DADI'S BIRTHDAY VIDEO CALL

Priya calls Dadi in Rajasthan on her birthday. She sees Dadi smiling and waving on the phone screen!

How did Priya talk to Dadi who lives so far away?

WHAT IS THE INTERNET?

The Internet is an invisible road. It connects computers and phones all over the world!

New Word: Network = many devices connected like a big family

Internet is Like Indian Railways!

Imagine Indian Railways trains running on tracks. The Internet is like invisible tracks for information! Just like trains carry people from Mumbai to Delhi, the Internet carries messages from one phone to another.

Information Travels Like Trains!

When you send a message, it zooms along these invisible tracks super fast! Little dots of information travel like tiny trains, connecting cities all over India and the whole world!

What Can We Do With the Internet?

The Internet helps us do so many fun and useful things! Let's discover four amazing activities we can enjoy with the Internet.

Watch fun videos like
Chhota Bheem on YouTube

Learn new things at school
with DIKSHA videos

Share photos and
messages with loved ones

Talk to family far away on
video calls

Play exciting online games
with friends

Listen to songs and stories
anytime

WITH Internet So Many Things!

Video calls with family far away
Watch cartoons like Chhota Bheem
Play online games with friends
Search for answers on Google
Find places on Google Maps
Order vegetables from BigBasket

WITHOUT Internet Fun Too!

Playing outside with friends
Reading storybooks
Playing board games like Ludo
Asking teacher questions in class
Drawing and colouring

Devices That Connect to the Internet

Mobile Phone – most common in homes

Laptop or Computer – for school and offices

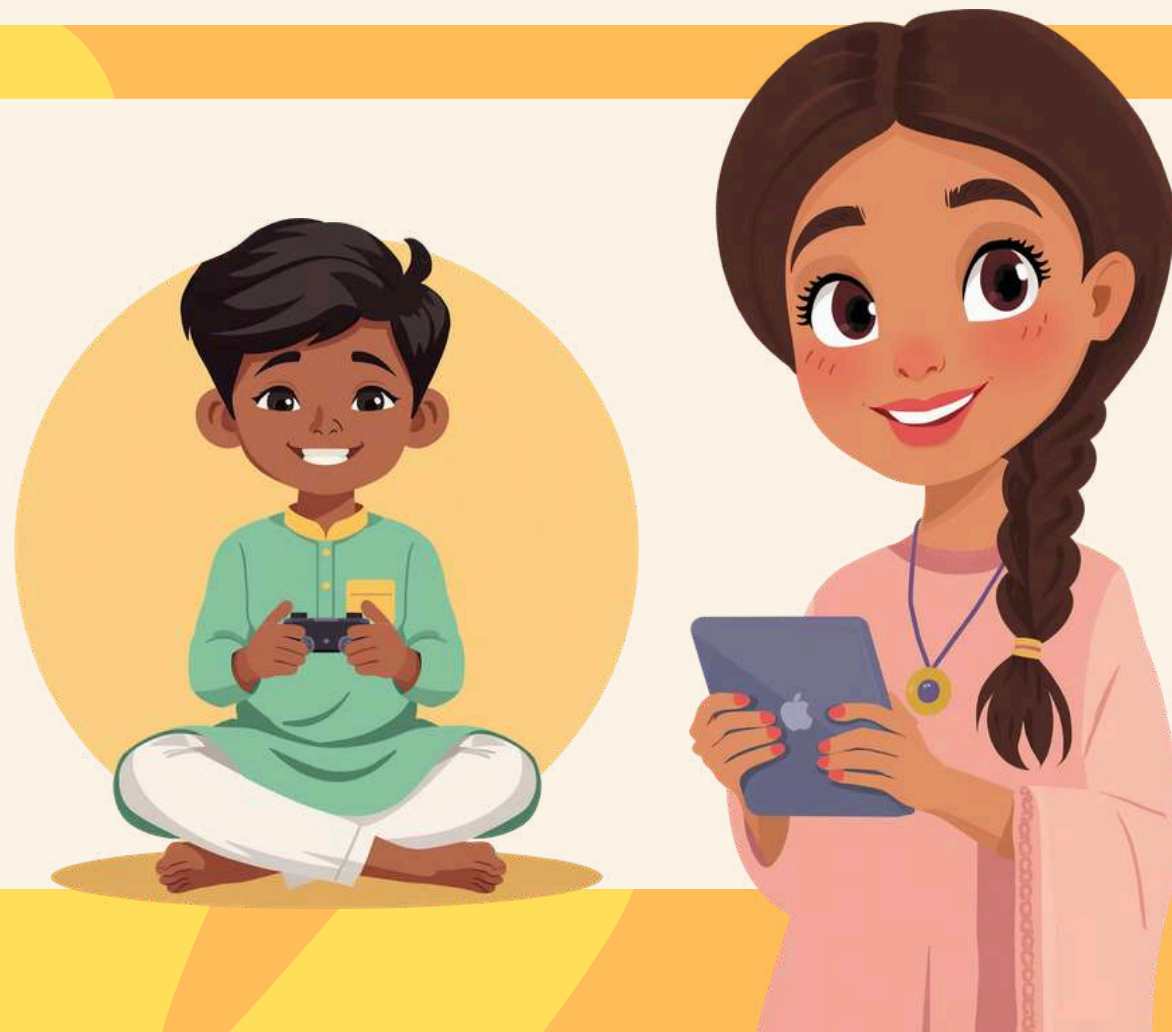

Smart TV – watch shows on OTT platforms

Tablet – for learning and playing games

These devices help us use the Internet!

