

MY DIGITAL PORTFOLIO

Building and Showing Your Best Work!

Grade 3 Capstone Project Guide

 **From Dusty Boxes to Bright Screens...**
Let's create a beautiful online scrapbook of everything you learned!

From Dusty Boxes to Bright Screens!

Think about all the awesome schoolwork you make! Where does it go? 🤔

Usually, drawings, paintings, and math sheets get bundled up and placed into old cardboard boxes. They sit in the corner of your room, gathering dust, and it is hard to find them later.

But wait! What if you could move your best creations out of those dusty boxes and put them right onto a bright computer screen?

Imagine this: You make a beautiful drawing at school, and you want to show it to your grandparents immediately. Even if they live far away anywhere in India, you can share it with them in just one click! That is the magic we are exploring today.

We are turning physical papers into digital masterpieces!

What Is a Digital Portfolio?

A **Digital Portfolio** is a very special online space. It works exactly like a physical file, but it lives safely inside a computer or tablet!

Here are 5 amazing reasons why having one is awesome:

1. Your Special Scrapbook

It is your personalized online album that holds pieces of your absolute best work.

2. Just Like a Prkalpa File

It feels just like a colorful project folder, but instead of paper, it is on a interactive screen!

3. Super Easy to Share

You can show your work to your cousins, uncles, aunts, or friends anywhere across India instantly.

4. Keeps Your Work Safe

No papers will get torn, lost, or wet. Everything stays safely saved online forever.

5. Shows Your Learning Journey

You can flip back and look at your older projects to see how much you have grown and learned!

Step 1: Choose Your Best Work!

The first step to building your digital portfolio is sorting through your school items and picking the ones you feel most proud of.

Your portfolio will have different slots for your journey. Here is how your online dashboard template will look:

 Welcome Page	 Creative Art	 Mind & Math	 Words & Stories
Your Profile: Write your name, class, and section here to start your journey!	Art Slot: Drag your favorite drawing, painting, or rangoli design into this slot.	Math & Science: Add your top math worksheet, code, or science project sheets here.	Language Slot: Add a poem you read, a cool story, or an essay you wrote!

Selection Tip:

Don't just pick the easiest assignments. Pick pieces of work that show your real effort, hard practice, and active improvement!

Step 2: Write Your Caption!

A portfolio isn't just a gallery of pictures. To make it a true story of your learning, every piece of work needs a short text description called a **caption**.

When you add an item, make sure to write a caption with these important parts:

-  **Add a short Title:** Give your work an easily recognizable name. Keep it short, like *"My Diwali Rangoli"* or *"My Multiplications Sheet"*.
-  **Write a complete Sentence:** Explain what you did. For example: *"I practiced the Chanda Mama poem 3 times with my mother!"*
-  **Use Your Own Words:** Be proud and share your personal feelings! Tell us exactly why you like this specific item, like: *"I love this because I used many bright colors!"*

Cyber Safety Alert: Stay Safe Online!

When naming your work or writing captions, **never** include your full legal name, home address, phone numbers, or private details. Security comes first!

What Can You Add? Awesome Examples

You can upload almost anything that shows what you learned this year! Let's look at some fantastic examples suited for Indian classrooms:

Creative Arts & Crafts:

A photograph of your colorful Diwali Rangoli, a beautiful handcrafted Eid Card, or an origami paper craft you folded.

Science & Mathematics:

A snapshot of your Science Mela model, a chart explaining plant leaves, or a successfully solved Rupee word problem page.

Languages & Stories:

An audio recording of you reciting a patriotic poem, an Independence Day essay, or a story written in your own handwriting.

Your Personal Choice:

You can add any extra school project that makes you happy and shows how smart you are becoming every single day!

★ How to Talk About Your Work

Let's practice thinking about our achievements! When you look at an item you created, use this simple thought model to describe it to others:

Question Prompt	Example Kids' Answer
 What is the Subject?	"This is a water-color drawing."
 How much time did it take?	"I worked on this carefully for 3 days."
 Why do you like it?	"I got to use many bright crayons and paints!"
 How much effort did you use?	"It was hard to get the shapes right, but I used a lot of effort and didn't give up!"
 Is this your own original work?	"Yes, these are completely my own words and ideas!"

Let's Get Started with Our Project!

It is time to build! Follow these three simple class tasks:

1 Task One: Select 3 Masterpieces

Pick exactly three artifacts from your backpack: one Art piece, one Math or Science sheet, and one Language worksheet.

2 Task Two: Arrange the Order

Organize them in neat time order, starting from earlier learning items up to your final Term 4 projects.

3 Task Three: Write Your Captions

Using a pencil, neatly write down your short title and description sentence for each of the three items.

Countdown Timer: You have exactly 13 minutes to complete this activity! Ready, set, go!

Sharing with Friends: Virtual Gallery Walk!

Once your portfolio is ready, it's time to celebrate with a ****Virtual Gallery Walk****! This is a fun activity where you get to look at your classmates' digital spaces, just like visiting a real art museum.

Sit with your friends, pass around the screens, and look at the folders they built. When showing your portfolio, practice saying something you are proud of:

"I am super proud of this drawing because I worked extra hard on it for three days!"

When you look at a friend's portfolio, remember to use kind words to cheer them on! You can say:

-  ****"Wow, your caption explains this perfectly!"****
-  ****"I love the colors you picked for your background design!"****
-  ****"That math sheet shows awesome effort!"****

Exit Poll: Share Your Thoughts!

Congratulations, you did an amazing job today! Let's finish with a short circle-up check. Look at these three questions and share your answers aloud with your group:

? Question 1: Did you successfully find your best work today?

☒ YES ☒ NO

? Question 2: Are you proud of your final digital profile space?

☒ YES ☒ NO

? Question 3: What brand new skill do you want to add to your portfolio next year?

Think of just one single action word (like: Coding, Guitar, Poetry, Football) and share it!

Your Digital Story Matters! Thank You!
