

GRADUATION SHOWCASE LESSON GUIDE

Welcome to Our Big Demo Day Celebration!

Planrs Academy • Grade 3 Activity Book

☀ Look at what we built!

Let's share our wonderful inventions, cheer
for our class friends, and celebrate our hard
work together!

Welcome to the Show!

Today is our Graduation Showcase Day! We are so happy to have you here! 🎉

A showcase is a giant science party where we stand up and present the inventions we designed. Because everyone worked super hard, we want to make sure we show the best manners to our classmates.

Here are three gold golden rules to follow during the show:

- 🙌 ****Applaud Every Single Peer!**** When a friend finishes speaking, give them a huge clap or a virtual high-five emoji to make them feel proud!
- 🤫 ****Stay Muted While Others Speak.**** Keep your microphone quiet like a mouse so everyone can hear the speaker clearly.
- 👂 ****Be an Active Listener!**** Look at the screen, listen to the ideas, and think of happy or curious questions to ask later.

Icebreaker: Let's Celebrate!

Before we look at our big projects, let's get our energy up! Follow these fun action steps with your teacher and classmates right now:

Action Wave:

Wave both your hands high in the air if you absolutely love learning new things!

Smile & Clap:

Show your biggest, brightest smile to the camera and clap if you are proud of your work!

Subject Jump:

Shout out your favorite school subject and do a little jump if you love Demo Day!

Point up to the sky if you had a great idea this term! You are an innovator!

How the Showcase Works

Being a presenter is just like being a storyteller. You get to guide the audience through your project journey step-by-step!

Here is how the timer clock works for each speaker:

The Presentation Timer:

-  ****2 to 3 Minutes:**** This is your special spotlight time! You tell everyone what your project is, how it works, and who it helps.
-  ****1 Minute Q&A:**** After you finish, your friends and parents have one minute to ask you questions or tell you what they loved.

While your friends talk, you can send virtual badges, stars, and happy emojis on the screen to show them they are doing an awesome job!

Project 1: Smart Watering Alert

Let's look at a wonderful project built by a Grade 3 classmate to help around the house!

This student noticed that their grandma was very busy with household chores and sometimes forgot to water her favorite garden plants. To solve this problem, they designed a ****Smart Watering Alert**** system!

What it Does:

It sounds a friendly reminder alarm at the exact right time every single day so grandma knows it is time to feed her green Tulsi and Money plants!

Real-World Impact:

This project helps busy families take care of nature easily. No more sad, forgotten, dry watering days! The plants stay healthy, green, and happy.

Project 2: Swachh Bharat Waste Collector

Our next student innovator was inspired by the beautiful ****Swachh Bharat Mission**** to keep our whole country clean and tidy!

They noticed that people sometimes throw rubbish on the ground in the community park. So, they designed a special community waste collector machine for their neighborhood park.

-  ****Dry and Wet Bins:**** The collector system helps sort trash into dry bins (like paper and plastic) and wet bins (like fruit peels and left-over food).
-  ****Eco-Friendly Habits:**** It teaches everyone who visits the park to build cleaner, greener habits.

Proud Neighbors:

The real-world result of this project is cleaner streets, a greener playground, and super proud neighbors who love their clean society!

Project 3: Digital Budgeting Game

Have you ever wanted to buy a special gift for your family during festival times? 🎆

This clever student created a super fun ****Digital Budgeting Game**** that teaches kids how to manage and handle their pocket money wisely.

The game sets up a fun challenge: player learns how to save enough money to buy sweet Diwali gifts for their friends and parents! Players have to make smart choices: what things to buy now, what things to save for later, and how to plan for celebrations.

"Save smart, celebrate big — every single rupee counts!"

Project 4: Community Helper

Let's look at another amazing idea created by our Grade 3 inventor to help local neighborhoods thrive:

Idea 4: The Community Garden Planner

This project plans a vibrant garden layout on the rooftop of a big apartment building. It shows neighbors how to work as a team to grow fresh tomatoes, green spinach, and healthy herbs for everyone to share and enjoy together!

Community Fun:

The real-world impact of this project is bringing fresh food, healthy green spaces, and wonderful sharing activities to every single neighbor in the building!

Feedback, Notes & Proud Reflections

Our class teachers, mentors, and visiting parents were completely blown away by the incredible talent shown during today's presentations!

From Our Parents:

"We are so incredibly proud! Our child explained their ideas with such amazing confidence. The bright creativity and hard work truly shone through today!"

From Our Mentors:

"Each student showed brilliant real-world thinking. Their ability to connect big science ideas to everyday community problems was inspiring to watch!"

Facilitator Star Strengths:

Our young inventors scored top marks in ****brilliant storytelling****, ****clear and confident explanations****, and showing ****genuine enthusiasm**** for learning and sharing with others!

Virtual Graduation & Next Steps!

It is official... you are a Graduate Innovator! 

Every student will now receive their own personalized ****Digital Graduation Scroll**** and ****Achievement Badge**** to honor their hard work, creativity, and engineering skills.

Victory Photo Moment!

Raise your victory peace signs up high, look at the camera, and smile big for our class milestone group photo!

****What's Coming Next?**** Exciting new coding adventures and design thinking courses await you as you move forward with curiosity into Grade 4! Keep asking questions, keep building things, and never stop creating!

Thank you for joining the Planrs Academy Showcase! See you next time!
