

Interactive Learning Lesson — Step-by-Step Guide

■ LESSON OVERVIEW

Duration	Characters	Materials Needed	Key Concepts	Skills Practiced
45–60 minutes	Small (Shopkeeper) & Meena (Customer)	Item cards, price tags, coin cutouts (■1, ■2, ■5, ■10), small purse/pouch	Buying & selling, Indian currency, counting coins, addition	Social interaction, numeracy, role-play, real-life maths

■ LEARNING OBJECTIVES

1. Understand what a shop is and recognize different types of shops.
2. Identify the roles of a shopkeeper (seller) and a customer (buyer).
3. Recognize and name Indian coins: ■1, ■2, ■5, and ■10.
4. Read price tags and understand the concept of cost.
5. Count coins correctly to match a given price.
6. Add the prices of two items together to find the total.
7. Practice real-life communication phrases used while shopping.

STEP 1 — Introduction: Have You Been to a Shop?

Duration: 5 minutes

Begin the lesson by sparking curiosity. Show children a colourful image of a kirana shop stocked with familiar Indian snacks — Parle-G biscuits, Dairy Milk chocolates, Kurkure chips.

Ask the class: **"Have you ever been to a shop? What did you see there?"**

Prompt further: **"Can you spot Parle-G biscuits? Dairy Milk? Kurkure chips?"**

Invite sharing: **"What do you like to buy from a shop?"**

■ Teacher Tip: *Let 3–4 children share their answers. This activates prior knowledge and makes children feel connected to the lesson.*

STEP 2 — Meet the Characters

Duration: 5 minutes

Introduce the two main characters who will guide the lesson. Describe each character vividly so children can visualise and connect with them.

■ Small — The Shopkeeper	■ Meena — The Customer
A friendly boy wearing his school uniform with a special paper badge that says 'Shopkeeper'. He loves helping customers and knows all the prices in his little shop.	A cheerful girl in a pretty salwar-kameez, carrying a small purse full of coins. She is excited to go shopping and practise paying the right amount of money.

Activity: Ask two volunteers to stand up as 'Small' and 'Meena'. Give Small a paper badge and Meena a small purse with coin cutouts.

STEP 3 — What Is a Shop?

Duration: 5 minutes

Give children the foundational definition of a shop in simple, child-friendly language.

■ **Definition:** A shop is a place where goods are sold for money.

Examples of shops children may know:

Icon	Shop Type	Description
■	Kirana store	Like Ramesh General Store — sells everyday groceries and snacks
■	School canteen	Where students buy snacks and drinks during break time
■	Sabziwala	The vegetable seller who comes to the neighbourhood
■	Paan-toffee shop	Small corner shop that sells toffees, biscuits, and paan

STEP 4 — Shopkeeper & Customer: Who Does What?

Duration: 7 minutes

Teach children the two key roles involved in any shopping transaction. Use the story of Grandmother to make it memorable.

■ Shopkeeper SELLS	■ Customer BUYS
The shopkeeper has many things in the shop. When a customer wants something, the shopkeeper gives it to them and receives money in return.	The customer goes to the shop, picks what they want, asks the price, counts out the right coins, and pays the shopkeeper.
■ Story Example: Grandmother goes to the vegetable seller to buy tomatoes. The seller says, "Ten rupees!" Grandmother pays the money and takes the tomatoes home. Now she is happy! — Who is the shopkeeper? Who is the customer?	
■ Teacher Tip: <i>Act out the grandmother story with two student volunteers. Ask the class to identify who is buying and who is selling.</i>	

STEP 5 — Indian Currency: Learning Our Coins

Duration: 10 minutes

Introduce the four key Indian coins step by step. Hold up each coin cutout as you explain. Encourage children to touch and examine real coins if available.

Coin	Name	How to Identify It	Example Purchase
■	■1 One Rupee	Small, silver coloured coin with a lion on it.	Buy a single toffee

■	■2 Two Rupees	Medium-sized, silver coin. Look for the number 2.	Buy a small biscuit
■	■5 Five Rupees	Large silver coin with bumpy (grooved) edges.	Buy a small snack packet
■	■10 Ten Rupees	Special coin with TWO colours — golden centre with silver ring.	Buy a bigger item

■ Teacher Tip: *After explaining each coin, hold it up and ask: "What number do you see? What colour is it? What can you buy with it?" Repeat for all four coins.*

STEP 6 — Reading Price Tags

Duration: 5 minutes

Teach children that every item in a shop has a price tag showing how much it costs. Use familiar products to make prices easy to understand.

