

ROUNDING & ESTIMATION

Fun with
Numbers!

What is Rounding?

Rounding means making a number simpler but keeping it close to the original number. For example: If you have 47, you can round it to 50!

Let's Learn!

What is Estimation?

Estimation is a way to make a good guess about a number or amount.
For example: If you see 48 apples, you might estimate about 50 apples!
Estimation helps us think about numbers quickly without counting every single one.

Let's Learn!

Why Do We Round and Estimate?

To make math easier and
faster

To guess answers quickly

To check if answers are
reasonable

Rounding to the Nearest 10 – The Rule

Look at the ones digit:
5 or more → Round UP
Less than 5 → Round DOWN

43 → 40 47 → 50

Practice Time!

32, 56, 78, 41

Can you round these to
the nearest 10?

Rounding to the Nearest 100

Look at the tens digit.
If 5 or more, round up.
If less than 5, round down.
 $342 \rightarrow 300$ $567 \rightarrow 600$

Practice: Round to Nearest
100

275, 823, 149,
660

What is Estimation? (Revisited)

Estimation means making a quick guess – it can be using rounding or other ways.

Exact Count: 48 apples

Estimation: About 50 apples

Both are close, but estimation is faster!

Let's Clarify!

Estimation in Real Life

We estimate when we don't need exact answers, like shopping or measuring.

Estimation helps us make quick decisions without counting every single thing!

Everyday Math!

Practice: Estimation Problems

1. Estimate how many candies are in a jar.
1. Estimate the total cost if one toy costs ₹20 and you buy 3.
1. Estimate the length of your pencil in centimeters.

Rounding vs Estimation

Rounding

Makes numbers simpler by following rules.

Example: $47 \rightarrow 50$

Estimation

Makes a good guess, can use rounding or other ways.

Example: About 50 apples

When to Use Rounding or Estimation?

Rounding: For math homework, checking answers

Estimation: Shopping, cooking, measuring

Both help make numbers easier to work with!

Summary: What We Learned

Rounding makes
numbers easier using
We round to nearest 10
rules
or 100
Estimation is a quick
guess

Fun Rounding & Estimation Quiz!

Round 64 to the nearest 10.
Estimate the total cost if a book costs ₹45.

Round 289 to the nearest 100.

You Did Amazing!
