

Make Your Own Paper!

The 'Waste paper' Story —

Why Do We Recycle?

Saving Trees Means Saving Our Home!

We give old paper — called 'Waste paper' — to the Kabadiwala so it can become new paper! When we recycle, we help save trees and keep our Earth happy.

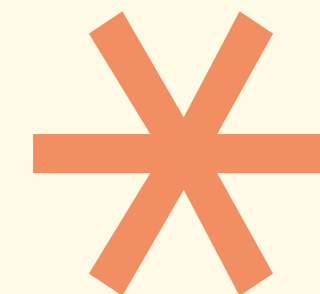

Step 1 — The Big Tear

Tear the 'Waste paper' Paper Into Tiny Pieces!

Can you make it really small? Use your fingers to tear the old newspapers and notebooks into tiny bits. The smaller the better!

Step 2 — Making the Mush ('Doll')

Add warm water and mash to make 'Doll' — soft mush!

Mix with your hands — splashy science! Mix and mash, "With force!" Watch the paper bits turn into soft, squishy mush!

Step 3 — The Press & Shape

Press the mush flat — press it down, 'With force!'!

Use the (strainer) or flat cloth. Press down with your hands — feel the soft, squishy doll ! Squeeze out all the water. This is splashy science!

Step 4 — Drying & Cleanup

Let Your Paper Dry Like Magic!

Let your paper dry in the sunlight! Then clean up
your workspace — no mess worries! Science is
splashy and fun!

Point 01

The Chipko Movement helped save many trees — people hugged trees to protect them!

Point 02

Recycling paper means fewer 'Ped' need to be cut down!

Point 03

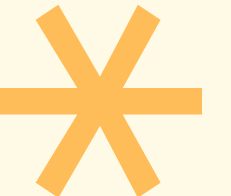

Paper comes from trees — like those in the Western Ghats and Himalayas!

Why Save Trees? The Indian Story

Let's Learn About (Trees) and (Recycling)!

Saving trees means saving our beautiful forests and the animals that live there. When we recycle paper, we help protect nature!

Idea 01

Draw or paint on your handmade paper

Idea 02

Make colorful cards or bookmarks

Idea 03

Decorate with beautiful Rangoli patterns

Fun Future Ideas!

What Will You Create Next?

Your handmade paper is ready for amazing creations! Let your imagination fly and make something beautiful to share with family and friends!

Thank You & Let's Save Trees Together!

Great job making your own paper! Show your family and friends! Questions?