Item	Price Tag	How to Pay
■ Parle-G Biscuit	■5	Costs five rupees — use a ■5 coin!
■ Eclairs Toffee	■2	Costs two rupees — use a ■2 coin!
— Small Eraser	■3	Costs three rupees — use a ■2 + ■1 coin!

Discussion Question: "Which item is the most expensive? Which is cheapest? How do you know?"

STEP 7 — Let's Count Together! (Addition)

Duration: 8 minutes

Now combine what children have learned — reading prices and counting coins — into a guided maths activity.

Example	Working It Out	Total to Pay
■3 Toffee + ■4 Biscuit	Count aloud: One... two... three... FOUR... five... six... SEVEN!	■7
■2 Toffee + ■5 Chips	Count aloud: One... two... THREE... four... five... six... SEVEN!	■7
■1 Pencil + ■3 Eraser	Count aloud: ONE... two... three... FOUR!	■4

■ Teacher Tip: *Use fingers to count! Ask the whole class to count aloud together. Place coin cutouts on the board one by one as you count. Emphasise that counting up coins is the same as adding numbers.*

STEP 8 — Let's Play! The Shopkeeper Game

Duration: 10 minutes

Now it's time for the main role-play activity. Children experience buying and selling first-hand, applying everything they have learned.

■ **Setup (before activity begins):**

1. Arrange a table at the front as the 'shop'.
2. Place 3 item cards on the table, each with a clear price tag.
3. Give one child the Shopkeeper badge (Small's role).
4. Give the other child a small purse with coin cutouts (Meena's role).

■ **How to Play — Step by Step:**

Step	Action	What Happens
1	Customer enters the shop	Meena walks up to the table and looks at the items.
2	Customer asks the price	Meena says: "How much is the Parle-G?"
3	Shopkeeper answers	Small looks at the price tag and says: "It is ■5!"
4	Customer counts the coins	Meena counts out the right coins from her purse.
5	Customer pays	Meena hands the coins to Small and says: "Here's the money!"
6	Shopkeeper gives the item	Small gives the item card to Meena.
7	Both say thank you	Both children say: "Thank you!"
8	Switch roles	The two children swap roles and play again with a different item.

■ **Key Phrases to Use:**

- "How much?" — asked by the customer
- "Here's the money!" — said when paying
- "Thank you!" — said by both parties

STEP 9 — Quick Quiz Time!

Duration: 5 minutes

Use these questions to check understanding. Ask the whole class, then call on individuals.

Question	Answer
Q1: What is a shop?	■ A place where goods are sold for money.
Q2: Who sells things in a shop?	■ The shopkeeper sells things.
Q3: Who buys things in a shop?	■ The customer buys things.
Q4: Which coin is silver with a lion on it?	■ The ■1 coin.
Q5: Which coin has TWO colours — gold and silver?	■ The ■10 coin.

Q6: A toffee costs ₹3 and a biscuit costs ₹4. How much do you pay in total?	■ ₹3 + ₹4 = ₹7. You pay seven rupees!
Q7: What do you say when you give money to the shopkeeper?	■ "Here's the money!" and then "Thank you!"

STEP 10 — Wrap-Up & Celebration! ■

Duration: 5 minutes

Close the lesson with energy and celebration. Reinforce the key learning points and praise children for their participation.

■ A shop is a place where goods are sold for money.
■ The shopkeeper sells and the customer buys.
■ Indian coins: ₹1, ₹2, ₹5, and ₹10 — each has a different size and colour.
■ Every item has a price tag that tells us how much it costs.
■ We count coins to pay the right amount — just like adding numbers!
■ Shopping uses polite words: "How much?", "Here's the money!", "Thank you!"

■ **Celebrate:** "Today we were all shopkeepers and customers. Wah!" Give everyone a round of applause. Children have learned a real-life skill today!

■ Extension Activities (Homework / Free Time)

■ Home Shop	■ Coin Hunt	■ Price List	■ Maths Practice
Set up a pretend shop at home using household items. Ask a family member to be the customer!	Find ₹1, ₹2, ₹5 and ₹10 coins at home. Draw them and write their values.	Draw 5 items you would sell in your shop and write a price next to each one.	Write three addition sums using prices, e.g. ₹4 + ₹3 = ?