More Connected Devices

Smartwatch: A tiny computer you wear on your wrist! It can show messages, track your steps, and even call your parents. Many children in India use smartwatches to stay connected safely.

Devices Are Tools!

Gaming Console: A special device just for playing video games! It connects to the Internet so you can play with friends far away. These devices are tools that help us use the Internet for fun and learning!

HOW DOES THE INTERNET TRAVEL?

Internet travels on wires underground and underwater. It also travels through the air as invisible signals called Wi-Fi!

New Word: Signal = an invisible message that travels very fast, like a tiny letter zooming through the air!

Spot the Internet!

Look at 8 activities below

Which ones need Internet? Which don't?

YouTube, Ludo, Video Call, Storybook

Google Search, Drawing, Swiggy, Cricket

Sort them into two groups!

Spot the Internet! **Answers Revealed**

WITH Internet ✓

- YouTube – watch videos online
- Video call – talk to Dadi
- Google search – find answers
- Swiggy – order yummy food

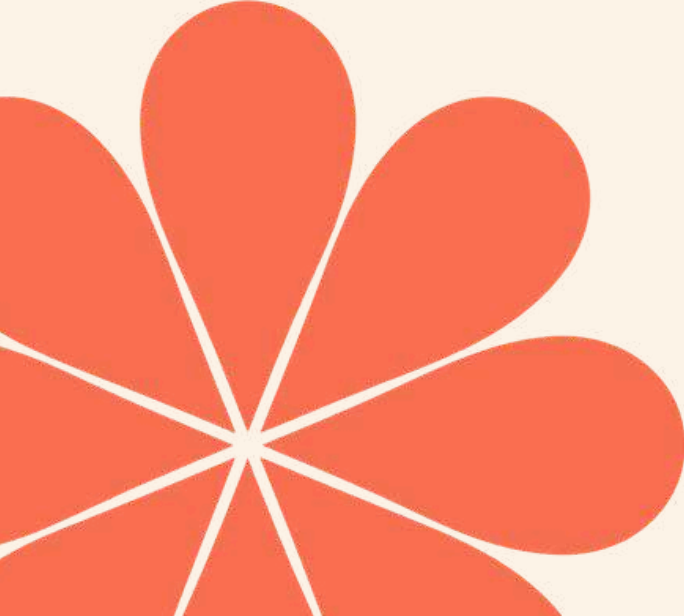

WITHOUT Internet **No Connection Needed**

WITHOUT Internet ✓

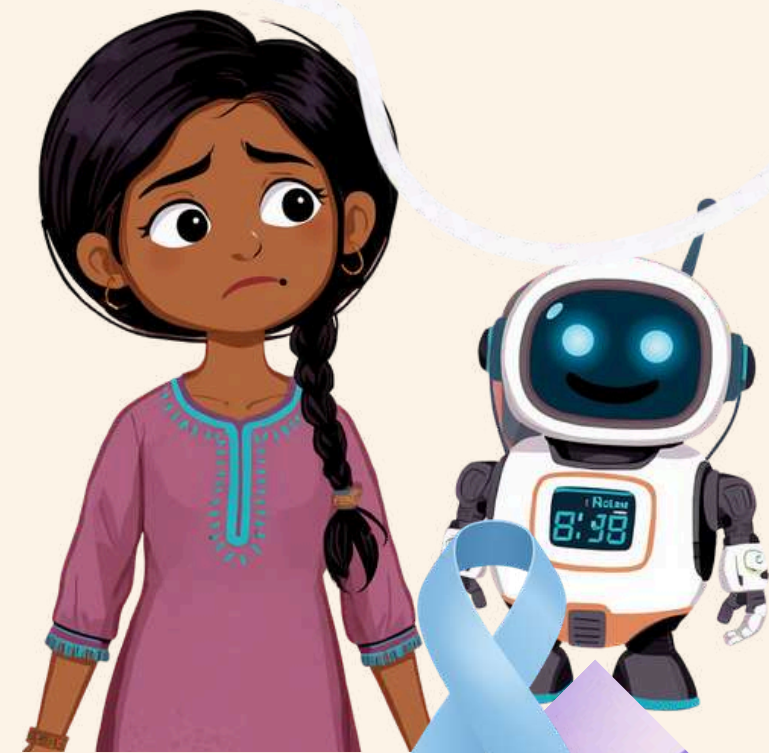

- Ludo – play with family
- Storybook – read adventures
- Drawing – create art
- Cricket – play outside

STORY TIME – NETI'S INTERNET ADVENTURE

Neti the Robot helps Priya find her lost kitten using the Internet. Priya is worried because her kitten Mitthu has gone missing in the neighborhood. But don't worry – Neti is ready to help using the power of the Internet!

NETI'S INTERNET ADVENTURE

Priya posts a message on the app. The message travels as a signal. A friend nearby sees it. The kitten is found safe!

The Internet helped Priya's message travel fast like magic! Her lost kitten came home because friends far away could see her message.

Mini Quiz – Test Your Internet Knowledge!

Q1: What is the Internet? ✓ Invisible roads connecting devices
