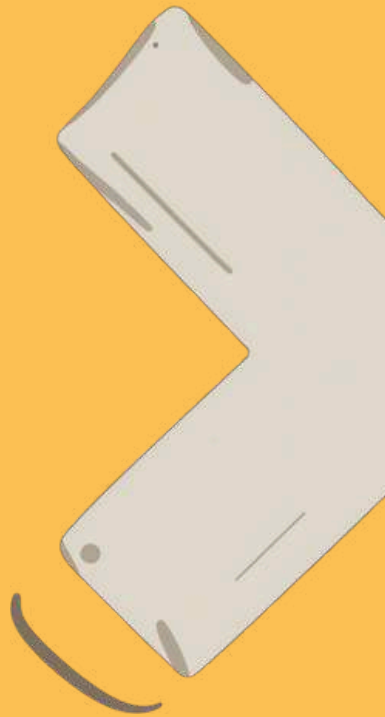

Place value tells us the worth of each digit. We learned places from ones all the way up to lakhs!

READING & WRITING NUMBERS

We can write large numbers with commas (1,23,456) and read them aloud step by step!

COMPARING NUMBERS

To compare, look at the highest place value first. The bigger digit wins!

QUIZ TIME!

1. TRUE OR FALSE?

In the number 2,45,678, the digit 4 is in the ten thousands place.

1. MULTIPLE CHOICE

The number 3,50,000 is read as "Three lakh _____ thousand."

1. FILL IN THE BLANK

1 lakh equals: A) 1,000 B) 10,000 C) 1,00,000

THANK YOU!

Thank you for learning about large numbers! Keep practicing!

QUESTIONS?

DO YOU HAVE ANY QUESTIONS?

Raise your hand if you want to ask something about place value or large numbers! Remember, there are no silly questions — every question helps us learn better together.
